TO THE HON. COMMISSIONER OF PATENTS AND TRADEMARKS  
 WASHINGTON, D.C. 20231

Sir:

The above-identified applicant, a domestic corporation, incorporated under the laws of Delaware, having an address as indicated above, has adopted and is using the trademark shown in the accompanying drawing for the goods specified above, and requests that said mark be registered in the United States Patent and Trademark Office on the Principal Register established by the Act of July 5, 1946.

The mark was first used on the goods on May 8, 1976, was first so used in interstate commerce on May 8, 1976, and is now in such use in such commerce (15 U.S.C. § 1051(a), as amended).

The mark is used by applying it to packaging containing the goods sold under the mark. Three facsimiles showing the mark as used in commerce are presented herewith.

The undersigned declares that he is an officer of applicant corporation, and is authorized to execute this application on behalf of applicant; that he believes applicant to be the owner of the mark sought to be registered; that, to the best of his knowledge and belief, no other person, firm, corporation or association has the right to use said mark in commerce, either in the form of the identical mark, or in such near resemblance thereto as may be likely, when applied to the goods of such other person, or used in connection with the services of such other person, to cause confusion, mistake or deception; that all statements made herein of his own knowledge are true, and that all statements made herein on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States

Code, and that such willful false statements and the like may jeopardize the validity of the instant application or any registration resulting therefrom.

# CHIP THERMISTORS

**T**HERMISTOR  
**C**HIP  
**T**ECHNOLOGY

## INTRODUCTION

### **SENSICHIP®** DESCRIPTION

N.T.C. thermistors, electrically insulated, that provides fast, accurate temperature sensing in a wide variety of resistances (See Table 1) and ratios (See Table 2).

These thermistors provide a low cost alternative for use in a wide variety of applications, some of which are: temperature measurement, control of compensation, liquid level control, refrigeration sensors, automotive sensors and air flow sensing.

Catalog listed SensiChips are available from stock. For special resistance and/or tolerance needs call VECO for assistance.

### **UNICHIP®** DESCRIPTION

NTC Thermistors are epoxy coated to protect against effects of humidity and provide electrical insulation.

These precision parts provide the user with curve interchangeability to an accuracy of  $\pm 0.2^{\circ}\text{C}$  over the temperature range of  $0^{\circ}\text{C}$  to  $+70^{\circ}\text{C}$ . Special parts, to meet similar criteria in other resistance values and over other temperature spans, are available upon request.

In all cases, these parts are designed and manufactured to meet the requirements of MIL-T-23648.

Contact VECO for design assistance.
