ASSIGNMENT AGREEMENT

THIS ASSIGNMENT AGREEMENT (the "Assignment") is entered into pursuant to that certain Asset Purchase and Sale Agreement (the "Purchase Agreement") dated as of May 18, 2000 (the "Effective Date"), by and among MERIT MEDICAL SYSTEMS, INC., a Utah corporation ("Assignee"), and ELECTRO-CATHETER CORPORATION, a New Jersey corporation, debtor-in-possession ("Assignor"), wherein Assignor has agreed to transfer, assign, convey and deliver, forever, to Buyer all of Assignor's rights, title, and interest in, to, and under the Assets, as defined in the Agreement. All capitalized terms used herein shall have the same meaning given such terms in the Purchase Agreement, unless otherwise defined herein.

Recitals:

WHEREAS, pursuant to the terms of the Purchase Agreement, Assignor has agreed to assign to Assignee, all of Assignor's right, title, interest, performance obligations, duties, and burdens in and to the Intellectual Property, free and clear of all encumbrances.

WHEREAS, this Assignment is in the mutually agreed upon form described in the Purchase Agreement.

Agreement:

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

1. Assignor hereby sells, transfers and assigns to Assignee and its successors and assigns, effective as of the Effective Date, all of its right, title, and interest in and to the Records and Intellectual Property as described in the Purchase Agreement, including without limitation: (a) Assignor's entire right, title and interest in and to the United States and foreign trademarks, patents and patent applications set forth on the attached Appendix A incorporated herein and in and to the inventions disclosed and/or claimed therein, including the right to recover for any post Closing Date infringement (b) its entire right, title and interest in and to any other patent and other intellectual property rights pertaining to the field of medical catheter technology (the "Field of Interest"), including the right to recover for any post Closing Date infringement, and (c) all royalties and rights to income accruing on or with respect to the Intellectual Property on or after the Effective Date.

2. This Assignment is made pursuant to the terms of the Purchase Agreement and the Order of the Bankruptcy Court as defined in the Agreement. In the event of any inconsistency between this Assignment and the Purchase Agreement, the Purchase Agreement shall control.

3. Files and Documents. Within thirty (30) days after execution hereof, Assignor agrees to deliver or make available to Assignee true and complete copies or originals, as the case may be, of all information, files and documents within the possession or control of Assignee or its affiliates

relating to said Records, Intellectual Property, trademarks, patents and patent applications and to the inventions disclosed and/or claimed therein, including, but not limited to, files in the possession of legal counsel to the extent available but excluding any privileged communications, original letters patent and technical documents of the inventors.

4. Execution of Documents. Assignor agrees to execute and to deliver promptly upon request by Assignee such reasonable other and further documents and to take such reasonable action deemed necessary or desirable by Assignee: (i) to perfect the assignment of any of the Intellectual Property, including without limitation, the trademarks, patents or patent applications listed in the attached Appendix A; (ii) to record such assignment in the appropriate office(s), including trademark and patent offices; and/or (iii) to carry out the purposes and intent of this Agreement. This requirement shall expire on the later of 120 days after the Closing Date or entry of the final order in Seller's current Bankruptcy Court proceeding confirming Seller's Chapter 11 plan.

5. Warranties and Representations. Assignor hereby warrants and represents, to the best of its knowledge and belief, to Assignee as follows:

a) Assignor is the owner of the entire right, title and interest in and to the Intellectual Property, including without limitation, the trademarks, patents and patent applications set forth in the attached Appendix A and in and to the inventions disclosed and/or claimed therein, and has the unqualified right to execute and deliver this Agreement.

b) To Assignor's knowledge, the Intellectual Property, including without limitation the trademarks, patents and patent applications listed in the attached Appendix A, is not subject to any liens, encumbrances, licenses or other claims except as disclosed on Schedule 2.10(a) of the Agreement.

c) Assignor has not executed any documents or taken any action, and will not execute any document or take any action, in conflict with this Agreement.

d) Assignor is not aware of any allegations by third parties that the Intellectual Property, including without limitation the trademarks, patents and patent applications set forth in Appendix A, is invalid or unenforceable, or that the manufacture, use and/or sale of products solely in accordance with such Intellectual Property, trademarks, patents and patent applications would infringe the patent or other intellectual property rights of any third party.

e) Except for trademarks and patents listed as abandoned, all applicable examination and maintenance fees, annuities or other government fees required to maintain the trademarks, patents and patent applications listed in the attached Appendix A in force have been duly paid as of the date hereof.

f) Assignor has the full legal right and power and all authority and approval required to enter into, execute and deliver this Agreement and to perform its obligations hereunder. Each of the representatives executing this Agreement on behalf of Assignor has been duly authorized to do so.

g) To the best of Seller's knowledge, the execution, delivery and performance of this Agreement by Assignor does not and will not violate or result in the breach of any document, agreement, proceeding or law to which Assignor is a party or governed by, or by which the trademarks, patents and patent applications set forth on Appendix A or other Intellectual Property are affected.

h) Assignor is not aware of any existing or threatened infringement of any trademark, patent or patent application set forth on Appendix A.

i) Assignor and each of its affiliates do not own or possess, directly or indirectly, any right, title or interest in or to any patents, patent applications, inventions, technology or other intellectual property useful in or relating to the Field of Interest other than the patents and patent applications set forth on Appendix A and the inventions disclosed and/or claimed therein, except for United States Patent Number 4,790,825 (1988) ("Percutaneous Transseptal Left Atrial Cannulation System) which is an Excluded Asset.

6. Cooperation. Assignor agrees to cooperate fully in the enforcement and prosecution of any of said trademarks, patents and patent applications and to provide Assignee with any evidence or information in Assignor's possession or control which may be relevant or useful in enforcing or obtaining any of said patents or patent applications provided Assignor is reimbursed for all reasonable costs and expenses associated therewith. This provision shall expire upon the later of 120 days after the Closing Date or the entry of a final decree closing Seller's current Bankruptcy Court proceeding.

7. This Assignment may be signed in one or more counterparts, each of which shall be deemed an original and together which shall constitute one and the same instrument. Facsimile copies of this Assignment shall have the same effect as originals.

8. This Assignment shall be governed in all respects, including validity, interpretation and effect, by the internal laws of the State of Utah, without regard to the rules of conflicts of law that would required the application of the law of any other jurisdiction.

9. This Assignment shall bind and inure to the benefit of the parties hereto and their respective successors and assignors.
