ASSIGNMENT OF INTELLECTUAL PROPERTY RIGHTS

THIS ASSIGNMENT OF INTELLECTUAL PROPERTY RIGHTS (this "Agreement"), is made and entered into as of December 19, 2001, by and between iLife Systems, Inc., a Delaware corporation (the "*Assignor*"), and iLife Solutions, Inc., a Delaware corporation (the "*Company*" and/or "*Assignee*," and collectively with the Assignor, the "*Parties*").

WITNESSETH:

WHEREAS, in connection with the Assignment and Assumption Agreement (the "*Assignment*") dated as of the date hereof between the Parties, among other things, Assignor is transferring all of its Assets (as defined in the Assignment) to Assignee; and

WHEREAS, in connection with the Assignment, and to further evidence the assignment of certain of the Assets assigned pursuant thereto and not in limitation thereof, Assignor desires to assign to the Company herein all of Assignor's right, title, and interest in and to all intellectual property that Assignor owns, possesses, or controls, as more fully set forth herein below, and the Company desires to accept such assignment; and

WHEREAS, in consideration for the Assets, including such intellectual property, and pursuant to the Assignment, Assignee is assuming certain payables, liabilities and obligations of Assignor as more particularly described in the Assignment; and

WHEREAS, the parties hereto wish to make certain other agreements as set forth below;

NOW THEREFORE, for and in consideration of the mutual covenants and agreements set forth herein and in the Assignment, and other good and valuable consideration, the receipt and sufficiency of which are hereby mutually acknowledged, the parties hereto, intending to be legally bound, hereby act and agree as follows:

Section 1

TRANSFER AND ASSIGNMENT BY ASSIGNOR

1.1 Conveyance of Rights. Assignor hereby transfers, grants, conveys, assigns, and relinquishes exclusively to the Company all of Assignor's right, title, and interest in and to all of the intangible rights and assets owned or held by Assignor. The foregoing rights and assets shall hereinafter collectively be referred to as the "*IP Assets*." Without in any way limiting the generality of the foregoing, the IP Assets shall include all right and interest owned or held by Assignor in the following:

1.1.1 All right, title, interest and benefit (including the right to make, use or sell under patent law; to copy, adapt, distribute, display and perform under copyright law; and to use and

disclose under trade secret law) of Assignor in and to all United States and foreign patents and patent applications, including, without limitation each patent and patent application identified on Exhibit A hereto, patent license rights, patentable inventions (collectively with all patents and patent applications and patent license rights, the "*Patent Rights*"), all reissues, divisions, continuations, continuations-in-part, substitutes, renewals and extensions of all Patent Rights and all improvements thereon, trade secrets, trademarks, service marks, trademark and service mark registrations, applications for trademark and service mark registrations and any renewals thereof, including, without limitation, each application and registration identified on Exhibit B hereto, all trademark and service mark license rights, trade names (including, in the case of trademarks, service marks and trade names, all goodwill appertaining thereto), copyrights, technology licenses, knowledge, know-how, confidential information, computer software, code, shop rights, processes, ideas, inventions and all other intellectual property rights owned or claimed by Assignor embodied in the IP Assets.

1.1.2 All right, title, interest, and benefit of Assignor and all powers and privileges of Assignor, in, to, and under all technical data, drawings, prototypes, engineering files, system documentation, flow charts, designs and design specifications acquired or developed by Assignor in connection with the development of programming, inventions, processes, and apparatus entailed by the IP Assets.

1.1.3 All income, royalties and damages hereafter due or payable to Assignor with respect to the IP Assets, including without limitation, damages and payments for past or future infringements and misappropriations of the IP Assets and all rights to sue and recover for past, present and future infringements or misappropriations of the IP Assets.

1.2 Further Assurances. Assignor agrees to execute and deliver, from time to time, after the date hereof, upon the request of the Company, such further documents or conveyance instruments, and to take such further actions, as may be necessary or desirable in the opinion of the Company to evidence more fully the transfer of ownership of all the IP Assets to the Company, or the original ownership of all the IP Assets on the part of the Company, to the fullest extent possible. Assignor therefore agrees to:

1.2.1 Execute, acknowledge and deliver any documents or conveyance instruments regarding the IP Assets;

1.2.2 Provide testimony in connection with any proceeding affecting right, title, interest or benefit of the Company in and to the IP Assets; and

1.2.3 Perform any other acts deemed necessary to carry out the intent of this Agreement.

1.3 Acknowledgment of Rights. In furtherance of this Agreement, Assignor hereby acknowledges that, from this date forward, the Company has succeeded to all of Assignor's right, title, interest and standing to:

1.3.1 Receive all rights and benefits pertaining to the IP Assets;

1.3.2 Institute and prosecute all suits and proceedings and take all actions that the Company, in its sole discretion, may deem necessary or proper to collect, assert or enforce any claim, right or title of any kind in and to any and all of the IP Assets; and

1.3.3 Defend and compromise any and all such actions, suits or proceedings relating to such transferred and assigned rights, title, interest and benefits, and do all other such acts and things in relation thereto as the Company, in its sole discretion, deems advisable.

1.4 Transfer of Materials. Assignor shall immediately surrender to the Company all materials in Assignor's possession or within Assignor's control (including all copies thereof) relating in any way to the IP Assets.

1.5 Power of Attorney. To effectuate the terms of this Section 1, Assignor hereby names and irrevocably constitutes and appoints the Company, with full power of substitution therein, as Assignor's true and lawful attorney-in-fact to exercise the rights assigned hereunder. Assignor hereby declares that the foregoing powers and appointment are coupled with an interest and will be irrevocable by it in any manner or for any reason.

Section 2

MISCELLANEOUS

2.1 This Agreement shall inure to the benefit of, and be binding upon, the Parties and their respective successors and assigns.

2.2 This Agreement, and the interpretation and enforcement of the same, will be governed by and enforced under the laws of the State of Texas, exclusive of conflicts of law principles, and to the maximum extent practicable, jurisdiction and venue in any dispute relating to the subject matter hereof will be in Dallas County, Texas. The prevailing party in any such dispute will be entitled to recover, in addition to any other relief granted, reasonable attorney fees and expenses related to such dispute.

2.3 Any modification or amendment to this Agreement shall be effective only if in writing and signed by a duly authorized representative of the Parties. If a court or other tribunal holds any part of this Agreement invalid, the remainder shall not be affected and will be given full effect, without regard to the part held invalid.

2.4 This Agreement is being executed and delivered in furtherance of, and not in limitation of, the Assignment and is not intended, and shall not be deemed, to limit the scope or effect of the Assignment. In the event that any conflict or ambiguity exists as between this Agreement and the Assignment, the terms and provisions of the Assignment shall govern and be controlling.

IN WITNESS WHEREOF, the Parties have executed this Agreement the day and year first above written.
