WHEREAS, Assignor desires to assign to Assignee all of Assignor's right, title and interest in and to the intellectual property identified herein and used in connection with Assignor's business.

NOW, THEREFORE, for good and valuable consideration, the sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

1. Assignor hereby assigns, sells, transfers and conveys to Assignee, as of the Effective Date, all of its right, title, and interest in and to the following intellectual property (collectively, "**Intellectual Property**"):

(a) all patents and patent applications (issued or filed throughout the world) related to Assignor's business and owned by Assignor, including, without limitation, any reexaminations, extensions, reissues, divisionals, continuations, continuation-in-parts, substitutions and renewals thereof, and any other patent applications and patents that claim priority from such patents and patent applications, including, without limitation, any foreign applications or patents corresponding thereto, and all rights, claims and privileges pertaining thereto, including, without limitation, rights to the underlying inventions, the right to prosecute and maintain such patents and patent applications, and the right to sue and recover damages for past, present and future infringement of such patents;

(b) all trade names, trademarks, service marks, trade dresses, logos, designs and slogans, whether in word mark, stylized or design format, registered and unregistered, throughout the world, relating to Assignor's business and owned by Assignor, including, without limitation, those registrations and applications listed on Schedule A hereto ("**Marks**"), together with the goodwill of the business associated with and symbolized by the Marks and all rights, claims and privileges pertaining to the Marks, including, without limitation, the right to prosecute and maintain trademark applications and registrations for the Marks, and the right to sue and recover damages for past, present and future infringement of the Marks;

(c) all copyrights, registered and unregistered, related to Assignor's business and owned by Assignor, and all rights, claims and privileges pertaining thereto, including, without limitation, all moral rights, the right to prosecute and maintain copyright applications and registrations for such copyrights, and the right to sue and recover damages for past, present and future infringement of such copyrights; and

(d) all other intellectual property and other proprietary rights related to Assignor's business and owned by Assignor, including, without limitation, know-how, trade secrets, inventions (whether or not patentable), formulas, processes, invention disclosures, technology, technical data or information, software and documentation therefor, object code, source code (including all programmers' notes), procedures, methods, and other documentation, data and information, and all rights, claims and privileges pertaining thereto, including, without limitation, the right to sue and recover damages for past, present and future infringement of such intellectual property and proprietary rights.

2. Assignor shall promptly take all actions requested by Assignee and reasonably necessary to fully vest or perfect in Assignee all right, title and interest in and to the Intellectual Property. Such actions shall include, without limitation, executing documents and providing documents and information useful or necessary to prosecute any application to register any of the Marks or copyrights or to apply for a patent, maintain any of the foregoing, or pursue or defend any administrative, court, or other legal proceeding involving any of the Intellectual Property.

3. This Assignment shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns.
