This INTELLECTUAL PROPERTY AND DOMAIN NAME ASSIGNMENT (this "Assignment"), effective the 15th day of July, 2005, is made and entered into by and between ROBICON CORPORATION, a Pennsylvania corporation ("Assignor"), a wholly owned subsidiary of High Voltage Engineering Corporation, a Massachusetts corporation ("HVE"), and SIEMENS ENERGY AND AUTOMATION, INC., a Delaware corporation ("Assignee") (each a "party," and collectively, the "parties"). Capitalized terms used herein but not otherwise defined herein shall have the meanings set forth in the Asset Purchase Agreement (defined below).

WHEREAS, Assignor is the owner of each of (i) the patents and patent applications set forth on Schedule A hereto (the "Patents"); (ii) the copyrights, copyright registrations and copyright applications set forth on Schedule B hereto (the "Copyrights"); and (iii) the trademarks, trademark registrations and trademark applications (including any and all goodwill symbolized thereby) set forth on Schedule C hereto (the "Trademarks") ((i)-(iii), collectively, the "Purchased Intellectual Property").

WHEREAS, Assignor is the registrant of record and owner of each of the Internet domain names (including any and all goodwill symbolized thereby) set forth on Schedule D hereto and the domain name registrations therefor (the "Domain Names");

WHEREAS, Assignor and Assignee entered into that certain Asset Purchase Agreement dated April 21, 2005 (the "Asset Purchase Agreement"), pursuant to which Assignee agreed to purchase the Acquired Assets from Assignor, including all of the Assignor's right, title and interest in and to the Purchased Intellectual Property and the Domain Names; and

WHEREAS, the execution and delivery of this Assignment is a condition to Closing.

NOW THEREFORE, for the consideration set forth in the Asset Purchase Agreement, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Assignment. (a) Effective upon Closing, Assignor hereby assigns to Assignee all of Assignor's right, title and interest in and to the Purchased Intellectual Property and the Domain Names, including (i) all rights therein provided by international conventions or treaties, and (ii) any and all rights to sue or recover and retain damages and costs and attorneys' fees for past, present and future infringement, dilution, misappropriation, or other violation thereof, and rights for priority and protection of interests therein under the laws of any jurisdiction. Assignor shall not enter into any agreement in conflict with this Assignment.

2. No Warranties. Except as expressly provided in the Asset Purchase Agreement, Assignor makes no warranties, express or implied, with respect to the Purchased Intellectual Property and the Domain Names.

3. Further Assurances. At the request of Assignee, at any time after the Closing Date, Assignor shall execute and deliver such documents as Assignee or its counsel may reasonably request to effectuate the purposes of this Assignment.

4. Registrant Name Change Agreement. (a) Within three (3) days following Closing, Assignor shall (i) execute or otherwise complete the applicable registrant name change agreement or other forms required by the applicable Internet domain name registrar for each Domain Name (the "Registering Authority") to transfer such Domain Name to Assignee on an expedited basis, (ii) submit or file such registrant name change agreements or other forms to or with the Registering Authority in accordance with the policies and rules of the Registering Authority, and (iii) take any further actions in accordance with the policies and rules of the Registering Authority as required to transfer such Domain Names to Assignee on an expedited basis.

5. Governing Law. This Assignment shall be construed, performed and enforced in accordance with, and governed by, the Laws of the Commonwealth of Massachusetts (without giving effect to the principles of conflicts of Laws thereof), except to the extent that the Laws of such Commonwealth are superseded by the United States Bankruptcy Code.

6. Counterparts. This Assignment may be executed in counterparts, each of which shall be deemed an original, but all of which shall constitute the same instrument.
