PATENT AND TRADEMARK ASSIGNMENT

This Patent And Trademark Assignment (this "Assignment"), effective as of August 1, , 2005 (the "Effective Date"), is entered into by and between HealthTronics Surgical Services, Inc., a Georgia corporation ("Assignor") and SanuWave, Inc., a Delaware corporation ("Assignee"). Assignor and Assignee are each a "Party" and collectively the "Parties".

WHEREAS, Assignor is the exclusive owner of all right, title and interest in and to those United States patents and patent applications (collectively, the "Patents"), and registered United States trademarks (the "Trademarks") described below; and

WHEREAS, Assignor agrees to assign to Assignee the entirety of Assignor's right, title and interest in and to the Patents and Trademarks; and

WHEREAS, Assignee agrees to accept the entirety of Assignor's right, title and interest in and to the Patents and Trademarks;

NOW, THEREFORE, for good and valuable consideration, the receipt and adequacy of which is hereby acknowledged, Assignor does hereby assign, transfer and convey to Assignee and its successors, assigns and nominees forever, without any restrictions, reservations or limitations, any and all of Assignor's entire right, title and interest in and to the Patents and Trademarks, including without limitation:

11. The United States patents and patent applications listed on Schedule A, including all reissues, divisionals, reexaminations, renewals, extensions, provisionals, continuations and continuations-in-part thereof;
11. The registered United States trademarks listed on Schedule B, together with the goodwill of Assignor's business appertaining thereto and/or symbolized thereby;
3. All rights, priorities and privileges of Assignor provided under the laws of the United States, or any multinational law, compact, treaty, protocol, convention or organization, with respect to the foregoing rights;
4. All rights to sue at law or in equity for any infringement, impairment or other unauthorized use or conduct in derogation of the foregoing rights occurring prior to the Effective Date, including the right to receive all proceeds and damages therefrom; and
5. Any and all rights to obtain renewals, reissues, re-examinations, divisions, extensions or other legal protections pertaining to the foregoing rights (the rights in sections 1-5, collectively the "Assigned Rights").
6. Assignee, its successors and assigns, shall hold the rights to the Assigned Rights for and during the existence of the term and life of such Assigned Rights, as fully and as entirely as the same would have been held and enjoyed by Assignor had this Assignment not been made.

7. This Assignment is effective as of the Effective Date. Assignor shall, without further consideration, comply with a reasonable request by Assignee, at Assignee's expense, to execute promptly any additional documents provided by Assignee and to take promptly any further action necessary to protect, secure and vest good, valid and marketable title to the Assigned Rights in Assignee.

8. The Parties agree that the assignment of each item on Schedules A and B shall be construed as separable and divisible from the assignment of every other item. The unenforceability or invalidity of this Assignment with respect to any one item shall not limit its enforceability or validity, in whole or in part, with respect to any other item.

9. This Assignment may be signed in one or more counterparts, each of which shall be an original and all of which shall be considered one and the same agreement, and shall become effective when one or more such counterparts have been signed by each Party and received by the other Party.

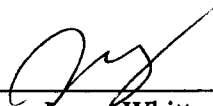

10. This Assignment shall be deemed to have been made in Delaware, and its form, execution, validity, construction and effect shall be determined in accordance with the laws thereof and the federal laws, regulations, treaties and international conventions relating to intellectual property.

11. Nothing in this Agreement shall be construed as:

- (a) A warranty or representation by Assignor as to the validity or scope of any Patent or Trademark; or
- (b) A warranty or representation that anything made, used, sold or otherwise disposed of under any patent assigned in this Agreement is or will be free from infringement of patents, copyrights, trade secrets, or other personal or proprietary rights of third parties; or
- (c) Conferring a right to use in advertising, publicity or otherwise the name of the inventor of any Patent or the name, seal, insignia, logotype insignia or any other adaptation of Assignor without prior written consent of Assignor; or
- (d) Granting by implication, estoppel, or otherwise, any licenses or rights under the intellectual property rights of Licensor other than the Patents and Trademarks, regardless of whether such other patents are dominant, subordinate, or an improvement by Assignor to any Patent; or
- (e) Conferring upon any person (1) any immunity from or defenses under the antitrust laws, (2) any immunity from a charge of patent misuse or trade secret misappropriation, or (3) any immunity from the operation of state or Federal law.
