## ASSIGNMENT OF INTELLECTUAL PROPERTY

THIS ASSIGNMENT AGREEMENT (the "*Assignment*") is entered into as of this 13<sup>th</sup> day of JUNE, 2002 (the "*Effective Date*") by and among AppliedTheory Corporation, a Delaware corporation, and its subsidiaries that are signatories hereto (collectively, "*Assignors*") and ClearBlue Technologies Management, Inc., a Delaware corporation ("*Assignee*"). Capitalized terms used but not defined herein shall have the meanings ascribed to them under that certain Asset Purchase Agreement dated as of April 17, 2002 by and among Assignors and Assignee (as amended, the "*Purchase Agreement*").

### RECITALS

A. WHEREAS, pursuant to the Purchase Agreement, Assignee has agreed to purchase the Assets, including all patents, patent applications, trademarks, service marks, trade names and copyrights, in each case registered or unregistered, inventions, URL's, licenses, software (including documentation and object and source code listings), know-how, trade secrets, customer lists, processes, drawings, specifications, designs and other proprietary or intellectual property rights used in the Business as heretofore conducted, other than Shared Property, as set forth on Schedule I hereto (the "*Intellectual Property*"), from Assignors and Assignors have agreed to transfer the Assets, including the Intellectual Property, to Assignee; and

B. WHEREAS, Assignors wish to assign the Intellectual Property to Assignee and Assignee wishes to have the Intellectual Property assigned to it.

NOW, THEREFORE, for good and valuable consideration, the adequacy and receipt of which are hereby acknowledged, Assignors and Assignee agree as follows:

1. Assignors hereby irrevocably and unconditionally sell, convey, transfer and assign to Assignee any and all of their rights, title, benefits and interests in the Intellectual Property, the same to be held by Assignee, as fully and entirely as the same would have been held by Assignors had this Assignment not been made.
2. The parties acknowledge that this Assignment includes all rights Assignors have to bring actions for patent, copyright or trademark infringement prior to the Effective Date, including the right to seek and obtain damages or settlements for such infringement.
3. Assignee hereby assumes all responsibilities for maintaining adequate registration of and otherwise enforcing, protecting and defending its rights to the Intellectual Property.

TRADEMARK

REEL: 003316 FRAME: 0173

4. This Assignment may be executed in one or more counterparts, including by facsimile, each of which shall constitute an original and all of which together shall constitute one and the same instrument.
5. This Assignment shall inure to the benefit of and be binding upon the parties and their respective successors and assigns.
6. This Assignment shall be governed and construed in accordance with the laws of the State of New York without regard to conflicts of law.

*[Signature Pages Follow.]*

IN WITNESS WHEREOF, the parties hereto have caused this Assignment to be executed as of the Effective Date.

### Schedule 3.1(f) – Patents, Trademarks and Similar Rights.

#### Copyrights and Copyright Applications

General – Our standard professional services agreement grants the customer a non-exclusive, perpetual, royalty-free license to use software developed under the engagement. This clause is negotiated from time to time to grant the customer ownership in the software developed and a license to use the pre-existing software, but generally, applications developed for a client are owned by AppliedTheory.

#### Other Software Owned By AppliedTheory Corp.:

##### Delta Edge Content Delivery Network (patent pending)

AppliedTheory's Delta Edge software is the first content distribution technology to accelerate the delivery of dynamic, or changing, data over the Internet. While other content distribution networks improve delivery of static content - such as images and non-changing text - only Delta Edge speeds delivery of both static and fast-changing dynamic content.

Patent Application for DeltaEdge - Patent Application No. 09/621,659  
Filed 7/21/2000

For: Method of and Apparatus for Rapid Retrieval of Data in a Content Distribution Network  
Inventor: Patrick R. McManus (all rights assigned to AppliedTheory)  
International Patent Application No PCT/US01/22075

##### Waterfall Content Management System

Waterfall is a Java based recursive-publishing engine that can be integrated with existing systems and applications, along with facilitating adaptation of features and functions that can address an organizations specific need.

The system is comprised of several building blocks designed to work together. The content within CMS is maintained in a hierarchical structure of tiers, organization, category and document categories, all referred to as levels. This provides a structure for storing the content while simplifying the display and navigation for users visiting the public web site.

##### Cascade Content Management System

Cascade is a database driven content and application management system (CMS). Similar to the way an outline has top-level categories and deeper nested subcategories, site organization is based on the same hierarchical approach. The hierarchical levels will at the same time drive navigation.

The security matrix system administration is also built on the same hierarchy model. A system supervisor can establish user roles for site publishing at each hierarchical level. This means a particular user (publisher or otherwise) may have multiple publishing privileges in different areas of the site, including the ability to modify hierarchy levels in authorized areas.

The CMS has a large set of functions and tools including an on-line form generator, a What you see is What you Get, (WYSIWYG) text processor, content expiration functions, various display tools, a built in search engine, calendar of events, FAQ's and more.

##### ServerMon

ServerMon is a website monitoring tool that sets alarms (via console display, audible messages and e-mail) when site outages are detected or when specific performance thresholds are exceeded.

### THOMAS

Total Hosting Operations and Managed Application Surveillance - or THOMAS - our scalable suite of monitoring tools which forms a robust Web site application, server, and network monitoring system. THOMAS is a customer portal that presents a Web-based, graphic "digital dashboard" for interactive, real-time monitoring of clients entire Web operation. It provides third-party benchmarking systems Network Health and Keynote Systems Web Site Perspective for additional insight, data collection, and site application, server, and network assessment.

### CyberCentral

AppliedTheory's event content management solution. Functions supported includes streamlined event management, increased attendee knowledge, enhanced attendee loyalty and satisfaction, attendee community building, networking, and collaboration, automated data collection and attendee profiling, additional revenue opportunities.

### AppliedTheory Order Management (ATOM)

ATOM is a client/server application that was developed internally and implemented in 1998. In 2001, a browser based version was introduced. It contains pertinent financial, technical and contact related customer information and is used to manage the entire customer lifecycle. This includes customer implementation tasks and notifications, billing, service changes and commission processing. A reporting section provides reports for accounting, support services, network services and management. Primary users are the Accounting, Customer Implementation and Customer Support areas. All areas of the company utilize ATOM reporting.

### AppliedTheory Client/Project Portal

A Content Management System based system for tracking and reporting on projects.

### AppliedTheory Corporate Intranet (INET)

Corporate Intranet supporting a range of functions including time tracking and reporting, project managements, sales support, time off authorization and management.

### AJB/OSOS

AppliedTheory has a fully paid, perpetual, irrevocable, transferable license, with the right to sublicense, to use, modify, enhance, improve, market and sublicense Components of the AJB and OSOS software and for any purposed. AppliedTheory has the right to use modify, enhance, improve, market and sublicense Components of the software.

### Trademarks and Trademark Applications, Service Marks

#### AppliedTheory Corporation Trademarks

Service Mark Registration for the tag line 'The Craft and Business of the Internet' - Certificate of Registration (2,172,393)

Service Mark for the word 'AppliedTheory' - Registration Number (2,135,314)

AppliedTheory and Design - Logo - United States - Registration Number (2,134,128)

Certificate of Registration for 'Net Potential Realized' Registration Number (2,336,579)

Certificate of Registration for 'Enterprise Solutions from AppliedTheory' Registration Number (2,329,484)

AppliedTheory Logo - European Community - Service Mark Registration Number (001469071) - British Official Journal on 11/6/2000.

Service Mark Registration for "DeltaEdge" Serial Number 76/090,316 - Pending

Certificate of Registration for "Trivialink" Registration Number (2,334,576)
