Products

Mortgage Collateral

Put the power of your best sales people in the hands of every employee.

We're all familiar with the 80/20 rule that relegates 80% of your company revenues to 20% of your sales force. That's why it's important for you to make sure your entire sales force has an advantage with MindBox®.

Uniquely qualified to help mortgage providers like you maintain and improve your competitive edge, MindBox products integrate your best practices and knowledge assets into a streamlined automated mortgage system. With MindBox you can increase loan volume, control spending, automate and personalize the loan structuring and underwriting process, cross sell additional products, streamline the decision cycle, and efficiently manage and extend your business systems. Here's how we help you do it.

Customer centric, profit driven.

MindBox provides products that automate a wide range of mortgage lending processes. Our systems intelligently automate mortgage loan underwriting, sales, credit grading and analysis, compliance verification, personalized pricing, product best fit, deal structuring, debt reparation and cross-selling. These systems are implemented using our world class decisioning product family, *The ARTEnterprise Product Family*, which includes components such as *ARTOptimize*, designed to automate critical steps within the lending process. Unique to MindBox is the ground-breaking MindBox Power Editor that enables business users to easily maintain our systems. With the MindBox Power Editor, business users can organize, implement, maintain and extend policies in the system according to their business environment.

The ARTEnterprise Product Family reduces costs and risk.

A suite of cutting-edge, rules-based decisioning products, the ARTEnterprise Product Family reduces costs and risk with a proven approach. It enables rapid automation of your policies for business processes like loan origination, loan underwriting, pricing, debt reparation and deal structuring. This technology is so powerful it allows you to tailor each individual interaction to optimize your relationship with a given customer, regardless of customer point of contact.

MindBox in Mortgage

Overview

Mortgage Collateral

Products

Overview

The mortgage industry is a complex environment, requiring knowledge and understanding of thousands of processes, regulations and relationships. In today's dynamic economy, these factors change on a daily basis. In order to succeed, mortgage organizations must be efficient, flexible and able to respond to changing business requirements instantly. MindBox® is uniquely qualified to help mortgage providers maintain and improve their competitive edge by integrating their best practices and knowledge into a streamlined automated mortgage system. We are in business to help our mortgage clients attract, retain and grow their customer relationships...while operating efficiently and profitably.

How We Help Our Clients

- Help them meet evolving customer needs and respond to rapidly changing market requirements
- Provide measurable ROI, including increased sales revenue and decreased costs
- Help them give each customer the best personalized deal possible
- Enable tight integration of the Internet and other client contact channels
- Create audit trails and compliance checks throughout the mortgage process

MindBox® helps mortgage lenders increase loan conversion rates, improve accuracy, and reduce the cost of originating and underwriting conforming and non-conforming loans. We have provided numerous applications for both subprime and conforming mortgage lenders.

MindBox® has delivered systems that cover a wide span of mortgage lending processes. MindBox® systems intelligently automate mortgage loan and insurance underwriting, sales assistance, prequalification, credit grading, compliance verification, terms of business, portfolio management, personalized pricing, deal structuring, cross-selling and best execution. Our systems can be part of an existing LOS infrastructure, contained within a broker portal or be part of any other client contact front end. These systems are implemented using our world class decisioning technology, ARTEnterprise™, and software components - the ARTOptimize Product Suite designed to automate critical steps within the lending process. The systems can be maintained by a business user through the use of the ground-breaking MindBox Power Editor. This editor

Products

ARTPrice™

ARTPrice™ allows lenders to meet customer needs with a price automatically tailored to the individual, while also ensuring compliance with company's pricing policies and bottom line financial goals. It also allows lenders to increase revenue, due to faster processing and improved ability to close initial sales and suggest/push new ones. Finally, ARTPrice™ improves the overall quality of an institution's pricing decisions by integrating the pricing knowledge and practices of the best employees into the system, making that level of performance available for every customer interaction. ARTPrice™ will provide various ways of modeling institution policy for determining price, including table-based pricing, associating credit grades to prices within a product line, and full rule-based implementations of pricing. This risk based pricing ability decreases risk and can provide for better management of loan portfolios for later securitization.

ARTQualify™

ARTQualify™ allows institutions to maximize their revenue potential with a given customer, while also ensuring that they are adhering to risk management policies. ARTQualify™ allows the specification of guidelines governing product availability and selection. The component uses a decision engine to reconcile specific institution guidelines with customer information and requirements to determine that borrower's eligibility for specific products. ARTQualify™ also provides conditions and exclusions regarding the borrower's product eligibility based on institution guidelines. Finally, ARTQualify™ provides a checklist of items required to verify the borrower's statements on the loan application and any additional requirements that may be placed on acceptance of the loan program. This checklist specifies which party is responsible for meeting specific conditions or stipulations.

ARTOptimize™

ARTOptimize™ is a powerful product that automates the process of creating an individually-tailored financial package for a given customer, resulting in automated, complete personalization of every step in the loan origination and underwriting process. Specifically, ARTOptimize™ leverages an institution's data and sophisticated decision technology to complete the following steps:

- Integrates credit data from multiple sources
- Analyzes and acts upon that credit data according to specific company policy
- Provides explanations of credit decisions made and why subsequent actions were taken
- Prices the final product, providing the best possible offer for the specific customer
- Provides a list of conditions that must be met in order for the loan to be granted
- Debt Consolidation Advisor: provides a suggested list of debt consolidation strategies the borrower might take in order to lower costs and create a better debt portfolio
- As part of this debt consolidation scenario, lays the foundation for the cross selling or upselling of other products, specifically, HELOCs and line of credit products
- Includes the MindBox Power Editor, used to maintain the rules in a user friendly, recognizable environment

By integrating the capabilities of all the components in one suite, ARTOptimize™ allows lenders to:

- Meet customer needs with a loan package and price tailored to the individual, while also ensuring compliance with the company's lending policies and bottom line financial goals
- Increase revenue, due to faster processing and improved ability to close initial sales and suggest additional opportunities
- Improve customer service, through more complete explanation of lending decisions and

The MindBox Power Editor

MindBox provides the MindBox Power Editor with each of the components. The MindBox Power Editor is a multi-level editing application that allows business users to modify or update automated business policies. It also allows the business user to define the hierarchy and organization of rules in the system, ensuring that the system follows the business practices required. Empowering business users with the ability to maintain and develop business rules for an automated system has been an elusive challenge. Many companies have attempted to create rule editors that use a natural language approach. These editors are at first glance appealing; however, they fail to scale and therefore are not practical for commercial applications. MindBox's Power Editor has taken the approach of creating an editor that manages rules through an intuitive graphical user interface that is designed to use the paradigm and language with which the business user is familiar. In addition, the MindBox Power Editor accomplishes this functionality in a user-friendly environment that is scalable and does not sacrifice performance.
