ASSIGNMENT OF PATENTS AND TRADEMARKS

THIS ASSIGNMENT OF PATENTS AND TRADEMARKS ("Assignment") is made and entered into as of June 30, 2006 ("Effective Date") by and between Lang Manufacturing Company ("Assignor"), a Washington corporation, and Star Manufacturing International, Inc. a Delaware corporation ("Assignee").

RECITALS:

A. Assignor owns all rights, title and interest to the patents and patent applications (collectively "Patents") identified in Schedule A hereto (collectively "Patents"), and all rights, title and interest to the trademarks and trademark applications identified in Schedule B hereto ("Trademarks").

B. Assignor and Assignee are entering into a Asset Purchase Agreement concurrently with this Assignment, which provides, among other things, for the acquisition of the Patents and Trademarks by Assignee.

NOW, THEREFORE, for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged:

1. Assignor hereby assigns, grants, sells, conveys and otherwise transfers to Assignee, all right, title, interest and benefits now or hereafter existing in and to the Patents and the Trademarks, together with the goodwill of the business symbolized by and associated with the Trademarks, the trade dress associated with the Trademarks, and all rights to damages and profits, due or accrued, arising out of past, present and future infringements of any of the Patents and the Trademarks, and the right to sue and recover for the same.

2. This Assignment hereby includes the transfer by Assignor to Assignee of any and all patents that claim priority to the Patents or any of them, and any patent applications that claim priority to the Patents or any of them, regardless of country or formal name, and all divisionals, reissues, provisionals, continuations, continuations-in-part (excluding material therein not entitled to claim priority to the Patents), renewals, re-examinations, and extensions thereof.

3. Assignor further agrees to execute any and all powers of attorney and similar instruments, applications, assignments, declarations, affidavits and any other documents in connection therewith necessary to perfect in Assignee, its successors, assigns and legal representatives, all right, title and interest to the Patents and Trademarks conveyed by this Assignment. All such documentation shall be completed as reasonably requested by Assignee, but without additional compensation to Assignor.

4. This Assignment shall be binding upon and inure to the benefit of Assignor and Assignee and their respective heirs, executors, administrators, successors, and assigns.

5. This Assignment shall be construed, interpreted and the rights of parties determined in accordance with the laws of the State of California without giving effect to any principles that would require the application of the laws of a different jurisdiction.

6. Nothing herein shall be construed as a warranty or representation of any kind with respect to any of the Patents and Trademarks; rather, such issues shall be determined as provided by the said Asset Purchase Agreement.
