**PROPRIETARY RIGHTS ASSIGNMENT**

This Proprietary Rights Assignment (this "Assignment") is effective as of November 30, 2005 (the "Effective Date") by and between nStor Corporation, Inc., being a corporation incorporated under the laws of Delaware ("Assignor" or "Company"), and Xyratex Ltd (company number: 31989), a company registered in Bermuda ("Assignee").

WHEREAS, Assignor has agreed to assign and transfer to Assignee certain intellectual property and intellectual property rights;

WHEREAS, in order to effect the assignment and transfer of such intellectual property and intellectual property rights, Assignee has requested that Assignor execute and deliver to Assignee this Assignment;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged:

1. Subject to the terms of this Assignment, in consideration of Assignee's payment to Assignor in the amount of twenty eight million five hundred thousand dollars (US\$ 28,500,000.00), Assignor agrees to and hereby does irrevocably assign, sell, transfer, grant and convey to Assignee, its successors and assigns, all of Assignor's worldwide right, title and interest in and to the following:

(a) All Patents listed in Exhibit A hereto;

(b) All Trademarks and URL or Domain Names listed in Exhibit B;

(c) All Software and proprietary materials listed in Exhibit C;

(d) All records, files and invoices, including but not limited to, all production data, prosecution files, reference catalogs and any other records and data, or exact duplicates thereof, relating to the Patents;

(e) To the extent not specifically identified in subsections (a) through (c) above, all Intellectual Property owned by Assignor. For avoidance of doubt, such Intellectual Property includes the Patents, Trade Secrets, Trademarks, Copyrights (registered and unregistered), the Company Owned Materials and all other Intellectual Property that is currently under development or that was used in the operation of the Assignor's businesses as conducted as of the Effective Date of this Assignment; and

(f) All causes of action, demands, judgments, claims (including insurance claims), indemnity rights, rights to set-off against third parties or other similar rights of Assignor relating to the Intellectual Property owned or used by Assignor.

2. Assignor authorizes and requests the United States Patent and Trademark Office and/or head of any foreign patent office or governmental agency or bureau that requires or authorizes registration of Intellectual Property, to issue all registrations of Intellectual Property to Assignee, its successors and assigns, in accordance with this Assignment.

3. Assignor shall, upon the request of Assignee, reasonably cooperate with and assist Assignee in filing and perfecting all registrations to which Assignee is entitled with respect to the Intellectual Property, including (a) any and all United States and foreign patents and patent applications, as well as any and all utility models, provisionals, divisionals, continuations, continuations-in-part and extensions related to the foregoing; (b) any and all statutory intellectual property rights relating to the foregoing, including, without limitation, any reissues, renewals, re-examinations, extensions or additions of, or counterparts to, any of the foregoing, whether of the United States or any foreign country, which may be granted on or with respect to any of the foregoing; (c) any United States or foreign copyright or trademark registrations; and (d) any other registrations required or permitted by United States or foreign law, rule or regulation to maintain or protect Assignee's proprietary rights in and to the Intellectual Property assigned hereunder. Such assistance shall include, without limitation, executing and delivering all documents in connection with the registrations of the Intellectual Property and that are necessary to give effect to the provisions hereof.

4. In the event that Assignor is unable or unwilling to fully perform its obligations under paragraph 3 above, Assignor hereby irrevocably designates and appoints Assignee or its assigns and their duly authorized officers and agents as Assignor's agents and attorneys-in-fact to act for and on Assignor's behalf and instead of Assignor, to execute and file any registration, application or other document and to do all other lawfully permitted acts in connection with the Intellectual Property.

5. The parties' rights and obligations under this Assignment will bind and inure to the benefit of their respective successors, heirs, executors, and administrators and permitted assigns; provided, however, that Assignor shall not assign this Assignment. Any assignment in violation hereof shall be null and void. This Assignment and all Exhibits hereto constitute the parties' final, exclusive and complete understanding and agreement with respect to the subject matter of this Assignment, and supersede all prior and contemporaneous understandings and agreements relating to its subject matter. This Assignment may not be waived, modified or amended unless mutually agreed upon in writing by the parties. In the event any provision of this Assignment is found to be legally unenforceable, such unenforceability shall not prevent enforcement of any other provision of the Assignment. This Assignment shall for all purposes be governed by and interpreted in accordance with the laws of the State of California, without regard to its choice of law provisions. Any notices required or permitted hereunder shall be given to the appropriate party at the address last provided or as a party may otherwise specified to the other party in writing.
