WHEREAS, Assignor wishes to assign to Assignee, and Assignee wishes to acquire from Assignor, all of the Assignor's rights, title and interest in any and all jurisdictions throughout the world in and to all of the Assignor's intellectual property, including, without limitation, any and all (a) patents, patent applications and patent disclosures, together with all reissuances, continuations, continuations-in-part, revisions, extensions and reexaminations thereof; (b) trademarks, service marks, trade dress, logos, slogans, trade names and domain names together with all good will of the business connected with the use of and symbolized by same, and applications, registrations and renewals in connection therewith and including all common law rights (and for avoidance of doubt, with respect to intent to use applications, together with the business of Assignee, or portion thereof, to which the marks pertain, which business is ongoing and existing); (c) copyrights and copyrightable works of authorship, databases, and applications, registrations and renewals in connection therewith; (d) trade secrets and confidential information (including ideas, research and development, know-how, inventions, formulas, compositions, manufacturing and production processes and techniques, designs, drawings and specifications); (e) copies and tangible embodiments of any of the foregoing in whatever form or medium in Assignor's possession or control; and (f) all other intellectual property created by or for or otherwise owned by Assignor, including without limitation, the items described in Schedule A attached hereto (all of the foregoing collectively hereinafter referred to as the "Intellectual Property").

NOW, THEREFORE, for \$10.00 (US) and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby sells, assigns, transfers and sets over to Assignee its entire right, title and interest in and to the Intellectual Property for the United States and for all foreign countries, including, without limitation, any registrations and applications therefor, any renewals and extensions of the registrations, and all other corresponding rights that are or may be secured under the laws of the United States or any foreign country, now or hereafter in effect, subject to any existing licenses or other rights previously granted by Assignor to third parties with respect thereto, for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns or other legal representatives, at least as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made, together with all income, royalties or payments due or payable as of the Effective Date or thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Intellectual Property, with the right to sue for and collect the same for Assignee's own use and enjoyment and for the use and enjoyment of its successors, assigns or other legal representatives.

Assignor hereby requests the Commissioner of Patents and Trademarks, the Register of Copyrights and the corresponding entity or agency in any applicable foreign country, to record, as applicable, Assignee as the Assignee and owner of the Intellectual Property.

Assignor represents and warrants that: (i) it is the sole and exclusive owner of the entire rights, title and interest in and to the Intellectual Property (including the corresponding rights set forth in the above), free and clear of any liens, security interests or other encumbrances of any kind except for existing licenses or other non-ownership rights previously granted by Assignor to third parties; (ii) it has the full right and authority to execute this Assignment and to assign to Assignee the rights assigned herein; and (iii) it has not executed, and will not execute, any agreement or other instrument in conflict herewith.
