INTELLECTUAL PROPERTY SECURITY AGREEMENT

This Intellectual Property Security Agreement (this "Agreement") is made as of August²⁴, 2008, by and between SIRIFIC WIRELESS ULC (along with its successors and assigns, the "Grantor"), an Alberta, Canada unlimited liability corporation, and ETV CAPITAL SA, a Luxembourg corporation, in its capacity as agent for itself and MMV Finance Inc. under the Loan Agreement (hereinafter defined) ("Secured Party").

RECITALS

A. Pursuant to a Loan and Security Agreement and Supplement of even date herewith (together, the "Loan Agreement") among Grantor, as borrower, and Secured Party, as agent for itself and MMV Finance Inc. as lenders ("Lenders"), Lenders have agreed to make certain advances of money and to extend certain financial accommodations to Grantor (the "Loans") in the amounts and manner set forth in the Loan Agreement. All capitalized terms used herein without definition shall have the meanings ascribed to them in the Loan Agreement.

B. The Loan Agreement grants to Lenders a security interest in substantially all of Grantor's personal property assets (defined therein as the "Collateral"), and is executing this Agreement with respect to certain items of Intellectual Property collateral, in particular.

NOW, THEREFORE, THE PARTIES HERETO AGREE AS FOLLOWS:

1. Grant of Security Interest. As collateral security for the prompt and complete payment and performance of all of Grantor's present or future Obligations, Grantor hereby grants to Secured Party a security interest and mortgage to Secured Party, as security, in and to Grantor's entire right, title and interest in, to and under the following Intellectual Property, now owned or hereafter acquired by Grantor or in which Grantor now holds or hereafter acquires any interest (all of which shall collectively be called the "Collateral" for purposes of this Agreement):

(a) Any and all copyrights, whether registered or unregistered, held pursuant to the laws of the United States, any State thereof or of any other country; all registrations, applications and recordings in the United States Copyright Office or in any similar office or agency of the United States, and State thereof or any other country; all continuations, renewals, or extensions thereof; and any registrations to be issued under any pending applications, including without limitation those set forth on Exhibit A attached hereto (collectively, the "Copyrights");

(b) All letters patent of, or rights corresponding thereto, in the United States or any other country, all registrations and recordings thereof, and all applications for letters patent of, or rights corresponding thereto, in the United States or any other country, including, without limitation, registrations, recordings and applications in the United States Patent and Trademark Office or in any similar office or agency of the United States, any State thereof or any other country; all reissues, continuations, continuations-in-part or extensions thereof; all petty patents, divisionals, and patents of addition; and all patents to be issued under any such applications, including without limitation the patents and patent applications set forth on Exhibit B attached hereto (collectively, the "Patents");

(c) All trademarks, trade names, corporate names, business names, trade styles, service marks, logos, other source or business identifiers, prints and labels on which any of the foregoing have appeared or appear, designs and general intangibles of like nature, now existing or hereafter adopted or acquired, all registrations and recordings thereof, and any applications in connection therewith, including, without limitation, registrations, recordings and applications in the United States Patent and Trademark Office or in any similar office or agency of the United States, any State thereof or any other country or any political subdivision thereof, and reissues,

extensions or renewals thereof, and the entire goodwill of the business of Grantor connected with and symbolized by such trademarks, including without limitation those set forth on Exhibit C attached hereto (collectively, the "Trademarks");

(d) Any and all claims for damages by way of past, present and future infringement of any of the rights included above, with the right, but not the obligation, to sue for and collect such damages for said use or infringement of the intellectual property rights identified above;

(e) All licenses or other rights to use any of the Copyrights, Patents or Trademarks, and all license fees and royalties arising from such use to the extent permitted by such license or rights;

(f) All amendments, renewals and extensions of any of the Copyrights, Trademarks or Patents; and

(g) All proceeds and products of the foregoing, including without limitation all payments under insurance or any indemnity or warranty payable in respect of any of the foregoing.

Notwithstanding the foregoing, the term "Collateral" as used in this Agreement shall not include any contracts, property rights or licenses in which Grantor has any right, title or interest if and to the extent that the creation of a security interest in the right, title or interest of Grantor therein in the manner contemplated by this Agreement would be prohibited by the terms of such contract, property right or license, or by applicable law, or would, in and of itself, cause or result in a default, breach or other violation thereunder enabling another person party to such contract, property rights or licenses to enforce any remedy with respect thereto or give the other person party thereto the right to terminate, accelerate or otherwise adversely alter Grantor's rights, title and interest thereunder (provided that the foregoing exclusion shall not apply if (i) such prohibition has been waived or such person has otherwise consented to the creation hereunder of a security interest in such contract, property rights or licenses or (ii) such prohibition would be rendered ineffective pursuant to Sections 9-407(a) or 9-408(a) of the Uniform Commercial Code, as applicable and as then in effect in any relevant jurisdiction, or any other applicable law (including the federal bankruptcy code) or principles of equity; provided further that immediately upon the ineffectiveness, lapse or termination of any such provision, the Collateral shall include, and Grantor shall be deemed to have granted a security interest in, all its rights, title and interest in and to such contract, property rights or licenses as if such provision had never been in effect; and provided further that the foregoing exclusion shall in no way be construed so as to limit, impair or otherwise affect Lenders' unconditional continuing security interest in and to all rights, title and interests of Grantor in or to any payment obligations or other rights to receive monies due or to become due under any such contract, property rights or licenses and in any such monies and other proceeds of such contract, property rights or licenses).

2. Covenants and Warranties. Grantor represents, warrants, covenants and agrees as follows:

(a) Grantor is now the sole owner of the Collateral, except for Permitted Liens and exclusive or non-exclusive licenses or sublicenses granted by Grantor in the ordinary course of business;

(b) During the term of this Agreement, Grantor will not transfer or otherwise encumber any interest in the Collateral, except for licenses or sublicenses granted by Grantor in the ordinary course of business consistent with industry practice or as otherwise permitted in the Loan Agreement;

(c) Grantor shall deliver to Secured Party within thirty (30) days of the last day of each fiscal quarter in which there is a change or update to the reported contents from the previous fiscal quarter, a report signed by Grantor, in form reasonably acceptable to Secured Party, listing any applications or registrations that Grantor has made or filed in respect of any patents, copyrights or trademarks and the status of any outstanding applications or registrations. Grantor shall promptly advise Secured Party of any

material change in the composition of the Collateral, including but not limited to any subsequent ownership right of the Grantor in or to any Trademark, Patent or Copyright not specified in this Agreement;

(d) Subject, in each case, to Grantor's commercially reasonable judgment that such action is not reasonably required to protect its own business interests, Grantor shall use reasonable commercial efforts to (i) protect, defend and maintain the validity and enforceability of the Trademarks, Patents and Copyrights material to its business, (ii) detect infringements of such Trademarks, Patents and Copyrights and promptly advise Secured Party in writing of material infringements detected, and (iii) not allow any material Trademarks, Patents or Copyrights to be abandoned, forfeited or dedicated to the public without the written consent of Secured Party, which consent shall not be unreasonably withheld;

(e) Grantor shall apply for registration (to the extent not already registered) with the United States Patent and Trademark Office or the United States Copyright Office, as applicable: (i) those intellectual property rights listed on Exhibits A, B and C hereto within thirty (30) days of the date of this Agreement; and (ii) those additional intellectual property rights developed or acquired by Grantor from time to time in connection with any product or service, prior to the sale or licensing of such product or the rendering of such service to any third party (including without limitation revisions or additions to the intellectual property rights listed on such Exhibits A, B and C), except, in each case, with respect to such rights that Grantor determines in its sole, good faith commercial judgment need not be registered to protect its own business interests. Subject to the commercial judgment *proviso* set forth in the preceding sentence, Grantor shall, from time to time, execute and file such other instruments, and take such further actions as Secured Party may reasonably request from time to time to perfect or continue the perfection of Secured Party's interest in the Collateral. Grantor shall give Secured Party notice of all such applications or registrations; and

(f) Except as otherwise permitted under the Loan Agreement, Grantor shall not enter into any agreement that would reasonably be expected to materially impair or conflict with Grantor's obligations hereunder without Secured Party's prior written consent, which consent shall not be unreasonably withheld or delayed. Grantor shall use its commercially reasonable efforts to not permit the inclusion in any material contract to which it becomes a party of any provisions that would or would reasonably be expected in any way prevent the creation of a security interest in Grantor's rights and interests in any property included within the definition of the Collateral acquired under such contracts.

3. Further Assurances; Attorney in Fact.

(a) On a continuing basis, Grantor will, subject to any prior licenses, encumbrances, restrictions and Permitted Liens, make, execute, acknowledge and deliver, and file and record in the proper filing and recording places in the United States, all such instruments, including appropriate financing and continuation statements and collateral agreements and filings with the United States Patent and Trademark Office and the Register of Copyrights, and take all such action as may reasonably be deemed necessary or advisable, or as reasonably requested by Secured Party, to perfect Secured Party's security interest in all Copyrights, Patents and Trademarks and otherwise to carry out the intent and purposes of this Agreement, or for assuring and confirming to Secured Party the grant or perfection of a security interest in all Collateral.

(b) Grantor hereby irrevocably appoints Secured Party as Grantor's attorney-in-fact, with full authority in the place and stead of Grantor and in the name of Grantor, from time to time in Secured Party's discretion, to take any action and to execute any instrument which Secured Party reasonably deems necessary or advisable solely (i) to modify Exhibits A, B and C, hereof, as appropriate, of this Agreement without first obtaining Grantor's approval of or signature to such modification to include reference to any right, title or interest in any Copyrights, Patents or Trademarks acquired by Grantor after the execution hereof or to delete any reference to any right, title or interest in any Copyrights, Patents or Trademarks in which Grantor no longer has or claims any right, title or interest, (ii) to file, in its sole discretion, one or more financing or continuation statements and amendments

thereto, relative to any of the Collateral without the signature of Grantor where permitted by law, and (iii) only after the occurrence and during the continuance of an Event of Default, to transfer the Collateral into the name of Secured Party or a third party to the extent permitted under the California Uniform Commercial Code (or similar law in any other applicable jurisdiction).

(c) Secured Party agrees that it shall release its Lien on the Collateral (as such term is defined herein) on the terms and conditions set forth in the Supplement and to execute and deliver, at Grantor's sole cost and expense, all documents and instruments necessary to effectuate such release.

4. Events of Default. The occurrence of any of the following shall constitute an Event of Default under this Agreement:

(a) An Event of Default under the Loan Agreement; or

(b) Grantor breaches any warranty or agreement made by Grantor in this Agreement and, as to any breach that is capable of cure, Grantor fails to cure such breach within thirty (30) days of the sooner to occur of Grantor's receipt of notice of such breach from Secured Party or the date on which such breach first becomes known to Grantor.

5. Amendments. This Agreement may be amended only by a written instrument signed by both parties hereto, except for amendments to Exhibits A, B, and C as permitted under Section 3 hereof to be made by Secured Party alone.

6. Counterparts. This Agreement may be executed in two or more counterparts, each of which shall be deemed an original but all of which together shall constitute the same instrument.

United States	A tuneable circuit for cancelling third order modulation	2,566,491	Sirific Wireless Corporation	Application Pending
United States	A tuneable circuit for cancelling third order modulation	11/569,021	Sirific Wireless Corporation	Application Pending

Error! Unknown document property name.

Jurisdiction	Title	Patent Number/ Publication No. Patent Application	Proprietor	Status
Japan	A tuneable circuit for cancelling third order modulation	2007-511819 2007-537631	Sirific Wireless Corporation	Application Published
Korea	A tuneable circuit for cancelling third order modulation	2006-7026073	Sirific Wireless Corporation	Application Pending
European Community	A tuneable circuit for cancelling third order modulation	05748731.6 EP1751853	Sirific Wireless Corporation	Application Published
Canada	Dynamic and static spurious correction and control	2,467,201	Sirific Wireless Corporation	Dead
Canada	Method and system for spurious signal control in receivers	2,566,476	Sirific Wireless Corporation	Application Pending
United States	Method and system for spurious signal control in receivers	11/569,031	Sirific Wireless Corporation	Application Pending
United States	Transceiver inteRFace architecture	11/387,925	Sirific Wireless Corporation	Application Pending
PCT	Transceiver inteRFace architecture	WO2007109879 CA2007/000443	Sirific Wireless Corporation	Application Published
United States	Closed-loop digital power control for transmitter	60/871,306	Sirific Wireless Corporation	Dead
PCT	Closed-loop digital power control for a wireless transmitter	WO2008074158 CA2007/002352	Sirific Wireless Corporation	Application Pending
PCT	Digital linear transmitter architecture	WO2008077235 CA2007/002252	Sirific Wireless Corporation	Application Published
PCT	Edge power ramp using logarithmic resistor attenuator	WO2008074147 CA2007/002318	Sirific Wireless Corporation	Application Published
United States	Automatic IIP2 calibration architecture	11/626,964	Sirific Wireless Corporation	Application Pending
PCT	Automatic IIP2 calibration architecture	CA2008/000162	Sirific Wireless Corporation	Application Pending
PCT	Digital charge pump pll architecture	WO2008074129 CA2007/002247	Sirific Wireless Corporation	Application Published

Error! Unknown document property name.

Jurisdiction	Title	Patent Number/ Publication No. Patent Application	Proprietor	Status
PCT	System and method for transceiver control of peripheral components	CA2008/000856	Sirific Wireless Corporation	Application Pending
Undefined	Low supply regulator with high power supply rejection ratio			Drafting
United States	Low supply regulator with high power supply rejection ratio		Sirific Wireless Corporation	Not Yet File
United States	Wireless system having high spectral purity	11/832,960	Sirific Wireless Corporation	Application Pending
Undefined	Real time linearity calibration for WCDMA signal			Drafting
Undefined	Frequency planning and calibration for digital frequency synthesizer			Drafting
Undefined	A passive TX architecture with switch able outputs for wireless application			Drafting
Undefined	Fractional rate pulse shaping			Drafting
Canada	Capacitive leakage control in closed loop applications	2,454,405	Sirific Wireless Corporation	Dead
United States	Method and apparatus for reduced noise band switching circuits	7,167,063 11/018,846	Sirific Wireless Corporation	Granted- Issued
Canada	Method and apparatus for reduced noise band switching circuits	2,550,284	Sirific Wireless Corporation	Application Pending
Japan	Method and apparatus for reduced noise band switching circuits	50601186829	Sirific Wireless Corporation	Application Pending
Korea	Method and apparatus for reduced noise band switching circuits	2006-7012551	Sirific Wireless Corporation	Application Pending
China	Method and apparatus for reduced noise band switching circuits	200480038441.5	Sirific Wireless Corporation	Application Pending
European Community	Method and apparatus for reduced noise band switching circuits	04802365.9	Sirific Wireless Corporation	Application Pending
United States	Variable inductor	11/564,980	Sirific Wireless Corporation	Abandoned
United States	Hybrid linear and polar modulation apparatus	11/778,849	Sirific Wireless Corporation	Application Pending
Undefined	Automatic IQ offset using a digital receiver		Sirific Wireless Corporation	Drafting
