ASSIGNMENT OF INTELLECTUAL PROPERTY

This Assignment of Intellectual Property ("Assignment") is entered into as of December 31, 2008, by and between Clarke Legacy Corporation (formerly Amtech Corporation), a Washington corporation having a principal place of business at 180 E. Jones Road, Wapato, WA 98951 ("Assignor") and Amtech, LLC, a Delaware limited liability company having a principal place of business at 180 E. Jones Road, Wapato, WA 98951 (the "Assignee").

Introduction

The Assignor is the sole and exclusive owner of the entire right, title and interest in and to the patents, patent applications and trademark registrations listed on Schedule A hereto (the "Patents and Marks"). Assignee wishes to acquire, and Assignor wishes to assign, all of the Assignor's right, title and interest in and to the Company Intellectual Property (as defined in the Asset Purchase Agreement dated December 31, 2008, by and among the Assignor, the Assignee, Richard Clarke and Composites Consolidation Company, LLC), including without limitation the Patents and Marks and the business and goodwill of the business in connection with which the Patents and Marks have been used.

NOW, THEREFORE, in consideration of the foregoing, and other good and valuable consideration, the receipt and sufficiency of which are hereby mutually acknowledged, Assignor hereby agrees as follows:

1. Assignment. Assignor hereby sells, conveys, assigns, transfers and delivers to Assignee, its successors, legal representatives and assigns, all of the Assignor's right, title and interest in and to the Company Intellectual Property, including without limitation the Patents and Marks, together with the business and goodwill of the business in connection with which the Patents and Marks had been used, and all registrations and applications therefor, in the United States and for all foreign countries, including any divisions, reissues, renewals, continuations, continuations-in-part, improvements and extensions thereof that are or may be secured under the laws of the United States and all foreign countries, now or hereafter in effect, for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by the Assignor if this assignment and sale had not been made, together with the right or priority under any international agreements to which the United States adheres and with all income, royalties or payments due or payable as of the effective date of this assignment or thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Patents and Marks with the right to sue for, and collect the same for Assignee's own use and enjoyment and for the use and enjoyment of its successors, assigns or other legal representatives. Assignor requests the Commissioner of Patents and Trademarks, any other governmental or judicial entity and any and all foreign countries to record Assignee as the assignee and owner of the Patents and Marks.

2. Further Assistance. Assignor shall provide to Assignee, its successors, assigns or other legal representatives, reasonable cooperation and assistance at Assignee's request and expense (including the execution and delivery of any and all affidavits, declarations, oaths, samples, exhibits, specimens and other documentation as may be reasonably required): (a) in the preparation and prosecution of any application for registration or any application for renewal of a registration covering any of the Patents and Marks, (b) in the prosecution or defense of any cancellation, opposition, infringement or other proceedings that may arise in connection with any of the Patents and Marks, including, but not limited to, testifying as to any facts relating to the Patents and Marks assigned herein and this Assignment, (c) in obtaining any additional protection for the Patents and Marks that Assignee reasonably may deem appropriate that may be secured under the laws now or hereafter in effect in the United States or for any or all foreign countries and (d) in the implementation or perfection of this Assignment.

3. Miscellaneous. This Assignment shall be binding upon and inure to the benefit of the parties hereto and to their respective heirs, successors and assigns, and shall be construed and enforced in accordance with the laws of the State of Delaware, without regard to its conflicts of law provisions. This Assignment may be executed in one or more counterparts, each of which shall be deemed an original, but all of which taken together shall constitute one and the same instrument. Delivery of executed signature pages hereof by facsimile transmission shall constitute effective and binding execution and delivery hereof.
