GRANT OF PATENT SECURITY INTEREST

This GRANT OF PATENT SECURITY INTEREST, dated as of April 25, 2007, is entered into by and among Inovys Corporation, a California corporation (the "Grantor"), and the parties listed on attached Schedule A (each a "Lender," and collectively, the "Lenders").

WHEREAS, the Grantor has entered into a Note and Warrant Purchase Agreement, dated as of April 25, 2007 (said Note and Warrant Purchase Agreement, as it may heretofore have been and as it may hereafter be further amended, restated, supplemented or otherwise modified from time to time, being the "Purchase Agreement"), with the Lenders, pursuant to which the Lenders have made certain commitments, subject to the terms and conditions set forth in the Purchase Agreement, to extend certain financial support to the Grantor;

WHEREAS, the Grantor may in the future issue certain additional convertible secured promissory notes (the "Notes" as defined in the Purchase Agreement); and

WHEREAS, pursuant to the terms of a Security and Collateral Agent Agreement, dated as of April 25, 2007 (said Security and Collateral Agent Agreement, as it may heretofore have been and as it may hereafter be further amended, restated, supplemented or otherwise modified from time to time, being the "Security Agreement;" the terms defined therein and not otherwise defined herein being used herein as therein defined), by and among the Grantor and the Lenders named therein, the Grantor has granted to each Lender a security interest in, and continuing lien on, the Patent Collateral (as defined below);

NOW, THEREFORE, for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, subject to the terms and conditions of the Security Agreement, to evidence further the security interest granted by the Grantor to the Lenders pursuant to the Security Agreement, the Grantor hereby grants to each Lender a security interest in all of the Grantor's right, title and interest in and to the following, in each case whether now or hereafter existing, whether now owned or hereafter acquired, and wherever the same may be located (the "Patent Collateral"):

(i) all patents and patent applications and rights and interests in patents and patent applications under any domestic or foreign law that are presently, or in the future may be, owned or held by the Grantor and all patents and patent applications and rights, title and interests in patents and patent applications under any domestic or foreign law that are presently, or in the future may be, owned by the Grantor in whole or in part (including, without limitation, the U.S. patents and U.S. patent applications set forth on Schedule B annexed hereto), all rights (but not obligations) corresponding thereto to sue for past, present and future infringements and all re-issues, divisions, continuations, renewals, extensions and continuations-in-part thereof; and

(ii) all proceeds thereof, such as, by way of example and not by limitation, license royalties and proceeds of infringement suits.

Notwithstanding the foregoing, the Patent Collateral shall not include and the Grantor shall not be deemed to have granted a security interest in any of the Grantor's rights or interests in or under any lease, license, contract, permit, instrument, security, agreement or franchise to which the Grantor is a party or any of its rights or interests thereunder if and for so long as the grant of such security interest would constitute or result in (A) the abandonment, invalidation or unenforceability of any right, title or interest of the Grantor therein or (B) a breach or termination pursuant to the terms of, or a default under, such lease, license, contract, permit, instrument, security, agreement or franchise (other than to the extent that any such term would be rendered ineffective pursuant to Sections 9-406, 9-407, 9-408 or 9-409 of the UCC of any relevant jurisdiction or under any other applicable law (including the Bankruptcy Code) or principles of equity); provided however, that the security interest shall attach immediately at such time as the condition causing such abandonment, invalidation or unenforceability shall be remedied and, to the extent severable, shall attach immediately to any portion of any such lease, license, contract, permit, instrument, security, agreement or franchise that does not result in any of the consequences set forth in subsection (A) or (B) above.

The Grantor does hereby further acknowledge and affirm that the rights and remedies of each Lender with respect to the security interest in the Patent Collateral granted hereby are more fully set forth in the Security Agreement, the terms and provisions of which are incorporated by reference herein as if fully set forth herein.
