INTELLECTUAL PROPERTY INSTRUMENT OF ASSIGNMENT

This Intellectual Property Instrument of Assignment, dated as of April 1, 2010 (this "IP Instrument of Assignment"), is made by and between TrustBearer Labs, LLC, an Indiana limited liability company ("Seller"), and VeriSign, Inc., a Delaware corporation ("Buyer").

PRELIMINARY STATEMENTS

A. Seller and Buyer have entered into an Instrument of Assignment and Assumption, dated as of April 1, 2010 (the "Assignment and Assumption Instrument"), pursuant to which Seller has assigned, transferred, conveyed and delivered to Buyer, its successors and assigns, all right, title and interest in the Purchased Assets (as defined in the Assignment and Assumption Instrument), including without limitation any and all patents and pending patent applications listed on the attached Schedule 1, and all inventions described and claimed therein (including divisionals, continuations-in-part, provisionals, reissues, reexaminations or interferences thereof) (collectively, the "Patents"), and further including all registered United States trademarks, service marks, trade names, Internet domain names, designs, logos, slogans and general intangibles of like nature, whether registered or unregistered, and pending registrations and applications to register the foregoing listed on the attached Schedule 2, and all extensions and renewals of any of the foregoing (collectively, the "Trademarks"), in each case existing on the Closing Date (as defined in the Assignment and Assumption Instrument).

B. Pursuant to the Assignment and Assumption Instrument, Buyer has acquired all right, title and interest in and to the Purchased Assets, including the Patents and the Trademarks, and the parties wish to record such acquisition in the U.S. Patent and Trademark Office.

NOW, THEREFORE, for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. Pursuant to the Assignment and Assumption Instrument, which is incorporated by reference as if fully set forth herein, Seller assigns to Buyer all of Seller's right, title and interest in and to the Patents and the Trademarks including all proceeds therefrom, goodwill associated therewith and the right to bring actions at law or in equity for any infringement, dilution or violation of any of the Patents or the Trademarks occurring prior to the date hereof, and to collect all damages, settlements and proceeds relating to the Patents and the Trademarks.
2. This IP Instrument of Assignment may be executed simultaneously in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.
3. This IP Instrument of Assignment is subject to all the terms and conditions of the Assignment and Assumption Instrument. The parties intend that this IP Instrument of Assignment is for recordation purposes only and its terms shall not modify the applicable terms and conditions of the Assignment and Assumption Instrument.
