INTELLECTUAL PROPERTY ASSIGNMENT

This PATENT ASSIGNMENT (this "Assignment") is entered into as of August 18, 2011 (the "Effective Date"), by and between PROSTOR SYSTEMS, INC., a Delaware corporation (the "Assignor"), and IMATION CORP., a Delaware corporation (the "Assignee" and, collectively with the Assignor, the "Parties").

WHEREAS, pursuant to an Asset Purchase Agreement, dated as of the Effective Date, between the Assignor and the Assignee (the "Asset Purchase Agreement"), the Assignor has conveyed, assigned, transferred, and delivered to the Assignee, and the Assignee has acquired and accepted from the Assignor, all of the Assignor's right, title, and interest in and to the issued patents and patent applications, including all reissues, reexaminations, renewals, divisionals, continuations and continuations-in-part relating thereto, set forth on the attached Schedule A (collectively, the "Patents"); and the corporate names, fictional business names, trade names, registered and unregistered trademarks, service marks, and logos set forth on the attached Schedule B (the "Trademarks"), including all rights under common law relating to each Trademark, the corresponding registrations and applications for each Trademark, and the goodwill appurtenant to each of the foregoing.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which the Parties hereby acknowledge, the Assignor hereby confirms, subject to the terms of the Asset Purchase Agreement, that the Assignor assigns, transfers, and conveys to the Assignee all of the Assignor's right, title, and interest in and to (1) the Patents, including the corresponding applications worldwide for each Patent, (2) the Trademarks, including all rights under common law relating to each Trademark, the corresponding registrations and applications worldwide for each Trademark (including any renewals and extensions of such registrations, now or hereafter in effect), and the goodwill appurtenant to each of the foregoing and (3) all rights to bring an action, whether at law or in equity, for infringement, dilution or misuse (as applicable) of the Patents or the Trademarks against any third party, and all rights against any third party to recover damages, to recover profits, and to secure injunctive relief for all past, present, or future infringement, dilution or misuse (as applicable) of the Patents or the Trademarks.

This Assignment may be executed in multiple counterparts, each of which will be deemed an original, but all of which taken together will constitute one and the same instrument. The Parties authorize one another to detach and combine original signature pages and consolidate them into a single identical original, and any one of such completely executed counterparts will be sufficient proof of this Assignment. Any photographic, photocopy, or similar reproduction copy of this Assignment, or any PDF file of this Assignment, or any copy of this Assignment sent by facsimile transmission, in each case with all signatures reproduced on one or more sets of signature pages, will be considered for all purposes as if it were a manually-executed counterpart of this Assignment.

The internal laws of the State of Colorado (without reference to its rules as to conflict of laws) will govern the interpretation and enforcement of this Assignment.

The term "including" and its variants do not imply any limitation.
