Data Information

This Identical Screening Search reports identical and certain phonetically identical trademarks published for the first time since January 1, 1976 in the trademark bulletins of the countries and jurisdictions covered. In most countries, trademarks published for the first time are new applications published in the Official Gazette for opposition purposes.

Information on renewals or indications about the subsequent fate of the applications retrieved, such as registrations, rejections, withdrawals or partial cancellations is included for registers maintained as Full Text databases by Thomson CompuMark, but is NOT included on other records. We have made every attempt to qualify the Owner, Status, and the Status Date available for those registers which are maintained as Thomson CompuMark Full Text databases*. This supplemental information is intended to provide better context for eligible trademarks.
