Published:	US 2002/0013787 Al
Abstract:	A method for reading information about a specific sample of a particular product or a health care service into a medical information manager system. In a preferred embodiment, information about a specific sample of a medication is used as: 1) part of product sample tracking; 2) included in the health care records for the particular patient receiving the specific sample; and to 3) partially populate a prescription for additional quantities of the particular product provided in the specific sample.

2 Automated sample tracking and generation of corresponding prescription

Inventors: Lloyd Albert;	Pollard, Daniel Lyon; Donatucci, Craig Francis; Hey,
	Hebert, Peter Franklin Jr.
Assignee Name:	Assignments to MDeverywhere, Inc. submitted to Canadian Patent Office on April 14, 2003
Serial No.:	2,343,463
Filing Date:	April 6, 2001
Priority Date:	April 7, 2000
Abstract:	A method for reading information about a specific sample of a particular product or a health care service into a medical information manager system. In a preferred embodiment, information about a specific sample of a medication is used as: 1) part of product sample tracking; 2) included in the health care records for the particular patient receiving the specific sample; and to 3) partially populate a prescription for additional quantities of the particular product provided in the specific sample.

3. Method and apparatus for introducing medical necessity policy into the clinical decision making process at the point of care

Inventors: Pollard, Daniel Lyon; Hebert, Peter Franklin Jr.
Assignee Name: MDeverywhere, Inc.
Serial No.: 116,919
Series Code: 10
Filing Date: April 5, 2002
Priority Date: April 5, 2001
Published: US 2002/0147616 A1
Abstract:

A handheld device, such as a personal digital assistant ("PDA"), can be used at the point-of-care to find an appropriate pair of diagnosis code and procedure code for use in writing an order for further medical procedures for a particular patient. The choice of diagnosis code and procedure code can be checked for conformance with the requirements set forth in a particular set of medical necessity policy rules. In a preferred embodiment, the codes and rules are aggregated by medical specialty so that a specialist can work with solely those codes and rules that are relevant to that particular medical specialty. This abstract is provided as a tool for those searching for patents, and not as a limitation on the scope of the claims.
