GENERAL ASSIGNMENT OF ASSETS

Leucadia, Inc., a New York corporation ("Assignor"), does hereby grant, bargain, convey, transfer and assign, as of February 1, 2005 (the "Effective Date"), unto Conwed Plastics LLC, a Delaware limited liability company ("Assignee"), its wholly owned subsidiary, all of Assignor's right, title and interest in and to those assets described on the exhibits attached hereto ("Conwed Assigned Assets"), whether real, personal or mixed, tangible or intangible, absolute or contingent, and wherever situated, as well as all liabilities, obligations and commitments relating to the Conwed Purchased Assets (the "Liabilities").

Assignor hereby agrees to assign to Assignee, and Assignee hereby agrees to accept from Assignor, under this General Asset Assignment ("Assignment"), the Patents, Marks, Tangible Personal Property and Leases (as defined below).

For and in consideration of all of the membership interest of Assignee, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby agrees to assign, and does hereby assign, the following:

1. Assignment. Assignor does hereby grant, bargain, convey, transfer, assign and set over to Assignee

(a) all of Assignor's rights, title and interests in, to and under the patents described on Exhibit A (the "Patents") and the inventions covered thereby, and divisionals, continuations-in-part (if any), continuations thereof (if any), extensions, refiles, renewals, substitutions, reexaminations and reissues thereof, together with all past, present, or future claims arising out of any infringement thereof, and all rights to claim priority on the basis of the Patents which may hereafter be filed for these Patents and/or the inventions covered thereby in any foreign country and all Letters Patent which may be granted on these Patents and/or the inventions covered thereby in any foreign country, and all divisionals, continuations-in-part (if any), continuations thereof (if any), extensions, refiles, renewals, substitutions, reexaminations and reissues thereof, all such rights to be held and enjoyed by Assignee, for its own use and benefit and for the use and benefit of its successors, assigns or other legal representatives;

(b) all of Assignor's right, title and interest in, to and under the Trademark Registrations shown on the attached Exhibit B (the "Marks") and registrations, together with the goodwill of the business symbolized by the Marks, together with all rights and privileges granted and secured thereby, including the right to sue and recover for any past infringement, said rights to be held and enjoyed by said Assignee, for its own use and benefit and for the use and benefit of its successors, assigns or other legal representatives;

(c) all machinery, equipment, tools, furniture, fixtures, equipment, inventory, computer hardware, supplies, materials, dies, jigs, molds, patterns, tools, leasehold improvements and construction-in-process, trucks, automobiles, other vehicles and transportation equipment, computing and telecommunications equipment and other items of tangible personal property, of every kind owned or leased by Assignor and used by

Assignee (wherever located and whether or not carried on Assignor's books), together with any express or implied warranty by the manufacturers or sellers or lessors of any item or component part thereof, and all maintenance records and other documents relating thereto (collectively, the "Tangible Personal Property"), and all manufacturers' and suppliers' warranties or guarantees with respect thereto, including, without limitation, the Tangible Personal Property, shown on the attached Exhibit C; and

(c) all of Assignor's right, title and interest in, to and under the leasehold interests in the real property leases shown on the attached Exhibit D (the "Leases"), provided, however, that nothing herein is intended to convey or transfer to Assignee the fee title interest to any real estate.

Assignor will hereafter execute and deliver such further assignments, instruments of transfer, bills of sale, certificates of title, powers of attorney or conveyances and perform such other acts, as may be necessary or desirable fully to vest in Assignee title to and enjoyment of the Conwed Assigned Assets.

2. Assumption. Assignee, for itself and its successors and assigns, hereby accepts the foregoing assignment and assumes and agrees to be bound by and to pay, perform, observe and discharge all of the covenants, agreements, duties, responsibilities and obligations of Assignor arising with respect to such Conwed Assigned Assets from and after the Effective Date of this Assignment.

3. No Representations and Warranties. The foregoing assignment is made without representations or warranty.

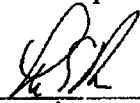

4. Counterparts. This Assignment may be executed in counterparts, each of which shall be an original and all of which counterparts taken together shall constitute one and the same agreement.

[Signatures on following page]

IN WITNESS WHEREOF, Assignor and Assignee have caused this General Assignment to be executed by its officer thereunto duly authorized on this 21st day of July, 2005.

**EXHIBIT A
PATENTS**

Vidas	C09.3-3751-MX01	2/15/1993	Bicomponent Elastomeric Netting	Mexico	201652	2/26/1993	5/2/2001	2/26/2013	93-1095	Hans Oscar Cedarblad/Jan Seppala	A bicomponent netting with uni-directional elasticity. A product patent. Failure to file proof of working or a valid excuse for non-working will open this case for compulsory licensing. A patent will lapse if not worked by the patentee two years after the first compulsory license is granted. Importation of the patented product or of a product made by the patented process is sufficient to prevent a compulsory license. A statement justifying the "non-working" status of this patent filed 5/1/04. The statement appears to have been accepted.
Vidas	C09.3D-3751-EP01	8/12/1994	Bicomponent Elastomeric Netting	EPO	627986	8/22/1994	9/30/1998	2/28/2012	92909743.4	Hans Oscar Cedarblad, Jan Seppala	A bicomponent netting with uni-directional elasticity. A product patent. An opposition was filed by Procter & Gamble - Germany on 6/23/99. We filed a response (a "counterstatement") on 1/31/00. An oral proceeding was scheduled for 5/31/01, but canceled. Our British associate expects that the hearing will be rescheduled or that the opposition will be rejected and the cancellation of the hearing confirmed. Opposition rejected 2/20/02. Opponents have two months to appeal. No appeal made. Patent irrevocably maintained (7/10/02).
Vidas	C09.2I-3751-US01	8/12/1994	Bicomponent Elastomeric Netting	USA	6391420	2/28/1992	5/21/2002	5/21/2019	08/295635	Hans O. Cedarblad, Jan Seppala	A bicomponent netting with uni-directional elasticity. A product patent.
Vidas	C09.2B-5805-US01	2/8/1996	Bicomponent Elastomeric Netting	USA	5885686	7/19/1996	3/23/1999	8/26/2014	08/684415	Hans O. Cedarblad, Jan D. Seppala	A bicomponent netting with bi-directional elasticity. A product patent.

Vidas	C09.3D-5693-EP01	1/11/1999	Extruded Netting Exhibiting Stretch and Bonding	EPO	EP 0915751 B1	7/22/1997	4/6/2003	7/22/2017	97935042.8	Hans O. Cederblad, Mark W. Lorensen	A bicomponent netting having LMP and HMP strands (article). The above netting bonded to a fabric (article and article-by-method). LMP strands being inelastic; HMP strands elastic. A product-by-process, and process/method patent. Also included: Elastic netting with "stop", and a low MD strength composite. "Fiber formed netting". P&G - Europe filed an opposition on 3/4/04. Attempts during spring and summer of 2004 to contact P&G to settle this opposition out-of-court has largely failed. Applied and received a 2-month extension, moving the opposition response due date to 11/4/04. Filed our response on 11/4/04. At the same time, sent letter to P&G - Europe informing of a P&G breach of a 1992 CDA. As a resolution, we proposed receiving a royalty-free license for corresponding P&G European patent in exchange for their withdrawal of the patent opposition. Requested response from P&G within two weeks. Awaiting EPO Office Action. Awaiting P&G response.
Vidas	C09.2Q-5693-US02	7/28/2000	EXTRUDED NETTING EXHIBITING STRETCH AND BONDING	USA	6692606	7/28/2000	2/17/2004	8/26/2014	09/629638	Hans Cederblad, Mark William Lorensen	The method of fabricating a composite fabric including a netting with LMP and HMP strands, the HMP strands being elastic and the LMP being heat sealable. The net and fabric composite is subsequently bonded using heat and pressure. A method patent.
Vidas	C09.2B-5693-US01	8/22/1995	Extruded Netting Exhibiting Stretch And Bonding (Procter & Gamble has an interest in this application)	USA	6204207	8/1/1996	3/20/2001	8/26/2014	08/886187	Hans O. Cederblad, Mark W. Lorensen	A bicomponent netting having LMP and HMP strands (article). The above netting bonded to a fabric (article and article-by-method). LMP strands being inelastic; HMP strands elastic. A product-by-method patent. "Fiber formed netting". The claims of Procter & Gamble U.S. patents 6,074,505 and U.S. 6,093,663 overlap those of this patent. We have so far decided not to challenge the P&G patents through an interference proceeding. We believe we have the earlier conception date. P&G has also breached a 1992 CDA. See corresponding situation for patent EP 0 915 751.

Vidas	C09.2-6534-US01	1/6/1997	Method and Apparatus for Installing, Retrieving and Reusing Protective Coverings for Plants, Vines and Trees (Birdnet)	USA	5956923	11/17/1997	9/28/1999	11/17/2017	08/972003	Matt Andros	Version One of the "Netmaster" cropcover apparatus, and a method of dispersing protective covering material onto a row of crops. An apparatus patent and process/method patent. Patent violation by Robert Blake Welding was stopped in 2000 by his signing of an "undertaking" agreement (he will not make, sell, or use machines in accordance with this patent). Wildlife Technology has received our permission to continue their own prosecution.
Vidas	C09.26-7047-US01	5/15/1998	PACKAGING ASSEMBLY	USA	6145658	3/25/1999	11/14/2000	3/25/2019	09/276313	Charles Worhof, Dan Donohoe	A box having two side-by-side compartments, made from a tray and two cover portions. The Corwed box is used to package sheeted mattress netting insulators. This patent covers the box claims only. Method and kit claims are included in a CIP application, currently being prosecuted. A product patent. UNP has been notified of our patent position. Their box is not similar to ours (Dan Donohoe 4/27/01)
Vidas	C09.2-1433-US01	8/5/1986	Plastic Net Composed Of Coextruded Composite Strands.	USA	4755247	8/11/1986	7/5/1988	7/5/2005	06/895433	Richard C Mudge	Method of manufacturing a co-extruded netting (such as Thermanet®). Each strand is comprised of a plastic core of a first polymer sandwiched between layers of another polymer, all of which are co-extruded. A process/method patent.
Vidas	C09.26-5699-US01	8/22/1995	Stretch Modified Elastomeric Netting	USA	6280676	9/25/1995	8/28/2001	9/25/2015	09/924103	Hans O. Cederblad	The method of modifying elastic properties of extruded elastic netting by stretch modifying (orienting) the strands to the desired end product. Hysteresis performance data is used to determine the specific stretch conditions required to achieve the desired end product. A method and design method patent.
