INTELLECTUAL PROPERTY SECURITY AGREEMENT

This INTELLECTUAL PROPERTY SECURITY AGREEMENT ("*IP Security Agreement*"), dated as of December 11, 2013, is made by the parties listed on the signature pages hereof (collectively, the "*Grantors*") in favor of PNC BANK, NATIONAL ASSOCIATION, a national banking association ("*PNC*"), as agent (PNC in such capacity, the "*Agent*") for the secured parties under the Loan and Security Agreement referred to below (the "*Secured Parties*").

TECUMSEH PRODUCTS COMPANY, a corporation organized under the laws of the State of Michigan ("*Tecumseh Products*"), TECUMSEH COMPRESSOR COMPANY, a corporation organized under the laws of the State of Delaware ("*Tecumseh Compressor*"), TECUMSEH PRODUCTS OF CANADA, LIMITED, a Canadian corporation ("*Tecumseh Products Canada*"), and EVERGY, INC., a corporation organized under the laws of the State of Delaware ("*Evergy*") (Tecumseh Products, Tecumseh Compressor, Tecumseh Products Canada, and Evergy are each a "*Borrower*", and collectively "*Borrowers*") have entered into a Revolving Credit and Security Agreement dated as of April 21, 2011, as amended by Amendment No. 1 to Revolving Credit and Security Agreement dated December 30, 2011, as amended by Amendment No. 2 to Revolving Credit and Security Agreement dated November 6, 2013, and Amendment No. 3 to Revolving Credit and Security Agreement dated of approximate even date herewith (as amended, the "*Loan and Security Agreement*"), with the Agent and lenders (the "*Lenders*") party thereto.

Under the terms of the Loan and Security Agreement, the Grantors have granted to the Agent, for the benefit of the Secured Parties, a security interest in, among other property, certain intellectual property of the Grantors, and have agreed to execute and deliver this IP Security Agreement, for recording with national, federal, state, and foreign government authorities including but not limited to, with respect to individual patents, registered trademarks and registered copyrights, and applications for the foregoing, recording with the United States Patent and Trademark Office and the United States Copyright Office.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, each Grantor agrees as follows:

1. Grant of Security. Each Grantor hereby grants to the Agent for the benefit of the Secured Parties a security interest in all of such Grantor's right, title and interest in and to the following (the "*IP Collateral*"):

1.1 The patents and patent applications set forth in Schedule 1 hereto and all reissues, divisions, continuations, continuations-in-part, extensions and reexaminations thereof (the "*Patents*");

1.2 The trademark registrations and applications set forth in Schedule 2 hereto, together with the goodwill symbolized thereby and all extensions and renewals thereof (the "*Trademarks*"), excluding only United States intent-to-use trademark applications to the extent that and solely during the period in which the grant of a security interest therein would impair,

under applicable federal law, the registrability of such applications or the validity or enforceability of registrations issuing from such applications;

1.3 All copyrights, whether registered or unregistered, now owned or hereafter acquired by such Grantor, including but not limited to the copyright registrations, applications and exclusive copyright licenses set forth in Schedule 3 hereto, and all extensions and renewals thereof (the "*Copyrights*");

1.4 All rights of any kind whatsoever of such Grantor accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions and otherwise throughout the world;

1.5 Any and all royalties, fees, income, payments and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and

1.6 Any and all claims, with respect to any of the foregoing, for damages and injunctive relief for past, present and future infringement, dilution, misappropriation, violation, misuse, breach or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

2. Recordation. Each Grantor authorizes the Commissioner for Patents, the Commissioner for Trademarks and the Register of Copyrights and any other government officials, foreign or domestic, to record and register this IP Security Agreement upon request by the Agent. Upon Agent's request, each Grantor agrees to execute and deliver any and all documents and instruments reasonably necessary or advisable to record (including recording with domestic or foreign governmental authorities or officials) or preserve Agent's interest in all IP Collateral.

3. New or Newly Identified IP Collateral. If any Grantor (i) becomes aware of any existing IP Collateral of which any Grantor has not previously informed Agent, (ii) obtains rights to any new patentable inventions or other IP Collateral, or (iii) becomes entitled to the benefit of any IP Collateral which benefit is not in existence on the date hereof, the provisions of this IP Security Agreement shall automatically apply thereto and such Grantor must give to Agent prompt written notice thereof. Each Grantor hereby authorizes Agent to modify this IP Security Agreement by amending Schedules 1, 2, and 3, as applicable, to include any such IP Collateral, and to request the Commissioner for Patents, the Commissioner for Trademarks, the Register of Copyrights, and any other government officials (domestic or foreign) to record and register or re-record or re-register this IP Security Agreement. Upon Agent's request, each Grantor agrees to execute and deliver any and all documents and instruments reasonably necessary or advisable to record or preserve Agent's interest in all IP Collateral added to Schedules 1, 2, and 3 pursuant to this Section.

4. Loan Documents. This IP Security Agreement has been entered into pursuant to and in conjunction with the Loan and Security Agreement, which is hereby incorporated by reference. The provisions of the Loan and Security Agreement shall supersede and control over any conflicting or inconsistent provision herein. The rights and remedies of the Agent with respect to the IP Collateral are as provided by the Loan and Security Agreement, and related documents, and nothing in this IP Security Agreement shall be deemed to limit such rights and remedies.

5. Execution in Counterparts. This IP Security Agreement may be executed in counterparts (and by different parties hereto in different counterparts), each of which shall constitute an original, but all of which when taken together shall constitute a single contract. Delivery of an executed counterpart of a signature page to this IP Security Agreement by telecopy shall be effective as delivery of a manually executed counterpart of this IP Security Agreement.

6. Governing Law. This IP Security Agreement shall be governed by and construed in accordance with the laws of Michigan.
