INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

This Intellectual Property Assignment Agreement (this "Assignment") is made as of this 6th day of February, 2014, by and between Immediate Response Technologies, Inc., a Maryland corporation ("Assignor") and Immediate Response Technologies, LLC, a Delaware limited liability company ("Assignee").

This Assignment is made pursuant to that certain Asset Purchase Agreement (the "Purchase Agreement"), dated as of the date hereof, by and between Assignor and Assignee, concerning the sale and purchase of substantially all of the assets of the Business. Capitalized terms used but not defined in this Assignment shall have the meanings ascribed to them in the Purchase Agreement.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and in further consideration of the mutual covenants and agreements contained in the Purchase Agreement, and pursuant to the terms of the Purchase Agreement, Assignor hereby sells, assigns, conveys, transfers and delivers to Assignee, its successors, legal representatives and assigns, the entire right, title and interest in and to the Seller Intellectual Property, in the United States and all countries throughout the world, including but not limited to the trademark registrations, domain names and patents and patent applications set forth on the Schedule hereto, together with and all inventions described therein and all prior patent applications filed thereon and all non-provisional applications for patent that are converted from or claim priority to said applications, and in and to any and all direct and indirect divisions, continuations and continuations-in-part of said applications, and any and all patents in the United States and all foreign countries which may be granted therefor and thereon, and reissues, reexaminations, other rights from administrative proceedings and extensions of said patents, and all rights under the International Convention for the Protection of Industrial Property including all rights of priority, and all revisions thereof, to the full end of the term or terms for which the foregoing may be granted, renewed and/or extended, any and all rights of recovery based on past and future infringement of the Seller Intellectual Property and the goodwill symbolized by the trademarks and service marks included in the Seller Intellectual Property, free and clear of all liens, restrictions, leases, security interests, claims, charges or encumbrances whatsoever.

This Assignment is intended to evidence the consummation of the transactions contemplated by the Purchase Agreement and is subject to the terms and conditions set forth in the Purchase Agreement. Nothing contained in this Assignment shall be construed to supersede, limit, qualify or otherwise modify any provision of the Purchase Agreement.

This Assignment shall be governed by the laws of the State of Delaware applicable therein without giving effect to any choice or conflict of law provision or rule (whether of the State of Delaware or any other jurisdiction) that would cause the application of laws of any jurisdiction other than those of the State of Delaware.

This Assignment may be executed in one or more counterparts, each of which shall be deemed an original but all of which together shall constitute one and the same instrument.
