**FILING OF RELEASE OF  
GRANT OF SECURITY INTEREST**

**August 27, 2014**

**WHEREAS**, Power Analytics Corporation., a Delaware corporation (the "Pledgor") is the owner of certain intellectual property;

**WHEREAS**, the Pledgor issued a Secured Bridge Loan Note dated as of August 6, 2010, as amended to date (the "Secured Note"), in favor of DP Three LLC (the "Lender"), which, among other things, contained provisions that granted a security interest in all of the personal property of the Pledgor, including the intellectual property, to the Lender (the "Security Interests");

**WHEREAS**, in February 2012, the Lender filed documentation with the United States Patent and Trademark Office perfecting the Security Interests in certain of the patents and trademarks owned by the Pledgor, including, but not limited to those detailed on Exhibit A;

**WHEREAS**, effective August 17, 2013, the Secured Note was cancelled, effectively releasing and relinquishing the Security Interests held by the Lender; and

**WHEREAS**, at the time the Security Interests were released and relinquished, the Lender did not file releases of the Security Interests with the United States Patent and Trademark and thus did not, at that time, clear the evidence of perfection of the Security Interests from the applicable record and the Lender now wishes to file such documentation and clear the record.

**NOW, THEREFORE**, the Lender does authorize the filing of documentation with the United States Patent and Trademark Office that will clear the evidence of perfection of the Security Interests from the applicable record.

[SIGNATURE PAGE FOLLOWS]

IN WITNESS WHEREOF, the undersigned has executed this Filing of Release of Grant of Security Interests as of the date first set forth above.

**DP THREE LLC**

## Goods and Services

### Class 9

Generally, Class 9 goods are computer software for use with on-line predictive protector for electrical power systems; computer software for analyzing disturbances in power systems; Computer software for use as online real time health monitoring and predictive control of electrical power systems; Computer software for real-time monitoring, analysis and predictive control of electrical power distribution system infrastructures for mission critical facilities, such as submarines and airports, to ensure uninterrupted operations of said infrastructures and the critical processes they support; Computer software for the design, monitoring, analysis, modeling and predictive control of electrical power distribution system infrastructure extending to on-premise and/or public power grids; Computer software for real-time monitoring, analysis and predictive control of electrical power distribution system infrastructures for micro grids, smart grids, and mission critical facilities such as data centers, network operations centers, transportation systems, commercial and specialized facilities, such as hospitals, casinos, water treatment plants, and oil/gas/petrochemical exploration and refining operations, military and national security facilities, public infrastructure, pharmaceutical production, and electrical generation and transmission systems to ensure uninterrupted operations of said infrastructures and the critical processes they support.

### Class 39

Technical consulting services in the field of electrical power distribution.

### Class 41

Training services in the field of electrical power distribution systems infrastructures.

### Class 42

Engineering consulting services in the fields of electrical power distribution system infrastructures for micro grids, smart grids, and mission critical facilities; technical consulting, analysis, design, and engineering in the field of electrical power distribution systems infrastructures; computer software design; technical support services, namely, troubleshooting in the nature of diagnosing computer hardware and software problems in the field of electrical power distribution systems infrastructures; technological consulting services in file conversion.
