INTELLECTUAL PROPERTY SECURITY AGREEMENT

THIS INTELLECTUAL PROPERTY SECURITY AGREEMENT is entered into as of November 26, 2014 by and between Net Power and Light, Inc., a Delaware corporation ("**Grantor**") and the secured parties listed on the signature page hereof (the "**Secured Parties**").

RECITALS

A. Secured Parties have made and may in the future make certain advances of money to Grantor (the "**Loans**") in the amounts and manner set forth in those certain secured convertible promissory notes executed by Grantor in favor of Secured Parties (collectively, as the same may be amended, modified or supplemented from time to time, the "**Notes**"). Secured Parties are willing to make the Loans to Grantor, but only upon the condition, among others, that Grantor shall grant to Secured Parties a security interest in certain Copyrights, Trademarks and Patents to secure the obligations of Grantor under the Notes.

B. Pursuant to the terms of that certain Security Agreement, dated of even date herewith, by and between Grantor and Secured Parties (as the same may be amended, modified or supplemented from time to time, the "**Security Agreement**"), Grantor has granted to Secured Parties a security interest in all of Grantor's right, title and interest in, to or under all of the Grantor's assets. All capitalized terms used but not otherwise defined herein shall have the respective meanings assigned to them in the Security Agreement.

AGREEMENT

NOW, THEREFORE, for good and valuable consideration, receipt of which is hereby acknowledged, and intending to be legally bound, Grantor hereby represents, warrants, covenants and agrees as follows:

As collateral security for the full, prompt, complete and final payment and performance when due (whether at stated maturity, by acceleration or otherwise) of all the Obligations and in order to induce Secured Parties to cause the Loans to be made, Grantor hereby grants and pledges to Secured Parties a security interest in all of Grantor's right, title and interest in, to and under the following, whether now owned or hereafter acquired: All of Grantor's right, title and interest in, to and under its Intellectual Property (including without limitation those copyrights, patents and trademarks listed on Schedules A, B and C hereto), and including without limitation all proceeds thereof (such as, by way of example but not by way of limitation, license royalties and proceeds of infringement suits), the right to sue for past, present and future infringements, all rights corresponding thereto throughout the world and all re-issues, divisions continuations, renewals, extensions and continuations-in-part thereof; provided, however, with respect to the trademark applications listed under Schedule C attached, no grant of rights shall be made with respect to any intent to use applications until the Company has commenced use of and filed verified statements of use with the U.S. Patent and Trademark Office for the trademarks shown in those applications.

This security interest is granted in conjunction with the security interest granted to Secured Parties under the Security Agreement. The rights and remedies of Secured Parties with respect to the security interest granted hereby are subject to the terms of the Security Agreement and are in addition to those set forth in the Security Agreement and the Notes, and those which are now or hereafter available to Secured Parties as a matter of law or equity. Each right, power and remedy of Secured Parties provided for herein or in the Security Agreement or any of the Notes, or now or hereafter existing at law or in equity shall be cumulative and concurrent and shall be in addition to every right, power or remedy provided for herein and the exercise by Secured Parties of any one or more of the rights, powers or remedies provided for in this Intellectual Property Security Agreement, the Security Agreement or any of the Notes, or now or hereafter existing at law or in equity, shall not preclude the simultaneous or later exercise by any person, including Secured Parties, of any or all other rights, powers or remedies.

Grantor represents and warrants that Schedules A, B, and C attached hereto set forth any and all intellectual property rights in connection to which Grantor has registered or filed an application with either the United States Patent and Trademark Office or the United States Copyright Office, as applicable.

In all respects, including all matters of construction, validity and performance, this Intellectual Property Security Agreement shall be governed by, and construed and enforced in accordance with, the laws of the State of Delaware applicable to contracts made and performed in such state, without regard to the principles thereof regarding conflict of laws, except to the extent that the UCC provides for the application of the law of a different jurisdiction.

This Intellectual Property Security Agreement may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

IN WITNESS WHEREOF, the parties have caused this Intellectual Property Security Agreement to be duly executed by its officers thereunto duly authorized as of the first date written above.
