## **GRANT OF SECURITY INTEREST IN TRADEMARKS**

GRANT OF SECURITY INTEREST IN TRADEMARKS (this "Trademark Security Agreement"), dated as of May 14, 2014, by the undersigned (collectively the "Grantors"), in favor of WILMINGTON TRUST, NATIONAL ASSOCIATION, as Collateral Agent, for the benefit of the holders of the Secured Obligations.

### **W I T N E S S E T H :**

WHEREAS, reference is made to that certain Security Agreement, dated as of May 14, 2014 (including all annexes or exhibits thereto, as from time to time amended, restated, supplemented or otherwise modified from time to time, the "Security Agreement") among KRATOS DEFENSE & SECURITY SOLUTIONS, INC., a Delaware corporation, the other Grantors from time to time party thereto, and WILMINGTON TRUST, NATIONAL ASSOCIATION, as Collateral Agent.

Grantor(s) are required to execute and deliver to the Collateral Agent this Trademark Security Agreement for the benefit of the holders of the Secured Obligations.

NOW, THEREFORE, in consideration of the promises and mutual covenants herein contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Grantor(s) hereby agree as follows:

1. **DEFINED TERMS.** All capitalized terms used but not otherwise defined herein have the meanings given to them in the Security Agreement.

2. **GRANT OF SECURITY INTEREST IN TRADEMARK COLLATERAL.** Grantor(s) hereby grant to the Collateral Agent, for the benefit of the holders of the Secured Obligations, a security interest in and continuing lien on all of such Grantor's right, title and interest in, to and under any Trademarks (collectively, the "Trademark Collateral"), along with all goodwill associated therewith, whether now owned or existing or hereafter acquired or arising and wherever located, including those Trademarks set forth in Schedule I, provided that no security interest therein is granted on any trademark applications filed on an intent-to-use basis in the United States Patent and Trademark Office to the extent that, and solely during the period in which, the grant of a security interest therein would impair the validity and enforceability of such intent-to-use trademark applications under applicable law.

3. **SECURITY AGREEMENT.** The security interests granted pursuant to this Trademark Security Agreement are granted in furtherance, and not in limitation of the security interests granted to the Collateral Agent, for the benefit of the holders of the Secured Obligations on behalf of itself and the other Secured Parties, pursuant to the Security Agreement. Grantor(s) hereby acknowledge and affirm that the rights and remedies of Collateral Agent with respect to the security interest in the Trademark Collateral made and granted hereby are more fully set forth in the Security Agreement, the terms and provisions of which are incorporated by reference herein as if fully set forth herein. In the event that any provision of this Trademark Security Agreement is deemed to conflict with the Security Agreement, the provisions of the Security Agreement shall control.

4. COUNTERPARTS. This Trademark Security Agreement may be executed in any number of counterparts, each of which when so executed and delivered shall be deemed an original, but all such counterparts together shall constitute but one and the same instrument. The exchange of copies of this Trademark Security Agreement and of signature pages by facsimile or PDF transmission shall constitute effective execution and delivery of this Trademark Security Agreement as to the parties hereto and may be used in lieu of the original Trademark Security Agreement and signature pages for all purposes.

5. TERMINATION OR RELEASE. This Trademark Security Agreement shall terminate and the security interests granted hereby shall be automatically released in accordance with the provisions listed in Section 29 of the Security Agreement.

6. THIS TRADEMARK SECURITY AGREEMENT AND THE RIGHTS AND OBLIGATIONS OF THE PARTIES HEREUNDER SHALL BE GOVERNED BY, AND SHALL BE CONSTRUED AND ENFORCED IN ACCORDANCE WITH, THE LAW OF THE STATE OF NEW YORK.

7. Notwithstanding anything to the contrary contained in this Trademark Security Agreement, the liens and security interests (and priority of such liens and security interests) granted to the Collateral Agent in any Collateral that constitutes Credit Facility Priority Collateral (as defined in the Intercreditor Agreement) pursuant to this Trademark Security Agreement and the exercise of any right or remedy against the Credit Facility Priority Collateral by the Collateral Agent hereunder are subject to the limitations and provisions of the Intercreditor Agreement. In the event of any conflict between the terms of the Intercreditor Agreement and the terms of this Trademark Security Agreement, the terms of the Intercreditor Agreement shall govern and control.

[Remainder of page intentionally left blank]

IN WITNESS WHEREOF, Grantors have caused this Trademark Security Agreement to be executed and delivered by its duly authorized officer as of the date first set forth above.

Kratos Defense & Security Solutions, Inc.  120575-1	U.S.	CYBERC4	<p>technology services, including developing and implementing safeguards and controls for computer and communications network security by restricting access to and by computer networks to and of undesired web sites, media and individuals and facilities, planning for continuing operations and disaster recovery for computer networks, administration of computer system networks in operations centers in the fields of military defense, commercial communications service providers, intelligence, surveillance, reconnaissance, homeland security, avionics and space programs to governmental agencies; providing design, development and integration of computer networks; computer and telecommunications network engineering and consulting services for enterprise solutions and integration</p> <p>9 = Computer programs for computer security; computer hardware containing computer security software; cyber security computer hardware and software to protect computer networks against unauthorized intrusion, data theft, compromise, infiltration and corruption by hackers, and other risks as it relates to computer security; cyber security appliances, namely, computer hardware and software combinations for protecting computer networks against unauthorized intrusion, data theft, compromise, infiltration and corruption by hackers, and other risks</p>	85/613,591 5/1/12 (TTU)		Pending USPTO consideration of Response to Office Action

APPLICANT/ FILE NO.	COUNTRY	MARK	CLASS/SERVICES	Serial No. Filing Date	Reg. No. Issue Date	STATUS
			<p>relating to computer security, for providing real-time Security Information Event Management (SIEM) for satellite networks for use in providing situational awareness across network and security devices, for providing real-time monitoring and recording and built-in alerting for use in protecting against insider threats, for providing cyber security hardware and software that passes secure information across classified and unclassified network domains, and for providing computer hardware and software combinations that reverse engineer internet protocol out of an RF link; cyber security software and software incorporating algorithms for use in harden system configuration against tampering</p> <p>42 - Computer security service, namely providing real-time Security Information Event Management (SIEM) for satellite networks for use in providing situational awareness across network and security devices</p>			

**Service Descriptions**

Description "A" - Engineering services; consulting in the fields of engineering for weapons systems development; information technology services; computer and telecommunications network engineering; and design and inspection of fire alarm system and sprinkler suppression systems; on-line system management services that allow users to remotely view, monitor, program, operate and control electrical systems, environmental, access and security systems in homes, offices and buildings

Description "B" - Engineering services; providing mission critical engineering and information technology services, namely, software application design, development, implementation and maintenance to meet customer needs, developing and implementing safeguards and controls for computer network security by restricting access to and by computer networks to and of undesired web sites, media and individuals and facilities, planning for continuing operations and disaster recovery for computer networks, administration of computer system networks in operations centers for the government, customizing computer software for email systems for the customer and application service provider, namely, hosting databases, all in the fields of military defense, intelligence, surveillance, reconnaissance, homeland security, weapon systems support and maintenance, avionics and space programs to governmental agencies; providing design, development and integration of computer networks; consulting in the fields of engineering for weapons systems development, information technology services primarily directed to military defense, intelligence, surveillance, reconnaissance, homeland security, weapon systems support and maintenance, avionics and space programs, computer and telecommunications network engineering and consulting services for enterprise solutions and integration, namely, design and inspection of fire alarm system and sprinkler suppression systems; on-line system management services that allow users to remotely view, monitor, program, operate and control electrical systems, environmental, access and security systems in homes, offices and buildings
