Intellectual Property Assignment Agreement

This **Intellectual Property Assignment Agreement** ("Agreement"), effective as of the 8th day of July, 2015 ("Effective Date"), is by and between SoonR, Inc., a Delaware Corporation, having a principal place of business located at 307 Orchard City Drive, Ste. 206, Campbell, California 95008 (collectively "Assignors"), in favor of Autotask Corporation, ("Assignee"), a Delaware Corporation having a principal place of business located at 26 Tech Valley Drive, Suite 2, East Greenbush, NY 12061.

WHEREAS, The parties have entered into an Agreement effective July 8, 2015, for the Merger of Assignors to Assignee, pursuant to;

Said Merger Agreement, Assignee obtained the sole, complete, and exclusive ownership of any and all Intellectual Property created by the Assignors, collectively or individually, in furtherance of the Activities of Assignee, in order to allow Assignee to use such Intellectual Property in any way it chooses, including, without limitation, allowing Assignee to make, have made, use, offer to sell, sell or otherwise dispose of the Intellectual Property, as well as any procedures, practices, or methods of utilizing the Intellectual Property;

NOW THEREFORE in consideration of the covenants and obligations contained in this Agreement and other good and valuable consideration the receipt and sufficiency of which are hereby acknowledged, the parties have agreed as follows:

1. Assignors do hereby assign to Assignee, its successors, legal representatives and assigns, irrevocably and without restriction, all right, title and interest in and to any Intellectual Property conceived of or acquired by the Assignors, collectively or individually, prior or subsequent to this Agreement, in furtherance of the Activities of Assignee, its successors, and/or legal representatives and assigns. For purposes of this Agreement, Intellectual Property is defined to include, without limitation, intellectual property and the right to use or exploit it, including those rights in any invention, patent, patent application, copyright and the exclusive right to recover and collect any and all damages and past and future royalties associated with infringement thereof, copyright application, trademark and all associated good will, trademark application and all associated good will, service mark and all associated good will, service mark application and all associated good will, trade dress and all associated good will, trade secret, technical, business and marketing information, customer or contact list, know-how, formula, process, technology, idea,

concept, methodology, algorithm, report, assessment, survey, and any other proprietary right, whether arising under the laws of the United States or any other country, including, but not limited to, all of the registrations indicated in Schedule 5 (m)(i) of the Merger Agreement, a copy of which is annexed hereto as Schedule 5(m)(i). Assignors acknowledge that they will treat all Intellectual Property that constitutes an original work of authorship (solely or jointly with others) that qualifies for protection by copyright to be a "work made for hire" as that term is defined in the United States Copyright Act. To the extent such material does not qualify as "work made for hire", Assignors agree to assign and do hereby expressly assign to Assignee the copyright in such material on a worldwide, exclusive basis.

2. Assignors represent and warrant that they have not executed, and will not execute, any agreement in conflict herewith.
3. Assignors agree to execute and deliver promptly to Assignee all papers or written instruments, and to perform all other proper acts which Assignee may deem necessary or desirable to enable Assignee to secure and vest for Assignee the entire right and title in and to the Intellectual Property covered herein, to preserve the property rights to the Intellectual Property against forfeiture, abandonment or loss, and cooperate at Assignee's expense in the defense, enforcement, prosecution, procurement, and maintenance of such Intellectual Property. Assignors further agree that if Assignee is unable because of Assignors' unavailability, mental or physical incapacity, or for any other reason, to secure Assignors' signature(s) to apply for or to pursue any license or application for any United States or foreign patent, copyright, or trademark covering Intellectual Property under this Agreement, then Assignors hereby irrevocably designate and appoint Assignee and its duly authorized officers and agents as Assignors' agent and attorney in fact, to act for and in Assignors' behalf and stead to execute and file any such licenses or applications and to do all other lawfully permitted acts to further the prosecution and issuance of said patent application, copyright, or trademark registration thereon with the same legal force and effect as if executed by Assignor(s).

IN WITNESS WHEREOF, Assignors have caused this Assignment to be duly executed, effective as of the above Effective Date.
