INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

This Intellectual Property Assignment Agreement (this "IP Assignment") is dated as of August 31, 2016, and is made by Metro Industries, Inc., a Nevada corporation ("Transferor"), in favor of InterMetro Industries Corporation, a Delaware corporation ("Transferee"), the recipient of certain assets of Transferor pursuant to an Agreement and Plan of Merger, dated as of the date hereof (the "Merger Agreement").

WHEREAS, under the terms of the Merger Agreement, Transferor has conveyed, transferred and assigned to Transferee, among other assets, all intellectual property of Transferor, and has agreed to execute and deliver this IP Assignment, for recording with the United States Patent and Trademark Office and/or the United States Copyright Office and corresponding entities or agencies in any applicable jurisdictions to reflect such transactions.

NOW, THEREFORE, the parties agree as follows:

1. Assignment. For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Transferor hereby irrevocably conveys, transfers and assigns to Transferee, and Transferee accepts, all of Transferor's right, title and interest in and to the following (the "Assigned IP"):

a. the patents and patent applications set forth on Schedule 1 hereto and all issuances, divisions, continuations, continuations-in-part, reissues, extensions, reexaminations and renewals thereof (the "Patents");

b. the trademark registrations and applications set forth on Schedule 2 hereto and all issuances, extensions and renewals thereof (the "Trademarks"), together with the goodwill of the business connected with the use of, and symbolized by, the Trademarks; provided that, with respect to the United States intent-to-use trademark applications set forth on Schedule 2 hereto, the transfer of such applications accompanies the transfer of Transferor's business, or portion of the business to which the trademark pertains, and that business is ongoing and existing;

c. the copyright registrations and applications for registration and exclusive copyright licenses set forth on Schedule 3 hereto and all issuances, extensions and renewals thereof (the "Copyrights");

d. all rights of any kind whatsoever of Transferor accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions and otherwise throughout the world, including, without limitation, all rights of priority;

e. any and all royalties, fees, income, payments and other proceeds now or hereafter due or payable with respect to any of the foregoing; and

f. any and all claims and causes of action, with respect to any of the foregoing, whether accruing before, on and/or after the date hereof, including all rights to and claims for damages, restitution and injunctive and other legal and equitable relief for past, present and future infringement, dilution, misappropriation, violation, misuse, breach or default, with the right but no obligation to sue for legal and equitable relief and to collect, or otherwise recover, any such damages.

2. Recordation and Further Acts. Transferor hereby authorizes the Commissioner for Patents and the Commissioner for Trademarks in the United States Patent and Trademark Office and the Register of Copyrights in the United States Copyright Offices and the officials of corresponding entities or agencies in any applicable jurisdictions to record and register this IP Assignment upon request by Transferee. Following the date hereof, Transferor shall take such steps and actions, and provide such cooperation and assistance to Transferee and its successors, assigns and legal representatives, including the execution and delivery of any affidavits, declarations, oaths, exhibits, assignments, powers of attorney, or other documents, as may be necessary to effect evidence or perfect the assignment of the Assigned IP to Transferee, or any assignee or successor thereto.

3. Counterparts. This IP Assignment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this IP Assignment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this IP Assignment.

4. Successors and Assigns. This IP Assignment shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and assigns.

5. Governing Law. This IP Assignment and any claim, controversy, dispute or cause of action (whether in contract, tort or otherwise) based upon, arising out of or relating to this IP Assignment and the transactions contemplated hereby shall be governed by, and construed in accordance with, the laws of the United States and the State of Nevada, without giving effect to any choice or conflict of law provision or rule (whether of the State of Nevada or any other jurisdiction).
