IN THE EVENT OF ANY CONFLICT BETWEEN THE TERMS OF THE INTERCREDITOR AGREEMENT AND THIS INTELLECTUAL PROPERTY SECURITY AGREEMENT, THE TERMS OF THE INTERCREDITOR AGREEMENT SHALL GOVERN AND CONTROL.

This INTELLECTUAL PROPERTY SECURITY AGREEMENT, dated as of December 15, 2016 (as amended, supplemented or otherwise modified from time to time, the “Intellectual Property Security Agreement”), is made by Key Energy Services, LLC (the “Grantor”) in favor of Bank of America, N.A., as administrative agent (in such capacity, the “Agent”) for the Secured Parties (as defined in the Loan Agreement referred to below).

WHEREAS, Key Energy Services, Inc., a Delaware corporation, Key Energy Services, LLC, a Texas limited liability company and certain of their respective Subsidiaries have entered into that certain Loan and Security Agreement, dated as of December 15, 2016 (as amended, supplemented, replaced or otherwise modified from time to time, the “Loan Agreement”), with the banks and other financial institutions and entities from time to time party thereto and Bank of America, N.A., as agent. Capitalized terms used and not defined herein have the meanings given such terms in the Loan Agreement.

WHEREAS, under the terms of the Loan Agreement, the Grantor has granted a security interest in certain Property, including, without limitation, certain Intellectual Property of the Grantor to the Agent for the ratable benefit of the Secured Parties, and has agreed as a condition thereof to execute this Intellectual Property Security Agreement for recording with the United States Patent and Trademark Office, the United States Copyright Office, and other applicable Governmental Authorities.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Grantor agrees as follows:

SECTION 1. Grant of Security. The Grantor hereby grants to the Agent for the ratable benefit of the Secured Parties a security interest in and to all of the Grantor’s right, title and interest in and to the following (collectively, the “Intellectual Property Collateral”), as collateral security for the prompt and complete payment and performance when due (whether at the stated maturity, by acceleration or otherwise) of the Grantor’s Obligations:

(a) (i) all trademarks, service marks, trade names, corporate names, company names, business names, trade dress, trade styles, logos, or other indicia of origin or source identification, trademark and service mark registrations, and applications for trademark or service mark registrations and any new renewals thereof, including, without limitation, each registration and application identified in Schedule 1, (ii) the right to sue or otherwise recover for any and all past, present and future infringements and misappropriations thereof, (iii) all income, royalties, damages and other payments now and hereafter due and/or payable with respect thereto (including, without limitation, payments under all licenses entered into in connection therewith, and damages and payments for past, present or future infringements thereof), and (iv) all other rights of any kind whatsoever of the Grantor accruing thereunder or pertaining thereto, together in each case with the goodwill of the business connected with the use of, and symbolized by, each of the above (collectively, the “Trademarks”);

(b) (i) all patents, patent applications and patentable inventions, including, without limitation, each issued patent and patent application identified in Schedule 1, (ii) all inventions and improvements described and claimed therein, (iii) the right to sue or otherwise recover for any and all past, present and future infringements and misappropriations thereof, (iv) all income, royalties, damages and other payments now and hereafter due and/or payable with respect thereto (including, without limitation, payments under all licenses entered into in connection therewith, and damages and payments for past, present or future infringements thereof), and (v) all reissues, divisions, continuations, continuations-in-part, substitutes, renewals, and extensions thereof, all improvements thereon and all other rights of any kind whatsoever of the Grantor accruing thereunder or pertaining thereto (collectively, the “Patents”);

(c) (i) all copyright rights in any work subject to applicable copyright laws, whether as author, assignee, transferee or otherwise, (ii) all registrations and applications for registration of any such copyright and all extensions and renewals thereof, including, without limitation, any of the foregoing listed in Schedule 1, (iii) the right to sue or otherwise recover for any and all past, present and future infringements and misappropriations thereof, and (iv) all income, royalties, damages and other payments now and hereafter due and/or payable with respect thereto (including, without limitation, payments under all licenses entered into in connection therewith, and damages and payments for past, present or future infringements thereof) (collectively, the “Copyrights”).

(d) (i) all trade secrets and all confidential and proprietary information, including know-how, manufacturing and production processes and techniques, inventions, research and development information, technical data, financial, marketing and business data, pricing and cost information, business and marketing plans, and customer and supplier lists and information, (ii) the right to sue or otherwise recover for any and all past, present and future infringements and misappropriations thereof, (iii) all income, royalties, damages and other payments now and hereafter due and/or payable with respect thereto (including, without limitation, payments under all licenses entered into in connection therewith, and damages and payments for past, present or future infringements thereof), and (iv) all other rights of any kind whatsoever of the Grantor accruing thereunder or pertaining thereto (collectively, the “Trade Secrets”);

(e) (i) all licenses or agreements, whether written or oral, providing for the grant by or to the Grantor of: (A) any right to use any Trademark or Trade Secret, (B) any right under any Patent, including, without limitation, any right to manufacture, use or sell any invention covered in whole or in part by a Patent and (C) any right under any Copyright, (ii) the right to sue or otherwise recover for any and all past, present and future infringements and misappropriations of any of the foregoing, (iii) all income, royalties, damages and other payments now and hereafter due and/or payable with respect thereto (including, without limitation, payments under all licenses entered into in connection therewith, and damages and payments for past, present or future infringements thereof), and (iv) all other rights of any kind whatsoever of Grantor accruing thereunder or pertaining thereto; and

(f) any and all proceeds of the foregoing.

For the avoidance of doubt, the Intellectual Property Collateral shall not include any intent-to-use trademark application prior to the filing of a "Statement of Use" or "Amendment to Allege Use" with respect thereto, to the extent, if any, that, and solely during the period, if any, in which, the grant of a security interest therein would impair the validity or enforceability of such intent-to-use trademark application under applicable federal law.

SECTION 2. Recordation. The Grantor authorizes and requests that the Register of Copyrights, the Commissioner of Patents and Trademarks and any other applicable government officer record this Intellectual Property Security Agreement.

SECTION 3. After-Acquired Intellectual Property. The Grantor agrees that, should it obtain an ownership or other interest in any item of Intellectual Property material to the Grantor's business which is not, as of the date hereof, a part of the Intellectual Property Collateral (the "After-Acquired Intellectual Property"), (i) the provisions of this Intellectual Property Security Agreement shall automatically apply thereto, (ii) any such After-Acquired Intellectual Property and in the case of Trademarks, the goodwill of the business connected therewith or symbolized thereby, shall automatically become part of the Intellectual Property Collateral subject to the terms and conditions of this Intellectual Property Security Agreement with respect thereto, (iii) it shall give notice thereof to the Agent in accordance with Section 7.4.2 of the Term Loan Agreement, and (iv) it shall, promptly upon Agent's request and in accordance with Section 7.4.2 of the Term Loan Agreement, provide the Agent with a duly executed copy of an After-Acquired Intellectual Property Security Agreement with respect to its After-Acquired Intellectual Property in substantially the form of Exhibit A in order to record the security interest granted herein to the Agent for the ratable benefit of the Secured Parties with the United States Patent and Trademark Office and the United States Copyright Office.

SECTION 4. Execution in Counterparts. This Intellectual Property Security Agreement may be executed in any number of counterparts (including by telecopy), each of which when so executed shall be deemed to be an original and all of which taken together shall constitute one and the same agreement.

SECTION 5. Governing Law. This Intellectual Property Security Agreement shall be governed by, and construed and interpreted in accordance with, the law of the State of New York.

SECTION 6. Conflict Provision. This Intellectual Property Security Agreement has been entered into in conjunction with the provisions of the Loan Agreement. The rights and remedies of each party hereto with respect to the security interest granted herein are without prejudice to, and are in addition to those set forth in the Loan Agreement, all terms and provisions of which are incorporated herein by reference. In the event that any provisions of this Intellectual Property Security Agreement are in conflict with the Loan Agreement, the provisions of the Loan Agreement shall govern.

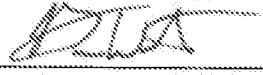

IN WITNESS WHEREOF, the undersigned has caused this Intellectual Property Security Agreement to be duly executed and delivered as of the date first above written.
