HEALTH INFORMATION SYSTEM FOR ANNOTATING AND SEARCHING PATIENT DOCUMENTS	62/372,946	08/10/2016

Title, as filed	Issue Date	Application Numbers	Full Description
Method and apparatus for directing Internet users to health care information such as names of health care providers.	2-Dec-03	US Patent 6,658,431	This patent covers an improved method for providing specific and relevant health care information to Internet users. In particular, this invention allows for an Internet user to use medical codes (e.g., ICD and CPT codes) to retrieve related content on ailments, treatments of such ailments or conditions, and complications associated with such ailments. Another aspect of the invention is to direct Internet users to names of specialists who treat such ailments or conditions. A further aspect of this invention is an Internet navigation system comprising a computer database and retrieval system whereby content components (ailments, treatments, complications, specialties, etc.) are associated with relevant medical codes.
Apparatus and method for directing Internet users to health care information.	18-May-04	US Patent 6,738,754	This patent covers a method for directing a patient to a source of health information over the Internet. The method comprises placing on a prescription sheet a keyword or an ICD or CPT associated with the ailment. The patient is instructed to input the keyword or code into the Internet web site to obtain relevant information about the ailment. The internet web site retrieves information based on a hierarchical system whereby the user can navigate to relevant components of a particular ailment.
Method and system for establishing document relevance.	30-Nov-10	US Patent 7,944,602	This patent covers a method for order ranking search results based on an automated analysis of the organizational structure of a group of documents. For example, a search bot crawls various websites analyzing documents, and their organizational structure, in an effort to identify documents that have an implicit high quality based on their inclusion in an index. Accordingly, the search engine provides a greater weight in ranking document relevance to those documents that have been included in certain indexes, such as top ten lists, and A-Z lists.
