April 6, 2017

D-Wave Systems, Inc.
3033 Beta Ave.
Burnaby, BC V5G4M9

Ladies and Gentlemen:

D-Wave Systems, Inc., a British Columbia corporation ("Borrower"), has paid in full all indebtedness under that certain Loan and Security Agreements, dated as of March 29, 2007, between Borrower and Venture Lending & Leasing IV, Inc., and Venture Lending & Leasing V, Inc., Loan and Security Agreements, dated as of December 15, 2009, between Borrower and Venture Lending & Leasing V, Inc., Loan and Security Agreements, dated as of August 31, 2010, between Borrower and Venture Lending & Leasing V, Inc., and Venture Lending & Leasing VI, Inc., Loan and Security Agreements, dated as of February 18, 2014, between Borrower and Venture Lending & Leasing VI, Inc., and Venture Lending & Leasing VII, Inc., (all as "Lender") as supplemented by the Supplements thereto of even date therewith (as so supplemented, the "Loan Agreements"; the terms defined therein and not otherwise defined herein being used herein as therein defined).

In connection therewith, Lender acknowledges and agrees that:

- (1) all of Borrower's outstanding debts, liabilities and obligations to Lender under the Loan Agreements and any other related loan and collateral security documents that may have been executed by Borrower (collectively, the "Loan Documents"; provided, however, "Loan Documents" shall not include any warrant instrument issued by Borrower to Lender's parent company or any other equity securities of Borrower acquired by Lender's parent company) have been satisfied in full and all Persons obligated therefor, whether by guaranty or otherwise, have been released from all liability therefor and Borrower has been released and discharged from any and all obligations, covenants and Agreements under the Loan Documents without further action from any Person;
- (2) the Commitment to make Loans under the Loan Agreements, to the extent not previously expired, shall hereby be terminated and be of no further force or effect, Lender shall hereby be released from any and all obligations, covenants and Agreements under the Loan Documents, and Lender shall not have any further obligation to make any Loans under the Loan Agreements;

TRADEMARK

REEL: 006039 FRAME: 0390

(3) all Liens of any kind, nature, or description, whenever and however arising, which Lender may have on any of the assets and property, real or personal, tangible or intangible, of Borrower; and any of its Subsidiaries granted in favor of Lender, including, without limitation, Liens created by, arising under, or granted to Lender pursuant to the Loan Documents, shall hereby automatically terminate and be satisfied and released;

(4) all Collateral pledged under the Loan Documents (including stock certificates, related stock powers, promissory notes, instruments and chattel paper) that remains in the possession of Lender shall be returned to Borrower;

(5) Borrower and its attorneys and designees shall hereby be authorized to file such necessary and appropriate UCC termination statements and such other releases, discharges and instruments necessary or appropriate to effect such release, and to record release of liens in patents, trademarks and copyrights for filing in the applicable filing and recording offices; and

(6) Lender shall deliver notices to terminate any control Agreements (including, without limitation, deposit and securities account control agreements) relating to any assets and property in which Borrower has granted a security interest or lien under any of the Loan Documents.

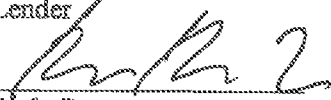

This letter may not be amended, modified or waived except in a writing signed by Lender. In the event of any conflict, inconsistency, or incongruity between any provision of this letter and any provision of the Pay-Off Letter, the provisions of the Pay-Off Letter shall govern and control.

This letter shall be governed by, and shall be construed and enforced in accordance with, the internal laws of the State of California, without regard to conflict of laws principles. This letter may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Any party may execute this letter by facsimile signature or scanned signature in PDF (or like) format, and any such facsimile signature or scanned signature shall be deemed an original signature and each of the parties is hereby authorized to rely thereon.

Notwithstanding anything to the contrary set forth in this letter: (i) those obligations, liabilities, covenants and terms that are expressly specified in any Loan Document as surviving that respective Agreements' termination, including without limitation, Borrower's indemnity obligations set forth in the Loan Agreements, shall continue to survive notwithstanding anything to the contrary set forth herein; and (ii) nothing set forth herein shall affect or be deemed to affect those obligations, liabilities, covenants and terms set forth in any warrant instrument issued to Lender's parent company or set forth in any other equity securities of Borrower acquired by Lender's parent company.

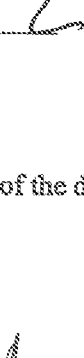

Very truly yours,

VENTURE LENDING & LEASING VI, INC.
VENTURE LENDING & LEASING VII, INC.
both as Lender

INTELLECTUAL PROPERTY SECURITY AGREEMENT

This Intellectual Property Security Agreement (this "Agreement") is made as of January 21, 2015, by and between D-WAVE SYSTEMS INC., a corporation incorporated under the Canada Business Corporations Act, ("Grantor"), and VENTURE LENDING & LEASING VI, INC. ("VLL6") and VENTURE LENDING & LEASING VII, INC. ("VLL7"), both Maryland corporations (sometimes referred to herein individually or together as "Secured Party").

RECITALS

A. Pursuant to (i) that certain Loan and Security Agreement dated as of February 18, 2014 between Grantor, as borrower, and VLL6, as lender, and (ii) that certain Loan and Security Agreement as of February 18, 2014 between Grantor, as borrower, and VLL7, as lender, as such agreements may from time to time be amended, restated, supplemented or otherwise modified (individually and together, the "Loan Agreement"), Secured Party has agreed to make certain advances of money and to extend certain financial accommodations to Grantor (the "Loans") in the amounts and manner set forth in the Loan Agreement. All capitalized terms used herein without definition shall have the meanings ascribed to them in the Loan Agreement.

B. Secured Party is willing to make the Loans to Grantor, but only upon the condition, among others, that Grantor shall grant to Secured Party a security interest in substantially all of Grantor's personal property whether presently existing or hereafter acquired. To that end, Grantor has executed in favor of Secured Party the Loan Agreement granting a security interest in all Collateral, and is executing this Agreement with respect to certain items of Intellectual Property, in particular.

NOW, THEREFORE, THE PARTIES HERETO AGREE AS FOLLOWS:

1. Grant of Security Interest. As collateral security for the prompt and complete payment and performance of all of Grantor's present or future Obligations, Grantor hereby grants a security interest and mortgage to Secured Party, as security, in and to Grantor's entire right, title and interest in, to and under the following Intellectual Property, now solely owned or hereafter acquired by Grantor or in which Grantor now holds or hereafter acquires sole ownership of (all of which shall collectively be called the "Collateral" for purposes of this Agreement):

(a) Any and all copyrights, whether registered or unregistered, held pursuant to the laws of the United States, any State thereof or of any other country; all registrations, applications and recordings in the United States Copyright Office or in any similar office or agency of the United States, and State thereof or any other country; all continuations, renewals, or extensions thereof; and any registrations to be issued under any pending applications, including without limitation those set forth on Exhibit A attached hereto (collectively, the "Copyrights");

(b) All letters patent of, or rights corresponding thereto in, the United States or any other country, all registrations and recordings thereof, and all applications for letters patent of, or rights corresponding thereto in, the United States or any other country, including, without limitation, registrations; recordings and applications in the United States Patent and Trademark Office or in any similar office or agency of the United States, any State thereof or any other country; all reissues, continuations, continuations-in-part or extensions thereof; all petty patents, divisionals, and patents of addition; and all patents to be issued under any such applications, including without limitation the patents and patent applications set forth on Exhibit B attached hereto (collectively, the "Patents");

(c) All trademarks, trade names, corporate names, business names, trade styles, service marks, logos, other source or business identifiers, prints and labels on which any of the foregoing have appeared or

appear, designs and general intangibles of like nature, now existing or hereafter adopted or acquired, all registrations and recordings thereof, and any applications in connection therewith, including, without limitation, registrations, recordings and applications in the United States Patent and Trademark Office or in any similar office or agency of the United States, any State thereof or any other country or any political subdivision thereof, and reissues, extensions or renewals thereof, and the entire goodwill of the business of Grantor connected with and symbolized by such trademarks, including without limitation those set forth on Exhibit C attached hereto (collectively, the "Trademarks");

(d) Any and all claims for damages by way of past, present and future infringement of any of the rights included above, with the right, but not the obligation, to sue for and collect such damages for said use or infringement of the intellectual property rights identified above;

(e) All licenses or other rights to use any of the Copyrights, Patents or Trademarks, and all license fees and royalties arising from such use to the extent permitted by such license or rights;

(f) All amendments, renewals and extensions of any of the Copyrights, Trademarks or Patents; and

(g) All proceeds and products of the foregoing, including without limitation all payments under insurance or any indemnity or warranty payable in respect of any of the foregoing.

Notwithstanding the foregoing the term "Collateral" shall not include: (a) "intent-to-use" trademarks at all times prior to the first use thereof, whether by the actual use thereof in commerce, the recording of a statement of use with the United States Patent and Trademark Office or otherwise, but only to the extent the granting of a security interest in such "intent to use" trademarks would be contrary to applicable law or (b) any contract, instrument or chattel paper in which Grantor has any right, title or interest if and to the extent such contract, instrument or chattel paper includes a provision containing a restriction on assignment such that the creation of a security interest in the right, title or interest of Grantor therein would be prohibited and would, in and of itself, cause or result in a default thereunder enabling another person party to such contract, instrument or chattel paper to enforce any remedy with respect thereto; provided, however, that the foregoing exclusion shall not apply if (i) such prohibition has been waived or such other person has otherwise consented to the creation hereunder of a security interest in such contract, instrument or chattel paper, or (ii) such prohibition would be rendered ineffective pursuant to Sections 9-407(a) or 9-408(a) of the UCC, as applicable and as then in effect in any relevant jurisdiction, or any other applicable law (including the Bankruptcy Code or principles of equity); provided further that immediately upon the ineffectiveness, lapse or termination of any such provision, the term "Collateral" shall include, and Grantor shall be deemed to have granted a security interest in, all its rights, title and interests in and to such contract, instrument or chattel paper as if such provision had never been in effect; and provided further that the foregoing exclusion shall in no way be construed so as to limit, impair or otherwise affect Secured Party's unconditional continuing security interest in and to all rights, title and interests of Grantor in or to any payment obligations or other rights to receive monies due or to become due under any such contract, instrument or chattel paper and in any such monies and other proceeds of such contract, instrument or chattel paper.

2. Covenants and Warranties. Grantor represents, warrants, covenants and agrees as follows:

(a) Grantor is now the sole owner of the Collateral, except for Permitted Liens;

(b) During the term of this Agreement, Grantor will not transfer or otherwise encumber any interest in the Collateral, except for Permitted Liens;

(c) To its knowledge, each of the Patents is valid and enforceable, and no part of the Collateral has been judged invalid or unenforceable, in whole or in part, and no claim has been made that any part of the Collateral violates the rights of any third party;

(d) Grantor shall deliver to Secured Party within thirty (30) days of the last day of each fiscal quarter, a report signed by Grantor, in form reasonably acceptable to Secured Party, listing any applications or registrations that Grantor has made or filed in respect of any patents, copyrights or trademarks and the status of any outstanding applications or registrations. Grantor shall promptly advise Secured Party of any material change in the composition of the Collateral, including but not limited to any subsequent ownership right of the Grantor in or to any Trademark, Patent or Copyright not specified in this Agreement;

(e) Grantor shall use reasonable commercial efforts to (i) protect, defend and maintain the validity and enforceability of the Trademarks, Patents and Copyrights (ii) detect infringements of the Trademarks, Patents and Copyrights and promptly advise Secured Party in writing of material infringements detected and (iii) not allow any material Trademarks, Patents or Copyrights to be abandoned, forfeited or dedicated to the public without the written consent of Secured Party, which consent shall not be unreasonably withheld;

(f) Grantor shall apply for registration (to the extent not already registered) with the United States Patent and Trademark Office or the United States Copyright Office, as applicable: (i) those intellectual property rights listed on Exhibits A, B and C hereto within thirty (30) days of the date of this Agreement; and (ii) those additional intellectual property rights developed or acquired by Grantor from time to time in connection with any product or service, prior to the sale or licensing of such product or the rendering of such service to any third party (including without limitation revisions or additions to the intellectual property rights listed on such Exhibits A, B and C), except with respect to such rights that Grantor determines in its sole but reasonable commercial judgment need not be registered to protect its own business interests. Grantor shall, from time to time, execute and file such other instruments, and take such further actions as Secured Party may reasonably request from time to time to perfect or continue the perfection of Secured Party's interest in the Collateral. Grantor shall give Secured Party notice of all such applications or registrations; and

(g) Grantor shall not enter into any agreement that would materially impair or conflict with Grantor's obligations hereunder without Secured Party's prior written consent, which consent shall not be unreasonably withheld. Grantor shall not permit the inclusion in any material contract to which it becomes a party of any provisions that could or might in any way prevent the creation of a security interest in Grantor's rights and interests in any property included within the definition of the Collateral acquired under such contracts.

3. Further Assurances.

(a) On a continuing basis, Grantor will make, execute, acknowledge and deliver, and file and record in the proper filing and recording places in the United States, all such instruments, including appropriate financing and continuation statements and collateral agreements and filings with the United States Patent and Trademark Office and the Register of Copyrights, and take all such action as may reasonably be deemed necessary or advisable, or as reasonably requested by Secured Party, to perfect Secured Party's security interest in all Copyrights, Patents and Trademarks and otherwise to carry out the intent and purposes of this Agreement, or for assuring and confirming to Secured Party the grant or perfection of a security interest in all Collateral.

(b) Promptly following any change in the composition of the Collateral, Grantor agrees to execute any amendment or supplement to Exhibits A, B and C to include reference to any right, title or interest in any Copyrights, Patents or Trademarks acquired by Grantor or to delete any reference to any right, title or interest in any Copyrights, Patents or Trademarks in which Grantor no longer has or claims any right, title or interest, as Secured Party may request. Grantor shall reimburse Secured Party, no later than ten (10) Business Days following

Secured Party's demand therefor, for Secured Party's attorneys' fees, costs and expenses incurred in connection therewith.

4. Events of Default. The occurrence of any of the following shall constitute an Event of Default under this Agreement:

(a) An Event of Default under the Loan Agreement; or

(b) Grantor breaches any warranty or agreement made by Grantor in this Agreement and, as to any breach that is capable of cure, Grantor fails to cure such breach within thirty (30) days of the sooner to occur of Grantor's receipt of notice of such breach from Secured Party or the date on which such breach first becomes known to Grantor.

5. Amendments. This Agreement may be amended only by a written instrument signed by both parties hereto, except for amendments permitted under Section 3 hereof to be made by Secured Party alone.

6. Counterparts. This Agreement may be executed in two or more counterparts, each of which shall be deemed an original but all of which together shall constitute the same instrument.

7. Several Nature of Secured Party's Obligations and Rights; Pari Passu Security Interests. This Agreement is and shall be interpreted for all purposes as separate and distinct agreements between Grantor and VLL6, on the one hand, and Grantor and VLL7, on the other hand, and nothing in this Agreement shall be deemed a joint venture, partnership or other association between VLL6 and VLL7. Each reference in this Agreement to "Secured Party" shall mean and refer to each of VLL6 and VLL7, singly and independent of one another. Without limiting the generality of the foregoing, the covenants and other obligations of "Secured Party" under this Agreement are several and not joint obligations of VLL6 and VLL7, and all rights and remedies of "Secured Party" under this Agreement may be exercised by VLL6 and/or VLL7 independently of one another. The security interests granted by Grantor to each of VLL6 and VLL7 hereunder and under the Loan Agreement shall be deemed to have been granted and perfected at the same time and shall be of equal priority.

Systems, Devices And Method For Solving Computational Problems	11/765,361	2007-Jun-19
Systems, Devices And Method For Solving Computational Problems	13/462,494	2012-May-02
Systems, Methods And Apparatus For Quasi-Adiabatic Quantum Computation	11/777,910	2007-Jul-13
Processing Relational Database Problems Using	11/932,261	2007-Oct-31

Analog Processors		
Processing Relational Database Problems Using Analog Processors	12/946,643	1900-Jan-00
Systems, Devices And Methods For Controllably Coupling Qubits	12/238,147	2008-Sep-25
Superconducting Shield For Use With An Integrated Circuit For Quantum Computing	2,667,640	2007-Nov-30
Superconducting Shielding For Use With An Integrated Circuit For Quantum Computing	11/948,817	2007-Nov-30
Superconducting Shielding For Use With An Integrated Circuit For Quantum Computing	12/703,534	2010-Feb-10
Quantum Processor	12/194,282	2008-Aug-19
Systems, Methods And Apparatus For Digital-To-Analog Conversion Of Superconducting Magnetic Flux Signals	12/120,354	2008-May-14
Systems, Methods And Apparatus For Digital-To-Analog Conversion Of Superconducting Magnetic Flux Signals	13/325,785	2011-Dec-14
Systems, Methods And Apparatus For Local Programming Of Quantum Processor Elements	2007329156	2009-May-26
Systems, Methods And Apparatus For Local Programming Of Quantum Processor Elements	2,669,816	2007-Dec-04
Systems, Methods And Apparatus For Local Programming Of Quantum Processor Elements	200780044687.7	2009-Jun-03
Systems, Methods And Apparatus For Local Programming Of Quantum Processor Elements	07855474.8	2009-Jul-03
Systems, Methods And Apparatus For Local Programming Of Quantum Processor Elements	2009-539579	2009-Jun-01
Systems, Methods And Apparatus For Local Programming Of Quantum Processor Elements	10-2009-7011585	2009-Jun-04
Systems, Methods And Apparatus For Local Programming Of Quantum Processor Elements	200903790-4	2009-Jun-03
Systems, Methods And Apparatus For Programming Quantum Processor Elements	11/950,276	2007-Dec-04
Systems Methods And Apparatus For Local Programming Of Quantum Processor Elements	12/944,509	2010-Nov-11
Systems Methods And Apparatus For Local Programming Of Quantum Processor Elements	13/228,219	2011-Sep-08
Architecture For Local Programming Of Quantum Processor Elements Using Latching Qubits	12/109,847	2008-Apr-25
Adiabatic Superconducting Qubit Logic Devices And Methods	12/909,682	2010-Oct-21
Systems, Devices And Methods For Interconnected Processor Topology	12/013,192	2008-Jan-11
Input/Output System And Devices For Use With Superconducting Devices	12/016,801	2008-Jan-18
Systems, Methods And Apparatus For Electrical Filters	12/016,709	2008-Jan-18
Systems, Devices, And Methods For Controllably Coupling Qubits	12/113,753	2008-May-01

Physical Realization Of A Universal Adiabatic Quantum Computer	2,681,138	2008-Apr-04
Physical Realizations Of A Universal Adiabatic Quantum Computer	2010-501343	2008-Apr-04
Physical Realizations Of A Universal Adiabatic Quantum Computer	200906256-3	2008-Apr-04
Physical Realizations Of A Universal Adiabatic Quantum Computer	12/098,348	2008-Apr-04
Systems, Methods And Apparatus For Anti-Symmetric Qubit-Coupling	12/098,347	2008-Apr-04
Physical Realizations Of A Universal Adiabatic Quantum Computer	13/539,039	2012-Jun-29
Systems, Methods And Apparatus For Automatic Image Recognition	200880012343.2	2008-Apr-18
Systems, Methods And Apparatus For Automatic Image Recognition	08733763.0	2009-Oct-30
Systems, Methods And Apparatus For Automatic Image Recognition	12/106,024	2008-Apr-18
Systems, Methods, And Apparatus For Solving Problems	13/284,418	2011-Oct-28
Systems, Methods And Apparatus For Recursive Quantum Computing Algorithms	12/135,899	2008-Jun-09
Systems, Methods, And Apparatus For Superconducting Magnetic Shielding	12/256,330	2008-Oct-22
Systems, Methods, And Apparatus For Electrical Filters And Input/Output Systems	12/256,332	2008-Oct-22
Systems, Methods, And Apparatus For Electrical Filters And Input/Output Systems	13/416,794	2012-Mar-09
Systems, Methods And Apparatus For Controlling The Elements Of Superconducting Processors	12/193,601	2008-Aug-18
Systems, Methods And Apparatus For Qubit State Readout	2,698,132	2008-Sep-23
Systems, Methods And Apparatus For Qubit Readout	200880117254.4	2008-Sep-23
Systems, Methods, And Apparatus For Qubit State Readout	08 800 375.1	2008-Sep-23
Systems, Methods And Apparatus For Qubit Readout	2010-525175	2008-Sep-23
Systems, Methods, And Apparatus For Qubit State Readout	12/236,040	2008-Sep-23
Systems, Methods And Apparatus For Adiabatic Quantum Computation And Quantum Annealing	12/473,970	2009-May-28
Method And Apparatus For Evolving A Quantum System Using A Mixed Initial Hamiltonian Comprising Both Diagonal And Off-Diagonal Terms	13/529,664	2012-Jun-21
Systems, Methods, And Apparatus For Multilayer Superconducting Printed Circuit Boards	12/247,475	2008-Oct-08

Systems, Devices And Methods For Analog Processing	12/266,378	2008-Nov-06
Magnetic Vacuum Systems And Devices For Use With Superconducting Based Computing Systems	12/865,341	2009-Jan-30
Systems, Methods, And Apparatus For Combined Superconducting Magnetic Shielding And Radiation Shielding	12/262,417	2008-Oct-31
Systems, Methods And Apparatus For Cryogenic Refrigeration	12/811,067	2010-Jun-28
Systems, Methods And Apparatus For Cryogenic Refrigeration	13/863,218	2013-Apr-15
Systems, Devices And Methods For Controllably Coupling Qubits	12/242,133	2008-Sep-30
Systems, Methods And Apparatus For Calibrating, Controlling And Operating A Quantum Processor	2,724,617	2009-May-19
Systems, Methods And Apparatus For Calibrating, Controlling And Operating A Quantum Processor	200980117971.1	2009-May-19
