ASSIGNMENT OF INTELLECTUAL PROPERTY

This **ASSIGNMENT OF INTELLECTUAL PROPERTY** (this “**Agreement**”), dated as of November 30, 2017, is entered into by and among Therma-Stor LLC, a Delaware limited liability company having a business mailing address at 4201 Lien Road, Madison, Wisconsin 53704 (“**Assignee**”), on the one hand, and Technologies Holdings Corp., a Nevada corporation having a business mailing address at 4201 Lien Road, Madison, Wisconsin 53704 (“**THC**”) and Therma-Stor LLC, a Nevada limited liability company having a business mailing address at 4201 Lien Road, Madison, Wisconsin 53704 (“**Seller**” and THC, each an “**Assignor**” and collectively “**Assignors**”), on the other hand. Capitalized terms used but not defined herein shall have their respective meanings as set forth in the APA (as defined below).

BACKGROUND

WHEREAS, the Assignors are parties to that certain Asset Purchase Agreement, dated as of the date hereof (the “**APA**”), pursuant to which Seller has agreed to sell to Assignee, and Assignee has agreed to purchase from Seller, substantially all of Seller’s assets used in the Business;

WHEREAS, Assignors are the exclusive owners of the assets set forth on Exhibit A attached hereto;

WHEREAS, the APA contemplates execution of this Agreement; and

WHEREAS, Assignors desire to transfer to Assignee, and Assignee desires to receive from Assignors, exclusive ownership of the IP Assets, including all intellectual property rights therein and thereto, and all goodwill associated therewith.

NOW THEREFORE, in consideration of the mutual promises provided herein, the APA, and for other good and valuable consideration, the receipt and adequacy of which each party hereby acknowledges, and intending to be legally bound hereby, the parties agree as follows:

AGREEMENT

- 1. ASSIGNMENT.** Assignors hereby irrevocably and unconditionally grant, sell, convey, transfer and assign to Assignee (a) all worldwide right, title, and interest in and to all (i) copyrights used or held for use in the operation of the Business as conducted in the past or at present or as expected to be conducted in the future (including all common law rights and applications and registrations for the foregoing, including, without limitation, the applications and registrations set forth on Exhibit A), (ii) patent rights used or held for use in the operation of the Business as conducted in the past or at present or as expected to be conducted in the future, including, without limitation, the applications and issued patents set forth on Exhibit A, and all future patents that may issue from such patent rights throughout the world, all divisionals, continuations in whole or in part, reexaminations, reissues, substitutions or extensions of any of the foregoing, all foreign counterparts to any of the foregoing, and the right to claim priority to the same), (iii) trademark, trade name, and service mark rights, in each case used or held for use in the operation of the Business as conducted in the past or at present or as expected to be conducted in the future (including all common law rights and applications and registrations for the foregoing, including, without limitation, the

applications and registrations set forth on Exhibit A, and the right to claim priority to the same and all renewals thereof), together with the goodwill of the Business symbolized by and associated with the foregoing, (iv) all other intellectual property used or held for use in the operation of the Business as conducted in the past or at present or as expected to be conducted in the future (subsections (i) through (iv) collectively, the “**IP Assets**”), and (v) all other proprietary or intellectual property rights of any kind or nature throughout the world, in all cases that pertain to or that are embodied by or in any of the IP Assets or are used or held for use in the operation of the Business as conducted in the past or at present or as expected to be conducted in the future (collectively, the “**Intellectual Property Rights**”), and (b) all worldwide rights to income, royalties, and license fees deriving from the IP Assets and/or Intellectual Property Rights, all claims for damages by reason of past, present and future infringement or misappropriation of the IP Assets and/or Intellectual Property Rights or injury to the goodwill associated with the Intellectual Property Rights, and the right to sue for and collect such damages, as permitted under the applicable laws for any jurisdiction or country in which such claims may be asserted for the use and benefit of Assignee and its successors, assigns and other legal representatives, same to be held by Assignee for Assignee’s own use and enjoyment, and for the use and enjoyment of Assignee’s successors, assigns and other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignors if this Agreement had not been made.

2. UNASSIGNABLE IP. If any Intellectual Property Rights in or to the IP Assets cannot be assigned as a matter of law (the “**Unassignable IP Rights**”), Assignors hereby grant to Assignee an exclusive (without reservation), irrevocable, perpetual, worldwide, transferable, fully-paid and royalty-free license, with the right to sublicense through multiple tiers, under the Unassignable IP Rights, to (a) reproduce, create derivative works of, distribute, publicly perform, publicly display, and otherwise use the IP Assets and related Intellectual Property Rights in any medium or format, whether now known or hereafter discovered, (b) use, make, have made, sell, offer to sell, import, and otherwise exploit any product, process, or service based on, embodying, incorporating, or derived from the IP Assets and/or the related Intellectual Property Rights, and (c) fully utilize, exploit, and exercise any and all other present or future rights with respect to the IP Assets and the Intellectual Property Rights in any manner without restriction, and Assignors hereby unconditionally and irrevocably waive and quitclaim to Assignee any and all claims and causes of action of any kind against Assignee, its successors, assigns, and other legal representatives, and its licensees (through multiple tiers) with respect to such rights, and agrees, at Assignee’s request and expense, to consent to and join in any action to enforce such rights. Assignors further waive any “moral” rights, or other rights with respect to attribution of authorship or integrity relating to the IP Assets or related Intellectual Property Rights as Assignors may have under any applicable law under any legal theory.

3. ASSISTANCE. From time to time hereafter, and without further consideration, Assignors and their respective successors and permitted assigns covenant and agree that Assignors and their respective successors and permitted assigns shall execute and deliver, or shall cause to be executed and delivered, such further instruments of conveyance and transfer and take such additional action as Assignee may reasonably request to effect, consummate, confirm or evidence the transfer to Assignee, its successors and assigns all of the IP Assets and Intellectual Property Rights in accordance with the foregoing, including, without limitation, assistance and cooperation in the registration and enforcement of applicable intellectual property rights or other legal proceedings, including providing documents and materials in the possession or control of Assignors, testifying in

any legal proceedings, signing lawful papers and making all lawful oaths at Assignors' expense, and generally doing everything that is reasonable to aid Assignee in obtaining and enforcing proper protection for applicable intellectual property rights and otherwise in the carrying out of the intentions and purposes of this Agreement. If Assignee or its successor or assignee is unable, for any reason, to obtain a signature of an Assignor on a document necessary to perfect the transfer or assignment of the IP Assets or the Intellectual Property Rights, such Assignor hereby irrevocably designates and appoints Assignee and its duly authorized officers and agents, as such Assignor's agents and attorneys-in-fact to act for and on such Assignor's behalf and instead of such Assignor, to execute and file any such document and to do all other lawfully permitted acts to further the purposes of this Agreement with the same legal force and effect as if executed by such Assignor.

4. RECORDATION. Assignors authorize the U.S. Commissioner for Patents and the U.S. Commissioner for Trademarks at the U.S. Patent and Trademark Office (the "PTO") and any other governmental officials of any patent or trademark office worldwide to record and register this Agreement (or a redacted version thereof) upon request by Assignee.

5. PAYMENT.

5.1 Payments to Assignors. In consideration of this Agreement and the rights and licenses granted hereunder, Assignee will pay Assignors an aggregate amount of ten million dollars (U.S. \$10,000,000) in accordance with, and without duplication of any other payment contemplated by, Section 1.3 of the APA. All such amounts will be paid by (or on behalf of) Assignee on the Closing.

5.2 Method of Payment. All amounts due to Assignors hereunder will be paid by wire transfer of immediately available funds in accordance with Section 1.3 of the APA in full satisfaction of all payment obligations under this Agreement to Assignors.

5.3 No Royalty Obligations. Assignors acknowledge and agree that Assignee and its successors and assignees shall not owe Assignors any royalties or other monetary obligations with respect to any of the IP Assets, Intellectual Property Rights, Unassignable IP Rights, or any other proprietary rights related to the business of Assignee.

5.4 Taxes. Assignors shall pay all taxes (including, without limitation, sales and value added taxes) imposed on Assignors by the national government, and any state, local or other political subdivision thereof, of any country in which Assignors are subject to taxation, as the result of Assignee's furnishing of consideration hereunder.

6. GENERAL.

6.1 Expenses. Assignors, jointly and severally, shall pay all costs and expenses incurred by Assignors or Seller on their behalf in connection with this Agreement, including fees and expenses of its financial consultants, accountants and counsel. Assignee shall pay all costs and expenses incurred by Assignee or on its behalf in connection with this Agreement, including fees and expenses of its financial consultants, accountants and counsel.

6.2 Exclusive Agreement. This Agreement (including the Exhibit hereto) and the APA constitutes the sole understanding of the parties with respect to the subject matter hereof. In the

event of a conflict between a term or condition of this Agreement and a term or condition of the APA with respect to the subject matter hereof, the term or condition of this Agreement shall control.

6.3 Governing Law; Venue; Waiver of Jury Trial. This Agreement shall be construed in accordance with and governed by the laws of the State of Delaware applicable to agreements made and to be performed wholly within such jurisdiction, without regard to principles of conflicts of laws. Each of the parties hereby irrevocably and unconditionally (a) consents to submit to the exclusive jurisdiction of the courts of the State of Delaware and the United States located in the County of New Castle for any Action arising out of or relating to this Agreement (and agrees not to commence any Action relating thereto except in such courts), (b) waives and agrees not to plead or claim in any such court that any Action brought in any such court that any such Action brought in any such court has been brought in an inconvenient forum, and (c) waives any and all right to trial by jury in any Action arising out of or related to this Agreement or events contemplated hereby or any course of conduct, course of dealing, statements (whether verbal or written) or actions of any party.

6.4 Successors and Assigns. This Agreement will be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assigns. This Agreement may not be assigned or delegated by an Assignor without the prior written consent of Assignee, and any attempted assignment by an Assignor without such consent shall be null and void. No permitted assignment by an Assignor shall relieve such Assignor of its obligations hereunder. Assignee may assign its rights or delegate its responsibilities, liabilities and obligations under this Agreement, in whole or in part, without the consent of Assignors.

6.5 Severability. (a) If any term or other provision of this Agreement is invalid, illegal or incapable of being enforced by any rule of law or public policy, all other conditions and provisions of this Agreement shall nevertheless remain in full force and effect so long as the economic or legal substance of the Transactions is not affected in any adverse manner to any party and (b) upon such determination that any term or other provision is invalid, illegal or incapable of being enforced, the parties shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible in an acceptable manner so that the Transactions are fulfilled to the greatest extent possible.

Note: Expiration dates for U.S. pending patent applications or U.S. issued patents are not provided. The expiration date of a pending U.S. patent application cannot be calculated until the patent is issued. Furthermore, the expiration date of an issued patent is not based upon a term fixed at grant. A variety of factors must be considered in this calculation. The USPTO suggests that a patent owner or the public should consider the following factors in calculating the expiration date of any given patent:

- type of application (utility, design, plant);
- filing date of the application;
- the grant date of the patent;
- benefit claims under 35 U.S.C. § 120, 121 or 365(c);
- patent term adjustments and extensions under 35 U.S.C. § 154;
- patent term extensions under 35 U.S.C. § 156;
- terminal disclaimer(s); and
- timely payment of maintenance fees.
