SHORT-FORM INTELLECTUAL PROPERTY SECURITY AGREEMENT

WHEREAS, Enerkem Inc. (the "Grantor") has applied for intellectual property and has been issued intellectual property in the United States Patent and Trademark Office, and is the owner of the intellectual property applications and issued intellectual property listed in the attached Schedule of Intellectual Property and Intellectual Property Applications;

WHEREAS, the Grantor has entered into a Deed of Hypothec dated as of December 29, 2017 (as modified from time to time, the "Security Agreement"), in which the Grantor has granted certain interests in favor of GLAS AMERICAS LLC, as Collateral Agent ("Collateral Agent") for the ratable benefit of the Secured Parties (as defined therein); and

WHEREAS, pursuant to the Security Agreement, the Grantor has agreed with the Collateral Agent and the other Secured Parties to execute this Short-Form Intellectual Property Security Agreement;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Grantor hereby grants and confirms the grant, as applicable, to the Collateral Agent for the ratable benefit of the Secured Parties, to the extent provided in the Security Agreement (the terms and conditions of which are hereby incorporated herein), a security interest and hypothec in all of its right, title and interest in, to and under all the intellectual property and intellectual property applications whether now owned or at any time hereafter acquired, of the Grantor issued by, or for which applications have been filed with, the United States Patent and Trademark Office, including the issued intellectual property and intellectual property applications on the attached Schedule of Intellectual Property and Intellectual Property Applications, and all related intellectual property and applications thereto, including all reissuances, continuations, continuations-in-part, revisions, extensions, re-examinations thereof, any intellectual property and intellectual property applications claiming priority to said issued intellectual property and intellectual property applications or from which said intellectual property and intellectual property applications claim priority, and pending applications associated therewith, as collateral security for the prompt and complete payment and performance when due of all the Secured Obligations (as defined in the Security Agreement) (provided that no security interest shall be granted in United States intent-to-use trademark applications to the extent that, and solely during the period in which, the grant of a security interest therein would impair the validity or enforceability of such intent-to-use trademark applications under applicable federal law). Notwithstanding the foregoing, in the event of any conflict between this Short-Form Intellectual Property Security Agreement and the Security Agreement, the Security Agreement shall control.

Date: January 11, 2018

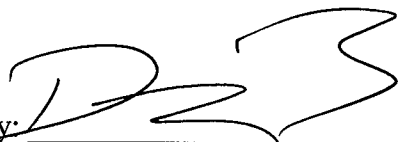

IN WITNESS WHEREOF, the Grantor has caused this Short-Form Patent Security Agreement to be executed and delivered by its duly authorized officer as of the date first set forth above.
