INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

This INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT (this "IP Assignment") is dated as of June 18, 2018, by and between M.T.R.E. Advanced Technologies Ltd., a private limited company incorporated in the State of Israel with company no. 51258194 ("Assignor"), and Belmont Instrument, LLC, a Massachusetts limited liability company ("Assignee"). Assignor and Assignee, and the other parties named therein, are parties to that certain Asset Purchase Agreement (the "Purchase Agreement"), dated as of even date herewith, pursuant to which Assignee will, among other things, purchase Assignor's Intellectual Property, effective as of the Closing Date. All capitalized terms not otherwise defined in this IP Assignment will have their respective meanings set forth in the Purchase Agreement.

RECITALS:

WHEREAS, pursuant to the Purchase Agreement, Assignor has agreed to convey to Assignee all of Assignor's rights, title and interests in and to all of Assignor's Intellectual Property, including the Intellectual Property listed on <u>Exhibit A</u> attached hereto (collectively, the "<u>Assigned IP Rights</u>").

AGREEMENTS:

NOW, THEREFORE, in consideration of the covenants and agreements contained herein and in the Purchase Agreement and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

- 1. <u>Assignment</u>. Assignor hereby irrevocably sells, conveys, assigns, transfers, and delivers to Assignee and its successors and assigns forever, without any restrictions, limitations, or reservations, all of Assignor's right, title, and interest in and to the Intellectual Property, including the Assigned IP Rights, as fully and entirely as the same would have been held and enjoyed by Assignor had this IP Assignment not been made, including (a) any and all rights of priority thereto and renewals thereof, as may now or hereafter be granted to it by law, (b) all associated goodwill, (c) all income, royalties, or payments now or hereafter due or payable with respect thereto, and (d) any and all rights corresponding thereto throughout the world, including rights, interests, claims, and demands recoverable in law or equity that Assignor has or may have in profits and damages for past, present and future infringements of the Intellectual Property, including the right to compromise, sue for, and collect such profits and damages, and Assignee does hereby accept assignment of the Intellectual Property from Assignor.
- 2. Terms of IP Assignment. Assignor and Assignee hereby agree and acknowledge that this IP Assignment is being entered into pursuant to and subject to the terms and conditions set forth in the Purchase Agreement and does not create any additional representations or warranties or alter or amend any of the representations or warranties contained in the Purchase Agreement, nor shall this IP Assignment impair or diminish any of the rights or obligations of the parties to the Purchase Agreement, as set forth therein. In the event of any irreconcilable inconsistency between this IP Assignment and the Purchase Agreement, the Purchase Agreement shall control.

- 3. Recordation. This IP Assignment has been executed and delivered by Assignor with the intention of recording the assignment herein, as applicable, with the U.S. Patent and Trademark Office, the State of Massachusetts Secretary of State, and any other similar governmental authorities throughout the United States and the world, and Assignee shall have the right to record this IP Assignment with any applicable governmental authority throughout the world so as to perfect its ownership of the Intellectual Property, including the Assigned IP Rights.
- Further Assurances. Assignor covenants and agrees, at its own expense, to execute and to deliver, at the request of Assignee, such further instruments of transfer and assignment and to take such other action as Assignee may reasonably request from time to time to more effectively consummate the transfers and assignments contemplated by this IP Assignment, and to take such other action as Assignee may reasonably request of Assignor from time to time, to perfect or record the right or title of Assignee to the Intellectual Property transferred hereby. Assignor shall also, upon Assignee's reasonable request, comply with any required procedures necessary to perfect and complete the transfer of any applicable domain name registrations to Assignee, including but not limited to (a) unlocking the domain names and providing the authorization code for the domain names to Assignee; (b) executing and/or completing such other additional documents or forms as are delivered to Assignor by Assignee or the applicable registrar; and (c) taking the necessary steps required by the applicable registrar to transfer the domain names to Assignee. Assignor agrees to cooperate with Assignee and the applicable registrar to facilitate the filing and processing of all forms and other formalities (including changing passwords, user names and IP addresses) necessary to complete the transfer of the registration for the domain names. Assignor shall, and shall cause its affiliates and persons under its control to, retain the registration for the domain names until they are effectively transferred to Assignee by the domain name registrars.
- 5. <u>Survival</u>. Notwithstanding anything herein to the contrary, the terms and conditions of the Purchase Agreement shall survive the execution and delivery of this IP Assignment.
- 6. <u>Dispute Resolution</u>. Any dispute arising out of or relating to the negotiation, execution, delivery, interpretation, performance, non-performance or enforcement of this IP Assignment will be governed by the Purchase Agreement.
- 7. Assignment. This IP Assignment and all of the provisions hereof will be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assigns, except that neither this IP Assignment nor any of the rights, interests or obligations under this IP Assignment may be assigned or delegated by Assignor, without the prior written consent of Assignee. Notwithstanding the foregoing, (a) Assignee may assign in whole or in part its rights and obligations pursuant to this IP Assignment to one or more of its Affiliates, (b) Assignee may assign this IP Assignment and its rights and obligations under this IP Assignment in connection with a merger or consolidation involving the Assignee, or in connection with a sale of substantially all of the equity or assets of the Assignee or other disposition of substantially all of the Business, and (c) Assignee may assign any or all of its rights pursuant to this IP Assignment or the ancillary documents hereto, to any of its lenders as collateral security.

8. <u>Counterparts</u>. This IP Assignment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Facsimile or signed documents delivered by email or other electronic means shall be deemed to be original signed documents for all purposes hereunder.
