This INTELLECTUAL PROPERTY SECURITY AGREEMENT (the “**Agreement**”) dated October 3, 2018, is made by SKYBELL TECHNOLOGIES, INC. (the “**Grantor**”), in favor of ALARM.COM INCORPORATED, a Delaware limited partnership (the “**Secured Party**”).

WHEREAS, Grantor has entered into a Secured Convertible Promissory Note dated of even date herewith (as amended, amended and restated, supplemented or otherwise modified from time to time, the “**Note**”), with Secured Party. Capitalized terms used herein but not otherwise defined shall have the meanings given to them in the Security Agreement.

WHEREAS, pursuant to the Note, the Grantor agreed to grant the Secured Party a security interest in certain Collateral (as defined in the Note); and

WHEREAS, it is a condition precedent to the Secured Party’s purchasing the Note and making certain financial accommodations available to the Grantor thereunder that the Grantor grant a security interest to Secured Party in, among other property, intellectual property of Grantor and execute this Intellectual Property Security Agreement for recording with the U.S. Patent and Trademark Office and other governmental authorities; and

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound hereby, Grantor agrees as follows:

1. Definitions. Capitalized terms used and not otherwise defined herein shall have the meanings assigned to them in the Note.

2. Grant of Security. Grantor hereby grants to Secured Party a security interest in and to all of Grantor’s right, title and interest and to the following, and also including software, trade secrets, web sites, any other tangible or intangible proprietary or confidential information, and all improvements, modifications, and enhancements to and derivatives of any of the foregoing protected, created, developed and/or arising, as of the date hereof under the laws of the United States or any other jurisdiction, in whatever stage of development (the “**Intellectual Property Collateral**”).

a. (i) all copyrights, registrations and applications for registration, issued or filed, including any reissues, extensions or renewals thereof, by or with the United States Copyright Office or any similar office or agency of the United States, any state thereof, or any other country or political subdivision thereof, or otherwise, including, but not limited to, all rights in and to the material constituting the subject matter thereof, (ii) any rights in any material which is copyrightable or which is protected by common law, United States copyright laws or similar laws or any law of any state thereof, and (iii) any agreement, written or oral, providing for a grant by or to the Grantor of any right in any Copyright, including, without limitation, any thereof referred to in Schedule I hereto.

b. (i) all letters patent of the United States or any other country or any political subdivision thereof, and all reissues and extensions thereof, (b) all applications for letters patent of the United States and all divisions, continuations and continuations-in-art thereof or any other country or any political subdivision, and (iii) all agreements, whether written or oral, providing for the grant by or to the Grantor of any right to manufacture, use or sell any invention covered by a patent, including, without limitation, any thereof referred to in Schedule I hereto.

c. (i) all trademarks, trade names, corporate names, company names, business names, fictitious business names, trade styles, service marks, logos and other source or business

identifiers, and the goodwill associated therewith, now existing or hereafter adopted or acquired, all registrations and recordings thereof, and all applications in connection therewith, whether in the United States Patent and Trademark Office or in any similar office or agency of the United States, any state thereof or any other country or any political subdivision thereof, or otherwise, (ii) all reissues, extensions or renewals thereof, and (iii) any agreement, written or oral, providing for the grant by or to the Grantor of any right to use any Trademark, including, without limitation, any thereof referred to in Schedule I hereto.

3. Security for Obligations. The grant of a security interest in the Intellectual Property Collateral by Grantor under this Agreement secures the payment of all of the indebtedness under the Note.
