## INTELLECTUAL PROPERTY ASSIGNMENT

This Intellectual Property Assignment (“Assignment”), dated as of April 30, 2019 (the “Effective Date”), between Weatherford Technology Holdings, LLC, a Delaware limited liability company, Weatherford U.S, L.P., a Louisiana limited partnership, and Weatherford/Lamb, Inc., a Delaware corporation (the “Assignors”), and Stratum Reservoir (US), LLC, a Delaware limited liability company (“Assignee”). Assignors and Assignee may be referred to herein individually as a “Party” and collectively as the “Parties.” Capitalized terms used but not defined in this Assignment shall have the respective meanings ascribed to them in the Sale and Purchase Agreement by and among Weatherford Worldwide Holdings GmbH, a Swiss company with limited liability (“Seller”), Stratum Reservoir Intermediate, LLC, a Delaware limited liability company formerly known as Oil & Gas Labs, LLC, (“Purchaser”), and Energy Reservoir Holdings, LLC, a Delaware limited liability company formerly known as Oil & Gas Labs Holdings, LLC, dated October 18, 2018 (the “Purchase Agreement”).

### RECITALS

WHEREAS, pursuant to the terms and conditions of the Purchase Agreement, Seller has agreed to sell, convey, transfer and assign (or cause to be sold, conveyed, transferred or assigned) to Purchaser, and Purchaser has agreed to purchase (or cause to be purchased) all of Seller and its applicable Affiliates’ right, title and interest in and to all of the Transferring Intellectual Property on the terms and subject to the conditions set forth in the Assignment.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and as more fully set forth in the Purchase Agreement and subject to the terms and conditions therein, the Parties, intending to be legally bound, hereby agree as follows:

1. Effective as of the Effective Date, Assignors hereby irrevocably and unconditionally assign, convey, deliver and transfer to Assignee all of Assignors’ right, title and interest in and to all Transferring Intellectual Property, including without limitation all worldwide right, title and interest in and to:

(a) all utility patents, utility model patents, design patents and industrial designs and inventors’ certificates, all applications for and inventions disclosed in any of the foregoing, including all provisionals, divisionals, continuations, continuations-in-part, reissues, reexaminations, renewals and extensions of any of the foregoing and all rights to claim priority of any of the foregoing, identified in Schedule A attached hereto (the “Patents”);

(b) all trademarks, service marks, certification marks, trade dress, trade names, logos, domain names and all registrations and applications therefor identified in Schedules B attached hereto (the “Trademarks”), together with all goodwill associated with any of the foregoing;

(c) all of Assignors’ right to file patent, trademark and copyright applications in the United States and throughout the world for the Transferring Intellectual Property;

(d) all of Assignors’ rights in the Transferring Intellectual Property to (A) maintain all applications, registrations, renewals and extensions thereof and (B) commercialize, exploit, grant licenses or other interests therein; and

(e) all rights to sue and prosecute for past, present and future infringement, misappropriation or other violation of rights related to the Transferring Intellectual Property, and all rights corresponding thereto throughout the world for the Transferring Intellectual Property rights assigned herein.

2. Authorization. Assignors authorize and request the Commissioner of Patents and Trademarks of the United States, the United States Copyright Office and the corresponding entities or agencies in any applicable foreign jurisdictions, whose duty is to issue patents or other evidence or forms of industrial property protection on applications as aforesaid, to issue the same to Assignee and to record Assignee as owner of the Patents, Trademarks and Copyrights, as assignee of the entire right, title and interest in, to and under the same, for the sole use and enjoyment of Assignee, its successors, assigns or other legal representative.

3. Notwithstanding anything in this Assignment to the contrary, Assignee acknowledges and agrees that the only representations and warranties given by Seller or Assignors with respect to the Transferring Intellectual Property are set forth in the Purchase Agreement.

4. Further Assurances. Without expanding the scope of Section 5.7 of the Purchase Agreement, Assignors shall for a period of 1 year following the Effective Date provide the Assignee, its successors and assigns with such assistance as it may reasonably request and at Assignee's expense to record Assignee as assignee of the Patents, Trademarks and Copyrights, including, without limitation, upon request by the Assignee by executing and if necessary, using commercially reasonable efforts to request current or former employees or contractors execute, as applicable, all appropriate applications and any further recordable form assignments or other documents or instruments. Without limiting the foregoing, Assignors will at Assignee's request and sole cost during such 1 year period do all things necessary, proper or advisable to reasonably assist Assignee in transferring all domain names assigned herein, including as applicable, placing each of the domain names in "unlocked" status and providing to Assignee the Internet domain name registrars' transfer authorization codes for each of the domain names and any other information reasonably required to effectuate the transfer of Assignors' right, title and interest in the domain names to Assignee.

5. Governing Law. This Assignment shall be governed by and construed in accordance with the laws of the State of Texas, without regard to the conflicts of law rules of such state. This Assignment is binding upon, and inures to the benefit of, the Parties and their respective successors and assigns. No waiver, modification or amendment of any provision of this Assignment shall be valid unless in writing and signed by the Party against whom such claimed waiver, modification or amendment is sought to be enforced.

6. Counterparts. This Assignment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement.

7. Entire Agreement. This Assignment and the Purchase Agreement represent the entire agreement between the parties with respect to the subject matter hereof and may be modified or amended only by a writing signed by both parties that specifically mentions this Assignment.

8. Binding Agreement. This Assignment shall be binding on and inure to the benefit of Assignee and Assignors and their respective successors and assigns. In the event of a conflict between this Assignment and the Purchase Agreement, the Purchase Agreement shall control.
