TRADEMARK ASSIGNMENT

This Trademark Assignment, dated as of September 20, 2019, is made and entered into by and between NuMet Industries, Inc., a Delaware corporation (“Assignor”), and NuMet Machining Techniques, Inc., a Connecticut corporation (“Assignee”).

WHEREAS, Assignor is the owner of the trademark registration identified in Schedule A and desires to assign the trademark registration to Assignee; and

WHEREAS, Assignee desires to accept all of Assignor’s right, title and interest in and to the trademark registration.

NOW, THEREFORE, for good and valuable consideration, the sufficiency and receipt of which is hereby acknowledged, Assignor and Assignee agree as follows:

Assignor, hereby sells, transfers, assigns, and conveys to Assignee, all of Assignor’s right, title and interest in and to the trademark registration listed on Schedule A attached hereto and made a part hereof, as well as the goodwill associated therewith, and any and all common law trademark rights associated therewith; and any renewals thereof; all income, royalties, damages, license fees, licenses and payments now and hereafter due and/or payable with respect thereto; and any and all United States and/or foreign trademark (or service mark) registrations which may issue on the same in the future (collectively, the “Trademark”), the same to be held and enjoyed by Assignee for its own use and benefit, and for the use and benefit of its successors, assigns, or legal representatives, to the end of the term or terms for which such Trademark may be granted or reissued, as fully and entirely as the same would have been held and enjoyed by Assignors if this sale and assignment had not been made. Assignor also assigns unto Assignee all claims for damages by reason of infringement prior to the date hereof of the Trademark throughout the world, with the right to sue for and collect the same for its own use and benefit, and for the use and benefit of its successors, assigns and other legal representatives.

Assignor hereby covenants and warrants that it is transferring any rights it has with respect to the above-described worldwide right, title and interest by this instrument, free of any encumbrances, and that no other agreement has been or will be executed in conflict herewith.

Assignor agrees without charge to Assignee to execute and deliver to Assignee such instruments necessary or desirable to perfect the above-described transfer of, or to procure, the Trademark or to maintain the Trademark before both the United States Patent and Trademark Office and the Trademark Offices of any and all foreign countries, and to cooperate reasonably with Assignee in obtaining and/or providing information that is required in any proceedings relating to the Trademark.

Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks of the United States, and the appropriate official in any other country, to issue any and all additional trademark and service mark registrations or amended registrations that have been or may be granted upon any application or petition for same for the Trademark or any additional, continuing or divisional applications thereof to, to Assignee, its successors and/or assigns.

This Trademark Assignment may be executed in one or more counterparts, each of which

when executed shall be deemed to be an original but all of which taken together shall constitute one and the same agreement. Delivery of an executed counterpart of a signature page to this Trademark Assignment by electronic mail or facsimile shall be as effective as delivery of a manually executed counterpart of this Trademark Assignment.

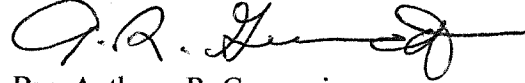

No provision of this Trademark Assignment may be amended or modified except by a written instrument signed by the parties hereto.

This Trademark Assignment and any disputes or controversies arising hereunder shall be construed and enforced in accordance with, and governed by the internal laws of, the State of Delaware without giving effect to the conflicts of laws principles thereof that would apply the laws of any other jurisdiction.
