WHEREAS, pursuant to an agreement including an obligation to assign, the undersigned corporation assigned and transferred to Assignee, **December 31, 2019**, all right, title, and interest, including the right to sue for past infringement and to collect for all past, present and future damages, for the United States of America (as defined in 35 U.S.C. § 100) and throughout the world, for good and valuable consideration received at that time,

(a) each of the Patents, Patent Applications, Trademark Registrations, and Trademark Applications that are described in detail in Schedule A, annexed hereto and made a part hereof, and

(b) in any and all applications that claim the benefit of the patent or trademark applications described in detail in Schedule A, including non-provisional applications, continuing (continuation, divisional, or continuation-in-part) applications, reissues, extensions, renewals and reexaminations of the patent application or Letters Patent or Registration therefor listed above in part (a), to the full extent of the term or terms for which Letters Patents or Registrations issue, and

(d) in any and all associated intellectual property rights in each of the Trademark Registrations and Trademark Applications that are described in detail in Schedule A (hereinafter referred to as “the Marks”), including the entire right, title, and interest in and to the Marks, and the goodwill of the business associated with the Marks, and is a successor to the portion of the Assignor’s business to which the Marks pertain;

WHEREAS, a recordable document is needed to demonstrate the assignment of the application(s) or any non-provisional, continuing (continuation, divisional, or continuation-in-part), reissue or reexamination application(s) thereof;

NOW, THEREFORE, the undersigned corporation does hereby confirm, pursuant to an agreement including an obligation to assign, and for good and valuable consideration received at the time, that it assigned and transferred to Assignee, its representatives, successors, and assigns, its entire right, title and interest, including the right to sue for past infringement and to collect for all past, present and future damages, in the United States and throughout the world, (a) in the application(s), in any and all applications thereon, and in any and all Letters Patent(s) or Registrations(s) therefor, and (b) in any and all applications that claim the benefit of the patent or trademark application listed above in part (a), including continuing applications, reissues, extensions, renewals and reexaminations of the patent applications or Letters Patent therefor listed above in part (a), to the full extent of the term or terms for which Letters Patents or Registrations issue, and (c) in any and all inventions described in the patent application listed above in part (a), and in any and all forms of intellectual and industrial property protection derivable from such patent application, and that are derivable from any and all continuing applications, reissues, extensions, renewals and reexaminations of such patent application, including, without limitation, patents, applications, utility models, inventor's certificates, and designs together with the right to file applications therefor, and (d) in any and all associated intellectual property rights, including the entire right, title, and interest in and to the Marks, and the goodwill of the business associated with the Marks; and including the right to claim the same priority rights from any previously filed applications under the International Agreement for the Protection of Industrial Property, or any other international agreement, or the domestic laws of the country in which any such application is filed, as may be applicable; all such rights, title and interest to be held and enjoyed by the above-named Assignee, its successors, legal representatives and assigns to the same extent as all such rights, title and interest would have been held and enjoyed by the undersigned inventor(s) had this assignment and sale not been made.
