ASSIGNMENT OF PATENT AND TRADEMARK RIGHTS

THIS ASSIGNMENT OF PATENT AND TRADEMARK RIGHTS

(“Assignment”) is made and entered into as of September 2, 2020 (“Effective Date”).

WHEREAS, INTOUCH TECHNOLOGIES, INC., a Delaware corporation, with an office at 7402 Hollister Ave, Goleta, CA 93117 (“Assignor”), is the owner of the patents and patent applications listed on Schedule A attached hereto (the “Patents”) and the trademark registrations and applications listed on Schedule B attached hereto (the “Trademarks”); and

WHEREAS, TELADOC HEALTH, INC., a Delaware corporation, with offices at 2 Manhattanville Rd, Suite 203, Purchase, NY 10577 (“Assignee”), is desirous of acquiring from Assignor the entire worldwide right, title and interest in and to the Patents and Trademarks.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby sells, assigns and transfers to Assignee (a), the entire worldwide right, title, and interest in and to the Trademarks, all related common law rights and the goodwill pertaining thereto, together with all income, royalties, damages or payments due or payable as of the Effective Date or thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Trademarks, or for unfair competition in business in connection therewith, with the rights to sue for, and collect the same for its own use and enjoyment, and for the use and enjoyment of its successors, assigns, or other legal representatives, as fully and entirely as the same would or could have been held and enjoyed by Assignor had this Assignment not been made; (b) the entire worldwide right, title and interest in and to the Patents, including any continuations, divisions, continuations-in-part, reissues, reexaminations, extensions or foreign equivalents thereof, and including the subject matter of all claims which may be obtained therefrom for its own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, together with all income, royalties, damages or payments due or payable as of the Effective Date or thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Patents, with the right to sue for, and collect the same for its own use and enjoyment, and for the use and enjoyment of its

successors, assigns, or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment and sale had not been made;

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed and delivered by their duly authorized officers as of the Effective Date.

Goods/Services

009

Mobile robotic systems comprised of computer hardware, computer operating software, monitors, cameras, motors, sensors, power sources and mobile platforms remotely operated and guided through an environment by an individual operator to remotely receive and transmit audio and video communications for real-time verbal and visual communication between individuals via a broadband Internet connection for use in wireless Internet video communications; remotely controlled systems for use in wireless telecommunication systems comprised of computer hardware, computer software, monitors, and cameras that may be controlled by a remote operator to transmit two-way audio and video communications comprised of computer hardware, computer software, monitors, cameras, motors, sensors, and mobile platforms that can be guided and moved through an environment by a remote operator to transmit two-way audio and video communications and other electronic data, all aforementioned used for telemedicine purposes.

010

Telemedicine, telehealth and telecare systems, namely, mobile patient monitoring and communication devices consisting of hardware and software for monitoring, measuring, transmitting and reporting medical data, environmental data, location data or alarm to a remote medical center or provider for online monitoring and advice and for communication between patients and providers.

038

Communications services, namely, transmission of voice, audio, visual images and data by telecommunication networks, wireless communication networks, the Internet, global computer networks, information services networks and data networks, transmission of sound, data, images, and information via a global computer network; electronic message delivery services; audio and video broadcasting services over the Internet; providing controlled access service to maintain databases of patient health information, all aforementioned used in connection with telemedicine services.

042

Providing temporary use of online non-downloadable cloud computing software for database management, electronic storage of data, and collecting, integrating, translating and managing data; providing technology enabling physicians to access resources in clinical medicine via a website; platform-as-a-service (PaaS) featuring computer software platforms for backend workflow management and video-enabled asynchronous communication systems to improve care coordination, patient engagement, and telehealth services for healthcare systems and providers; computer software development, computer system design and integration services, namely, creating, maintaining and hosting physician web portals and applications to enable electronic health records, electronic health information exchange, and telehealth and computer technology support services, namely, help desk services; technical support services, namely, troubleshooting in the nature of maintenance and repair of computer networking software relating to a communications network through onsite, telephonic and on-line chat assistance; technical support services, namely, diagnosing computer hardware and software relating to a communications network problem through onsite, telephonic and on-line chat assistance, all aforementioned used in connection with telemedicine services.

044

Healthcare and medical consultancy, information and advisory services; Telehealth services, namely, providing healthcare and health-related information via telecommunication technologies; Providing a website for medical professionals featuring medical information related to remote telehealth patient monitoring, consulting and diagnosis; Healthcare services, namely, telehealth and remote patient monitoring clinical services and nursing services for medical diagnosis and treatment purposes; Integrated telehealth management, namely, disease management programs and treatment recovery programs; Providing a website for medical professionals featuring medical information from remote locations via electronic patient monitoring and consulting devices that feed information to the website that can be accessed in real-time and through cloud computing by medical professionals for purposes of monitoring and diagnosing medical conditions and consulting with patients.

009

Mobile robotic systems comprised of computer hardware, computer operating software, monitors, cameras, motors, sensors, power sources and mobile platforms remotely operated and guided through an environment by an individual operator to remotely receive and transmit audio and video communications for real-time verbal and visual communication between individuals via a broadband Internet connection for use in wireless Internet video communications; remotely controlled systems for use in wireless telecommunication systems comprised of computer hardware, computer software, monitors, and cameras that may be controlled by a remote operator to transmit two-way audio and video communications comprised of computer hardware, computer software, monitors, cameras, motors, sensors, and mobile platforms that can be guided and moved through an environment by a remote operator to transmit two-way audio and video communications and other electronic data, all aforementioned used for telemedicine purposes.

010

Telemedicine, telehealth and telecare systems, namely, mobile patient monitoring and communication devices consisting of hardware and software for monitoring, measuring, transmitting and reporting medical data, environmental data, location data or alarm to a remote medical center or provider for online monitoring and advice and for communication between patients and providers.

038

Communications services, namely, transmission of voice, audio, visual images and data by telecommunications networks, wireless communication networks, the Internet, global computer networks, information services networks and data networks, transmission of sound, data, images, and information via a global computer network; electronic message delivery services; audio and video broadcasting services over the Internet; providing controlled access service to maintain databases of patient health information, all aforementioned used in connection with telemedicine services.

042

Providing temporary use of online non-downloadable cloud computing software for database management, electronic storage of data, and collecting, integrating, translating and managing data; providing technology enabling physicians to access resources in clinical medicine via a website; platform-as-a-service (PaaS) featuring computer software platforms for backend workflow management and video-enabled asynchronous communication systems to improve care coordination, patient engagement, and telehealth services for healthcare systems and providers; computer software development, computer system design and integration services, namely, creating, maintaining and hosting physician web portals and applications to enable electronic health records, electronic health information exchange, and telehealth and computer technology support services, namely, help desk services; technical support services, namely, troubleshooting in the nature of maintenance and repair of computer networking software relating to a communications network through onsite, telephonic and on-line chat assistance; technical support services, namely, diagnosing computer hardware and software relating to a communications network problem through onsite, telephonic and on-line chat assistance, all aforementioned used in connection with telemedicine services.

044

Healthcare and medical consultancy, information and advisory services; Telehealth services, namely, providing healthcare and health-related information via telecommunication technologies; Providing a website for medical professionals featuring medical information related to remote telehealth patient monitoring, consulting and diagnosis; Healthcare services, namely, telehealth and remote patient monitoring clinical services and nursing services for medical diagnosis and treatment purposes; Integrated telehealth management, namely, disease management programs and treatment recovery programs; Providing a website for medical professionals featuring medical information from remote locations via electronic patient monitoring and consulting devices that feed information to the website that can be accessed in real-time and through cloud computing by medical professionals for purposes of monitoring and diagnosing medical conditions and consulting with patients.
