TRADEMARK ASSIGNMENT

This Trademark Assignment (this "Assignment") is made as of March 1, 2021 (the "Effective Date"), by SAI Global Pty Limited, an Australian limited company with a principal business address at Level 37, 680 George Street, Sydney New South Wales 2000, Australia ("Assignor"), to SAI Compliance, Inc., a Delaware corporation with a principal place of business at 205 West Wacker Drive, Suite 1800, Chicago, IL 60606, United States ("Assignee").

WHEREAS, Assignor has adopted, owns, and is using the trademarks identified in Exhibit A attached hereto (the "Trademarks");

WHEREAS, Assignor owns the United States registrations for the Trademarks set forth in Exhibit A;

WHEREAS, Assignor desires to assign, transfer and convey the Trademarks to Assignee; and

WHEREAS, Assignee desires to acquire the Trademarks, and the registrations therefor set forth in Exhibit A from Assignor.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby irrevocably sells, assigns, conveys, delivers and transfers to Assignee all rights, title, and interest in and to the Trademarks, together with all goodwill of the business connected with the use of and symbolized by the Trademarks and the right to claim, prosecute and recover monetary damages for any and all past, present and future infringements, misappropriations, dilutions and other violations thereof.

FURTHER, Assignor hereby agrees to execute and provide, promptly after its execution hereof, such further instruments, documents or assignments, and take all actions as may be necessary or desirable, as Assignee may reasonably request to effectuate the purposes of this transaction and to consolidate, vest and record in Assignee all of Assignor's rights in and to the Trademarks, in each case, without further compensation. In the event that Assignor fails to execute any such document or take any such action as set forth in the preceding sentence, Assignor hereby designates Assignee as Assignor's agent, and hereby grants to Assignee a power of attorney with full power of substitution, which power of attorney shall be deemed coupled with an interest, for the purpose of executing such documents or taking such actions.

FURTHER, Assignor hereby authorizes and requests the officials of the United States Patent and Trademarks Office, and the corresponding entities or agencies in any applicable foreign jurisdiction, to record and register Assignee as assignee and owner of all right, title and interest in, to and under the Trademarks.

FURTHER, this Assignment shall be governed by, and construed in accordance with, the laws of the State of Delaware without regard to the choice of law principles thereof. No waiver, modification or change of any provision of this Assignment shall be valid unless in writing and signed by the party against whom such claimed waiver, modification or change is sought to be enforced.

FURTHER, to expedite the process of entering into this Assignment, the parties acknowledge that Transmitted Copies of this Assignment will be equivalent to original documents. "Transmitted Copies" means executed copies that are reproduced and/or transmitted electronically via PDF, email, facsimile, DocuSign or other process of complete and accurate reproduction and transmission.

IN WITNESS WHEREOF, this Assignment has been executed and delivered as of the Effective Date.

compliance management, training management, workflow management, health management, safety management, environment management, workplace health and safety management, occupational health and safety management, incident management, corporate governance, performance management, risk assessment, risk management, policy management and knowledge management; software as service for use in cyber security risk management; software as a service (SaaS) for auditing and risk assessment in the field of Information and Communication Technology, Information and Communication Technology security, information risk management, Information and Communication Technology security systems and Information and Communication Technology security systems and Communication Technology security systems and businesses to develop customized information and communication technology security solutions and information risk management solutions; Information and Communication Technology governance and compliance solutions being Information and Communication Technology consultancy; web-based software, including application software, for use in audit and compliance management, health management, safety management, environment management, workplace health and safety management, occupational health and safety management, incident management, corporate governance, performance management, risk assessment, risk management, policy management and knowledge management; providing online non-downloadable computer software in the field of audit and compliance management, health management, safety management, environment management, workplace health and safety management, occupational health and safety management, corporate governance, performance management, risk assessment, risk management, policy management and knowledge management, application security, compliance, data privacy, data loss, and data leak prevention; preparation of reports in the field of audit and compliance management, health management, safety management, environment management, workplace health and safety management, occupational health and safety management, incident management, corporate governance, performance management, risk assessment, risk management, policy management and knowledge management; preparation of technical reports; preparation of reports relating to computer programs; software as a service for use in the provision of information and Communication Technology security by way of vulnerability scanning, virus scanning and intrusion prevention; online non-downloadable computer software for enterprise risk management; online non-downloadable computer software applications for storing, managing, tracking, analyzing and reporting data through development of solutions usable in enterprise governance, risk assessment, business rules design for compliance and internal controls, information security, business analysis, executive board and audit committee planning; software as a service featuring computer software platforms for use in creating learning management systems for tracking and measuring professional growth, leadership skills, management skills and business skills of employees and individuals; software as a service (SaaS) services featuring software for use in creating a workplace training platform and learning management system in the field of business skills education and professional development; platform as a service (PaaS) featuring computer software platforms for use in creating learning management systems for tracking and measuring professional growth, leadership skills, management skills and business skills of employees and individuals; providing temporary use of online non-downloadable learning management software; providing temporary use of online non-

downloadable communication management software; software as a service (SaaS) featuring learning and communication management; platform as a service (PaaS) featuring learning and communication management; providing quality assurance services in the field of industry standards across all business and industry types for governments, industrial and trade associations, professional bodies, consumer organizations, business and individuals; providing information in the field of quality assurance through sampling services across all business and industry types for governments, industrial and trade associations, professional bodies, consumer organizations, businesses and individuals; testing, analysis and evaluation of the goods and services of others for the purpose of quality assurance; inspection, quantity and quality control, supervision and verification of the quality and quantity of raw materials, commodities, manufactured, semi manufactured and transformed goods or goods of any other nature and their conformity with national and international norms, laws, rules, practice and standards and with clients' contractual requirements; software as a service (SaaS) services featuring software for use in evaluating compliance with state and federal laws and regulations; testing, analysis and evaluation of service providers to determine conformity with established accreditation standards; software as a service featuring software for business in relation to documenting processes, identifying and documenting controls, developing risk matrices, planning audits and reporting in the field of legal compliance with state and federal laws and regulations; providing temporary use of non-downloadable cloud-based software for statutory compliance, regulatory compliance, legal compliance, compliance with professional standards, compliance with government standards, compliance with industry standards and compliance with ethical standards; software as a service featuring software for evaluating, assessing, auditing, monitoring and managing compliance; software as a service featuring software used for evaluating, assessing, auditing, monitoring, managing, minimizing and navigating risk; compliance monitoring services; providing temporary use of non-downloadable software for compliance monitoring; software as a service (SaaS) services featuring software for use in evaluating, assessing, auditing, monitoring and managing compliance with professional standards, compliance with government standards, compliance with industry standards and compliance with ethical standards; consulting services, namely, designing, creating, implementing and maintaining computer software for use in the field of risk and compliance management and policy management for creating an effective control environment across an organization, ensuring the compliance obligations of an organization are satisfied, the recording, resolving and reporting of incidents and problems across or within an organization; software as a service (SaaS) featuring software for risk, compliance and policy management, creating an effective control environment across an organization, ensuring the compliance obligations of an organization are satisfied, the recording, resolving and reporting of incidents and problems across or within an organization, managing workflow within an organization, and to improve efficiency within an organization; Software as a service (SaaS) services, namely, hosting software for use by others for risk, compliance and policy management, creating an effective control environment across an organization, ensuring the compliance obligations of an organization are satisfied, the recording, resolving and reporting of incidents and problems across or within an organization, managing workflow within an organization, and to improve efficiency within an organization; software as a service featuring software for use in policy

management, policy improvement, policy oversight and policy compliance; computer, information technology and security consultancy services being information security consulting, being privacy consulting, regulatory compliance consulting, information technology governance consulting, information technology consulting, business process consulting; online provision of web-based computer software for managing workflows, collecting, recording, analyzing and reporting data and in the field of audit management, business, management, finance, legal matters, regulatory matters, information technology, information security, information management, training management, workflow management, health management, action management, compliance management, environment management, workplace health and safety management, occupational health and safety management, incident management, corporate governance, performance management, risk assessment, risk management, policy management and knowledge management; online provision of web based applications for managing workflows, collecting, recording, analyzing and reporting data and in the field of audit management, business, management, finance, legal matters, regulatory matters, information technology, information security, information management, information security, information security, compliance, business management, action management, compliance management, training management, workflow management, health management, safety management, environment management, workplace health and safety management, occupational health and safety management, incident management, corporate governance, performance management, risk assessment, risk management, policy management and knowledge management; hosting of software as a service (SaaS) for managing workflows, collecting, recording, analyzing and reporting data and in the field of audit management, business, management, finance, legal matters, regulatory matters, information technology, information security, information management, information security, compliance, business management, action management, compliance management, training management, workflow management, health management, safety management, environment management, workplace health and safety management, occupational health and safety management, incident management, corporate governance, performance management, risk assessment, risk management, policy management and knowledge management; and in the field of audit management, business, management, finance, legal matters, regulatory matters, information technology, information security, information management, information security, compliance, business management, action management, compliance management, training management, workflow management, health management, safety management, environment management, workplace health and safety management, occupational health and safety management, incident management, corporate governance, performance management, risk assessment, risk management, policy management and knowledge management; cloud computing environments; computer forensic services; computer services, namely, integration of private and public communications network; computer forensic services; computer services, namely, integration of private and public cloud computing environments; providing online non-downloadable corporate data recovery services; data encryption and decoding services; providing online non-downloadable corporate compliance software for training, tracking, investigation management, corporate ethics and values communication, and incident reporting; providing online non-downloadable software featuring corporate compliance training modules for obtaining and maintaining an entity's compliance with applicable laws, rules, regulations and internal policies; providing temporary use of non-downloadable software applications via the internet for corporate governance, compliance, ethics, and management; computer monitoring service which tracks application software performance, performs periodic maintenance and provides reports and alerts concerning such performance; educational software as a service featuring instruction in business, management, finance, legal matters, regulatory matters, information technology, information technology

security, information management, information security, compliance, risk management, corporate governance, corporate social responsibility, engineering, real estate, industry, the environment, environmental sustainability, greenhouse gas emissions and verification, forestry, forestry chain of custody, food, food safety, animal and livestock welfare, husbandry and management, transport animals and livestock, slaughtering of animals and livestock, occupational and work place health and safety, disability services, information technology, information technology security, information management, information security, healthcare services, medical devices, property and assets; software as a service for the management of standards, technical, quality, management, product, process, industry and commercial standards; electronic monitoring of credit card activity to detect fraud via the internet; digital identity access rights management for protecting data and information from unauthorized access, namely, monitoring computer systems for detecting unauthorized access or data breach; computer security services, namely, restricting unauthorized access to hard drives and computer networks containing personal information for purposes of protecting data and information from unauthorized access; online privacy management, namely, authentication, assurance, validation, and revocation of digital certificates and consent receipts providing user authentication services in bilateral e-commerce transactions, open data flows, data synchronization, security, password management and protection, biometric identification, matching, and authentication; computer security services for the protection of personal information; Maintenance of computer software relating to computer security and prevention of computer risks; computer database consultancy services in the field of maintaining the security and integrity of databases; computer consulting services in the field of maintaining the security and integrity of databases; providing an online non-downloadable Internet-based system application featuring technology enabling users to create a Virtual Evidence Room, for legal purposes, linking all policies, surveys, assessments, attestations, incidents, audits, contract, projects and tasks directly to laws, regulations, standards and guidelines

IC 045. US 100 101. G & S: Verification of personal identity as part of personal background investigations; advisory services relating to regulatory affairs in the nature of regulatory compliance consulting in the field of industry standards across all business and industry types for governments, industrial and trade associations, professional bodies, consumer organizations, business and individuals; reviewing standards and practices and preparing reports relating to compliance with laws and regulation in the field of industry standards and practices across all business and industry types for governments, industrial and trade associations, professional bodies, consumer organizations, business and individuals; regulatory services, namely, reviewing standards and practices to assure compliance with industry standards and practices across all business and industry types for governments, industrial and trade associations, professional bodies, consumer organizations, business and individuals; advisory and information services relating to standards, namely, reviewing standards and practices to assure compliance with industry standards and practices across all business and industry types for governments, industrial and trade associations, professional bodies, consumer organizations, business and individuals; consultancy with regard to compliance with official regulations, namely, assessment of legal requirements and obligations and the effects thereof in the field of industry standards and practices across all business and industry types for governments, industrial and trade

		<p>associations, professional bodies, consumer organizations, business and individuals; reviewing standards and practices to assure compliance with federal, state, local and individually established laws, regulations and procedures in the field of industry standards and practices across all business and industry types for governments, industrial and trade associations, professional bodies, consumer organizations, business and individuals; legal information services; providing legal information regarding parliamentary bills, international treaties, regional directives, legislation, regulations, policy documentation, governmental documents, codes of conduct and information and documentation on and relating to governmental, non-governmental, industry and professional bodies; regulatory compliance consulting in the field of state and federal laws and regulations; regulatory compliance consulting services, namely, consulting on standards and practices to assure compliance with laws and regulations; regulatory compliance services, namely, reviewing standards and practices to identify and assess compliance-related risks with respect to laws and regulations; reviewing standards and practices to assure compliance with laws and regulations; providing information on compliance with laws and regulations; providing a database via the internet of research and analysis memoranda on legal issues; providing regulatory compliance consultation and information in the field of workplace health, safety and environmental compliance; regulatory compliance monitoring in the field of business; provision of information on compliance with laws relating to commercial and business activities; regulatory compliance consulting in the field of business regulatory compliance, namely, compliance with professional standards, compliance with government standards, compliance with industry standards and compliance with ethical standards</p>
