RECITALS

WHEREAS, Assignor is the owner of certain intellectual property set forth in Exhibit A;

WHEREAS, pursuant to that certain Asset Purchase Agreement between Assignor and Assignee dated as of April 26, 2022, as amended to date, Assignor has conveyed, transferred, and assigned to Assignee, among other assets, certain intellectual property set forth in Exhibit A, along with any and all goodwill relating thereto (collectively, the “**IP**”); and

WHEREAS, Assignor and Assignee have agreed to enter into this Assignment Agreement as further evidence of Assignor’s assignment of its rights in and to the IP pursuant to the Agreement;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. Assignment. As of the Effective Date, Assignor hereby irrevocably sells, assigns, transfers, and conveys to Assignee and its successors, assigns, and nominees, and Assignee hereby accepts, all of Assignor’s right, title, and interest worldwide in and to the following IP:

(a) the patents and patent applications set forth in Exhibit A hereto, including without limitation the entire right, title, and interest in and to the inventions described in the applications for such Patents in any form or embodiment thereof; patent applications filed in any country based thereon; patent applications filed under the provisions of any applicable international treaty; any and all patents or reissues or extensions thereof to be obtained in any country upon said inventions and any divisional, continuation, continuation-in-part or substitute applications which have been filed or may be filed upon said invention or inventions in any country (the “**Patents**”);

(b) the trademark registrations and applications set forth in Exhibit A hereto and all issuances, extensions, and renewals thereof (the “**Trademarks**”), together with the goodwill of the business connected with the use of, and symbolized by, the Trademarks, including all common law rights and trademark registrations for the Trademarks, same to be held by Assignee for Assignee’s own use and enjoyment, and for the use and enjoyment of Assignee’s successors, assigns and other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made;

(c) the domain names and social media accounts set forth in Exhibit A hereto and all issuances and renewals thereof (the “**Domains**”);

(d) all rights of any kind whatsoever of Assignor accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions, and otherwise throughout the world;

(e) any and all royalties, fees, income, payments, and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and

(f) any and all claims and causes of action with respect to any of the foregoing, whether accruing before, on, or after the date hereof, including all rights to and claims for damages, restitution, and injunctive and other legal and equitable relief for past, present, and future infringement, dilution, misappropriation, violation, misuse, breach, or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

2. Further Assurances. Assignor further agrees to execute all documents and do all such other things as may be necessary or appropriate to carry out the intent and/or purpose of this Assignment Agreement, including but not limited to executing all necessary deeds, agreements or other documents required at law to effect registration or recordal of the assignment of the intellectual property listed in Exhibit A in any jurisdiction. In addition, and without limiting the generality of the foregoing, Assignor further agrees, at the request of Assignee or its successors in interest, to do all lawful acts which may be required for obtaining and enforcing the intellectual property rights in the IP, and to otherwise aid Assignee or its successors in interest in enforcing intellectual property rights in the IP, all at the expense of Assignee or its successors in interest.

3. Power of Attorney. To the extent Assignor fails to take actions in accordance with Section 2 within a reasonable period after request from Assignee, Assignor hereby constitutes and appoints Assignee and its successors and assigns as Assignor's true and lawful attorneys with full power of substitution, in Assignor's name and stead but on behalf and for the benefit of the Assignee and its successors and assigns, to demand and receive any and all of the IP and to give receipts and releases for and in respect of the same, and any part thereof, and from time to time to institute and prosecute, at the expense and for the benefit of the Assignee and its successors and assigns, any and all proceedings at law, in equity or otherwise, or to execute such documents, which the Assignee or its successors or assigns may deem proper for the collection or reduction to possession of, or recordation of ownership to, any of the IP, or for the collection and enforcement of any claim or right of any kind hereby sold, conveyed, transferred and assigned, or intended so to be, and to do all acts and things in relation to the IP which the Assignee or its successors or assigns shall deem desirable. The foregoing powers are coupled with an interest and are and shall be irrevocable by the Assignor or by dissolution of the Assignor or in any manner or for any reason whatsoever.

4. Terms of the Asset Purchase Agreement. The parties hereto acknowledge and agree that this Assignment Agreement is entered into pursuant to the Asset Purchase Agreement, to which reference is made for a further statement of the rights and obligations of Assignor and Assignee with respect to the IP. This Assignment Agreement does not convey any rights of Assignor other than those required to be transferred under the Asset Purchase Agreement. The representations, warranties, covenants, agreements, and indemnities contained in the Asset Purchase Agreement shall not be superseded hereby but shall remain in full force and effect to the full extent provided

therein. In the event of any conflict or inconsistency between the terms of the Asset Purchase Agreement and the terms hereof, the terms of the Asset Purchase Agreement shall govern.

4. Governing Law; Submission to Jurisdiction and Venue. This Assignment Agreement shall be construed, interpreted, governed, applied and enforced in accordance with the laws of the State of Delaware, without regard to any provisions thereof relating to conflicts of laws among different jurisdictions. Each of the parties hereto irrevocably submit to the non-exclusive jurisdiction and venue of the state or federal courts located in Dover, Delaware, U.S.A. to resolve any dispute related hereto or arising hereunder. Each of the parties hereby irrevocably waives any objection they may now or hereafter have as to the venue of any such action or proceeding brought in such court including but not limited to any objection that such court is an inconvenient forum.

5. Counterpart and Facsimile Signatures. This Assignment Agreement may be executed in one or more counterparts, each of which shall be deemed an original but all of which together will constitute one and the same instrument. Any signature page hereto delivered by facsimile or by e-mail (including in portable document format (pdf), as a joint photographic experts group (jpg) file, or otherwise) shall be binding to the same extent as an original signature page, with regard to any agreement subject to the terms hereof or any amendment thereto. Any party that delivers such a signature page agrees to later deliver an original counterpart to any party that requests it.
