THIS ASSIGNMENT AND ASSUMPTION AGREEMENT (this “**Agreement**”) dated as of April 22, 2022, is made by and between Circadian Zirclear Inc., a Delaware corporation (“**Assignor**”), and Korus, Inc., a Delaware corporation (“**Assignee**”).

### RECITALS

WHEREAS, Assignor and Assignee have entered into an Asset Purchase Agreement, dated as of the date hereof (“**Asset Purchase Agreement**”), pursuant to which, upon the terms and subject to the conditions set forth therein, Assignor shall sell, and Assignee shall purchase, the Assets and Assignee shall assume the Assumed Liabilities, as specified in the Asset Purchase Agreement, at the Closing and as of the Closing Date.

NOW, THEREFORE, in consideration of the promises and the mutual agreements and covenants contained herein and in the Agreement and for other good and valuable consideration, the receipt of which is hereby acknowledged, the parties hereto agree as follows:

### AGREEMENT

1. General Assignment. In accordance with the terms of the Asset Purchase Agreement, Assignor hereby sells, assigns, conveys, transfers and agrees to deliver to Assignee, effective as of the Closing Date:

a. all right, title and interest in and to, and rights, duties and obligations under, the Assigned Contracts and Assumed Liabilities;

b. all of Assignor’s right, title and interest to the Intellectual Property owned by Assignor including Assignor’s rights in any abandoned, cancelled, rejected or expired Intellectual Property owned by Assignor, and including without limitation, the Seller Owned Intellectual Property, and any part, component, aspect, element and right thereof (collectively, the “**Assigned Intellectual Property**”);

c. (i) the exclusive right to exercise, exploit, assign, transfer, commercialize, develop, improve, and grant rights and licenses under and with respect to any of the Assigned Intellectual Property, and to sue or otherwise enforce, and continue any suit or other enforcement, for any infringement of Assigned Intellectual Property occurring before or after the Closing Date, subject in each case to all Out-Bound Licenses granted by Assignor to third parties under the Assigned Intellectual Property set forth on Schedule 5.19(c) of the Asset Purchase Agreement, and (ii) all statutory, contractual and other claims, demands, and causes of action for royalties, fees, or other income from, or infringement, misappropriation or violation of, any of the Assigned Intellectual Property, and all of the proceeds from the foregoing that are accrued and unpaid as of, and/or accruing after, the Closing Date; and

d. the exclusive right to file, continue, discontinue, prosecute, abandon, maintain, cancel, let expire, apply for and obtain statutory rights and registrations with respect to any Assigned Intellectual Property, including without limitation any Assigned Intellectual Property conceived, developed or reduced to practice prior to the Closing Date solely by

individuals who were employees or consultants of Assignors within the scope of their employment or engagement, subject in each case to all rights granted by Assignor to third parties prior to the Closing Date as set forth in Schedule 5.19(c) of the Asset Purchase Agreement (such provisions in Section 1(a) through (d), the “**Assignment**”).

2. Assumption. In accordance with the terms of the Asset Purchase Agreement, the undersigned Assignee hereby accepts the Assignment and agrees to completely and timely perform all obligations on the part of Assignor under or in relation to the Assigned Contracts, if any, and further agrees to be liable for, perform, pay and discharge any and all of the Assumed Liabilities, if any, from and after the Closing Date.

3. Domain Names. In furtherance of the Assignment in Section 1 above, Assignor hereby irrevocably transfers, conveys, sells and assigns to Assignee all right, title and interest, everywhere in the world, in and to the domain names registrations included in the Assigned Intellectual Property, which are listed on Schedule A hereto, and all subdomains thereunder.

4. Patents. In furtherance of the Assignment in Section 1 above, Assignor hereby irrevocably transfers, conveys, sells and assigns all of Assignor’s right, title and interest, everywhere in the world, in and to the Patents included in the Assigned Intellectual Property, which are set forth in Schedule B, including, but not limited to, any continuations, divisions, continuations-in-part, substitutes, reissues, reexaminations, extensions and renewals thereof, together with all priority rights (including, but not limited to, all provisional patent applications and PCT applications) and counterpart applications (including, but not limited to, all pending and granted national stage applications) under any existing or future international patent conventions, agreements or treaties, to Assignee. Assignor hereby authorizes and requests the Commissioner of the United States Trademark and Patent Office, and the corresponding entity or agency in any applicable foreign country, to record Assignee as assignee and owner of the foregoing Patents. Upon the Closing, Assignor shall instruct its patent counsel to promptly transfer (electronically, to the extent commercially feasible) to Assignee or its designated counsel all documents in the possession of Seller’s patent counsel that are related to the Patents included in the Assigned Intellectual Property, including, without limitation, documents related to all provisional patent applications and PCT applications owned by Seller. Assignor covenants and agrees that it has not executed, and will not execute, any agreement in conflict herewith.

5. Trademarks. In furtherance of the Assignment in Section 1 above, Assignor hereby irrevocably transfers, conveys, sells and assigns all of Assignor’s right, title and interest, everywhere in the world, in and to the Marks included in the Assigned Intellectual Property, which are set forth in Schedule C (the “**Assigned Marks**”), to Assignee, together with the goodwill of the business in connection with and symbolized by the Assigned Marks, and pursuant to Section 10 of the Trademark Act, 15 U.S.C. §1060, such assignment includes the portion of the business of Assignor to which the Assigned Marks pertain, and all rights to sue (including filing and prosecuting opposition, cancellation and other similar proceedings) and for recovery, damages and profits due or accrued, arising out of or in connection with, any and all past, present and future infringements or dilution of or damage or injury to the Assigned Marks or such associated goodwill, if any. Assignor hereby authorizes and requests the Commissioner of the United States Trademark and Patent Office, and the corresponding entity or agency in any applicable foreign

country, to record Assignee as assignee and owner of the Assigned Marks. Assignor covenants and agrees that it has not executed, and will not execute, any agreement in conflict herewith.
