<p><u>Rapid Infusion Coffee Maker</u></p> <p>The invention mixes ground coffee and water in a chamber, then purges the chamber, forcing the mix through a filter and into a carafe or a cup. An optional feature is a way to make steam available without waiting for the temperature of the single boiler to rise from the brewing temperature to boiling temperature. Another optional feature is a novel disposable filter invention because conventional disposable cone or basket filters are not suitable for this brewer.
