INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

This Intellectual Property Assignment Agreement (“**Assignment**”), effective as of November 1, 2022 by and between Monosem LLC, a limited liability company organized under the laws of Iowa, United States of America, with its principal address at One John Deere Place, Moline, Illinois 61265 (“**Assignor**”) and Deere & Company, a Delaware corporation with its principal place of business at One John Deere Place, Moline, Illinois 61265 (“**Assignee**”).

WHEREAS, Assignor and Assignee are engaged in the development, manufacture, marketing, distribution, and service of agricultural equipment, lawn/garden/turf equipment and utility off-road vehicles, construction and forestry equipment, and parts and accessories with those products; and

WHEREAS, Assignor wishes to assign, convey and transfer to Assignee, and Assignee wishes to acquire, any and all of the intellectual property rights owned or held by Assignor (the “**Transferred IP**”).

NOW, THEREFORE, in consideration of the promises set forth above and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor and Assignee agree as follows:

1. Assignor agrees to assign, transfer and convey, and does hereby assign, transfer and convey to Assignee and its successors and assigns, any and all of Assignor’s entire right, title, and interest in and to the Transferred IP existing as of the date hereof, including, without limitation, the following intellectual property rights, and Assignee hereby accepts such assignment, transfer and conveyance:
 - (a) any and all patents and patent applications, invention disclosures, and such other patents as may issue thereon or claim priority under United States law, any other country’s or jurisdiction’s law, or international convention, including but not limited to non-provisionals, continuations, divisionals, reissues, reexaminations, reviews, extensions, and substitutions, and any right, title and interest Assignor may have in applications to which such patents or patent applications claim priority, including, without limitation, those patents and patent applications set forth on Schedule A hereto (the “**Patents**”);
 - (b) any and all trademarks, service marks, names, corporate names, trade names, domain names, social media accounts and usernames, logos, slogans, trade dress, design rights, and other similar designations of source or origin, together with any applications and registrations therefor (including any common law rights that may exist and are associated therewith) and together with the goodwill symbolized by any of the foregoing, including, without limitation, those trademark registrations,

trademark applications, domain names set forth on Schedule B hereto, (the “**Trademarks**”);

- (c) any and all copyrights and copyrightable subject matter, and the right to secure all registrations thereof, all renewals and extensions of such registrations and all moral rights and rights of attribution and integrity and other rights of authorship (the “**Copyrights**”);
- (d) all rights in computer programs and any software (whether in source code, object code, or other form), algorithms, flow charts, updates, modifications, databases, compilations and data, technology supporting the foregoing, and all documentation, including user manuals and training materials, related to any of the foregoing;
- (e) all trade secrets and other confidential information, ideas, know-how, inventions, discoveries, techniques, proprietary processes, formulae, models, and methodologies;
- (f) rights and interests in respect of Transferred IP and any third party intellectual property rights under licenses to which Assignor is party (either as licensor or licensee), provided, that nothing contained in this Assignment shall be construed as an attempt to assign or transfer any right or obligation that is in law non-assignable or non-transferable without the consent of a third party, unless and until such consent shall be given; and
- (g) any and all rights to sue and recover damages and/or profits for any and all past or present infringement, misappropriation, dilution or other violation of the Transferred IP,

all of the same to be held and enjoyed by Assignee, and/or its licensee(s), for its own use and for the use of its successors or assigns as fully and entirely as the same would have been enjoyed by Assignor, if assignment thereof had not been made.

2. Assignor does hereby authorize the United States Patent and Trademark Office and the United States Copyright Office and any other patent and trademark or copyright office or similar or comparable agency, office, register or registrar in any country or jurisdiction to record Assignee as the owner of the Patents, Trademarks and Copyrights in accordance with the terms of this instrument, and to issue any such registration, certificate or document in such country or jurisdiction in the name and for the benefit of Assignee. Assignor further hereby authorizes the current registrar of any domain name in the Transferred IP to transfer the ownership and control of such domain name to Assignee.
3. Assignor agrees to provide cooperation and assistance to Assignee and its successors, assigns and legal representatives and perform upon written request and at Assignee’s expense any and

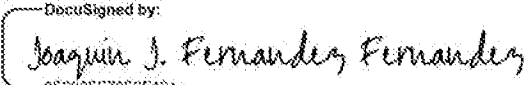

all lawful acts (including timely executing, or causing those under its direct control to timely execute, any and all documents) that may be reasonably necessary to record the assignment and transfer of the Patents, Trademarks and Copyrights with the United States Patent and Trademark Office, the U.S. Copyright Office and any other patent and trademark or copyright office or similar or comparable agency, office, register or registrar in any country or jurisdiction. Assignor shall also execute all documents, papers, forms and authorizations, and perform all actions necessary to effectuate the transfer of ownership and control of the domain names to Assignee and its successors, assigns and legal representatives, including without limitation arranging for the domain names to be unlocked by Assignor's registrar (or registrars) in preparation for their transfer to Assignee and providing Assignee with the authorization codes that Assignee may need to initiate the transfer of the domain names to Assignee, to enable Assignee to register the domain names in the name of Assignee with the domain name registry of Assignee's choosing.

4. Assignee and Assignor also agree that this Assignment may be executed in counterparts, each of which shall be deemed an original, but all of which together constitute one and the same instrument, and each of which shall be valid and binding upon Assignee and Assignor.
5. This Assignment shall be governed under the laws of the State of Illinois, without regard to any applicable principles of conflicts of law that might require the application of the laws of any other jurisdiction.
6. This Assignment shall be binding upon and inure to the benefit of Assignor, Assignee and their respective successors and assigns.

IN WITNESS WHEREOF, Assignor and Assignee have caused this Assignment to be executed as a sealed instrument by their duly authorized representatives as of the date first written above.
