ASSIGNMENT

Sandar Industries, Inc., of 1545 Main Street, Atlantic Beach, FL 32233, United States, a corporation of the state of Florida, hereinafter the "Assignor," having ownership of certain patents and trademarks;

and, Ryeco, LLC, of 83 Peebles Valley Road, Ste 103, Cartersville, GA 30121 United States, a Georgia Limited Liability Company, hereinafter the "Assignee;"

hereby agree to the transfer of ownership of the intellectual property applications, which are described in the list on the attached Schedule A (Patents) and Schedule B (Trademarks) (collectively, the "Assigned IP") from the Assignor to the Assignee effective **June 8, 2023** (the "Effective Date"), under the following terms.

For good and valuable consideration, the sufficiency of which is acknowledged, the Assignor hereby assigns and transfers and/or has assigned and transferred to Assignee, and the Assignee hereby accepts:

the entire right, title and interest in, to, and under the Assigned IP, including, without limitation, all goodwill associated therewith, any and all income, royalties or payments due or payable as of the Effective Date or thereafter as well as the right to sue for any and all past, present and future infringements of such Assigned IP, and to receive any and all damages awarded as a result of any such claim, all priority rights for other countries arising therefrom and the right to claim priority to the Assigned IP, all inventions or discoveries therein disclosed, and any and all Letters Patent and Trademarks of the United States, European Patent Office, and of all other countries, which may be granted for such inventions or discoveries, or any of them, and all other rights and interests therein and thereto. The assignment contained herein further includes all such inventions or discoveries and all rights in such Assigned IP, including any and all patent or trademark applications claiming priority to the Assigned IP, including provisionals, substitutions, divisions, continuations thereof, and to all Letters Patent that may be granted for said inventions and discoveries, and in and to all extensions, supplementary protection certificates, reexaminations, renewals, and reissues thereof, all to be held and enjoyed by Assignee for its own use and enjoyment to the full end of the term or terms for which such Letters Patent may be granted, as fully and entirely as the same would have been held and enjoyed by me had this assignment not been made.

ASSIGNMENT

Assignor agrees to execute all papers, and take all other actions, as necessary in connection with the Assigned IP to consummate the assignment contemplated herein, including executing all papers and taking all actions required by the United States Patent and Trademark Office, European Patent Office, any other patent offices, and under the Patent Cooperation Treaty, or required in connection with any continuing, divisional, or reissue applications thereof, any reexamination of any of such applications, and any patent term extensions or supplementary protection certificates of any such applications and also to execute separate assignments in connection with such applications as the Assignee may deem necessary or expedient.

Assignor shall execute all papers necessary in connection with any litigation or any other judicial proceeding in the United States or other country, or any administrative proceeding in the United States Patent and Trademark Office, European Patent Office, any other patent office, or under the Patent Cooperation Treaty concerning the Assigned IP or any continuation, divisional, or reissue applications thereof, or any reexamination of any such applications, or any Letters Patent issued therefrom or any patent term extensions or supplementary protection certificates of any such applications and to cooperate with the Assignee in every way possible in obtaining evidence and going forward with such litigation or proceeding.

Assignor shall execute all papers and documents and perform any act which may be necessary in connection with claims or provisions of the International Convention for Protection of Industrial Property or similar agreements.

Assignor shall do all other acts which, in the opinion of Assignee, may be necessary or desirable to secure the grant of Letters Patent to Assignee or its nominees, in the United States, by the European Patent Office and in all other countries where Assignee may desire to have such inventions or discoveries, or any of them, patented, with specifications and claims in such form as shall be approved by Assignee and to vest and confirm in Assignee or its nominees the full and complete legal and equitable title to all such Letters Patent.

Assignor hereby:

(i) authorizes and requests the Commissioner of Patents to issue any and all Letters Patent of the United States resulting from the Assigned IP or any divisional, continuation, or reissue applications thereof, and any reexamination of any of such applications, to Assignee; and

ASSIGNMENT

(ii) covenants that Assignor has full right to convey the interest herein assigned, and that Assignor has not executed, and will not execute, any agreement in conflict herewith.

Assignor hereby grants the attorney of record the power to insert on this assignment any further identification which may be necessary or desirable in order to obtain legal recordation of this document.

MISCELLANEOUS TERMS. The terms and provisions of this Assignment shall be binding upon, and inure to the benefit of, Assignor and Assignee, and each of their respective successors and assigns. Nothing in this Assignment is intended to or shall confer upon any person other than the parties and their respective successors and assigns, any rights, benefits, or remedies of any nature whatsoever under or by reason of this Assignment or any transaction contemplated by this Assignment. This Assignment and the rights and obligations of the parties shall be governed by and shall be enforced and interpreted in accordance with the laws of the State of Delaware, without regard to conflicts of law doctrines. Assignor and Assignee acknowledge and agree that the representations, warranties, covenants, agreements and indemnities contained in the Purchase Agreement shall not be superseded hereby, but shall remain in full force and effect to the extent provided therein. In the event of any conflict or inconsistency between the terms of the Purchase Agreement and the terms hereof, the terms and provisions of the Purchase Agreement shall govern. This Assignment may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Copies (facsimile, electronic or original) of signatures to this Assignment shall be deemed to be originals and shall be binding to the same extent as original signatures.
