EXECUTION VERSION

ASSIGNMENT OF PATENTS, TRADEMARKS AND LICENSES
AS COLLATERAL SECURITY

This Assignment of Patents, Trademarks and Licenses as Collateral Security ("Assignment") is dated as of March 24, 1998, by and between MULTIFASTENER CORPORATION, a Michigan corporation ("Multifastener"), with a place of business at 12668 Arnold Avenue, Detroit, Michigan 48239 and FABRI-STEEL PRODUCTS INCORPORATED, a Michigan corporation ("Fabri-Steel"), with a place of business at 22900 West Eight Mile Road, Southfield, Michigan 48034.

BACKGROUND

A. Multifastener and Fabri-Steel are parties to an Indemnification Agreement dated as of the date hereof (the "Indemnification Agreement"), and an Amended and Restated License Agreement dated as of the date hereof (the "Agreement" or the "License Agreement").

B. In order to induce Fabri-Steel to enter into the above-described Agreement, Multifastener, pursuant to the terms and conditions of the Agreement, has agreed to assign as collateral security to Fabri-Steel certain patent, trademark, service mark, copyright and license rights, whereby Fabri-Steel, upon the occurrence of an Event of Default (as such term is defined in the Agreement), shall have the right to foreclose on the patents, trademarks, service marks, copyrights and licenses of Multifastener, in order that Fabri-Steel may continue the manufacture and sale of products sold and services rendered under the patents, trademarks, service marks, copyrights and licenses.

NOW, THEREFORE, FOR GOOD AND VALUABLE CONSIDERATION, the receipt and adequacy of which are hereby acknowledged and intending to be legally bound, Multifastener agrees with Fabri-Steel as follows:

1. Assignment. Multifastener, as additional security for the complete and timely payment, performance and satisfaction of all of the Obligations (as hereafter defined), hereby grants a security interest effective immediately in and to, and assigns as collateral security unto Fabri-Steel, its successors and assigns, upon the following terms and conditions, all of its right, title and interest existing in, under or to its now owned or existing and, if necessary or useful in the businesses of Fabri-Steel, hereafter acquired or arising:

(i) United States and foreign patents and patent applications, including, without limitation, the inventions and improvements described and claimed therein, and those patents listed on Schedule A attached hereto and made a part hereof, and the continuations, divisionals, continuations-in-part, reexaminations and reissues and renewals thereof and all income, royalties, damages and payments now and hereafter due and/or payable under and with

respect to all such United States and foreign patents and patent applications, including, without limitation, damages and payments for past and future infringements thereof (all of the foregoing United States and foreign patents and patent applications are sometimes hereinafter individually and/or collectively referred to as the "Patents");

(ii) United States and foreign trademarks, service marks, trademark registrations, service mark registrations, service mark applications, trade names, and trademark applications, including, without limitation, the trademark registrations and applications listed on Schedule B attached hereto and made a part hereof, and renewals thereof, the goodwill associated therewith and all income, royalties, damages and payments now and hereafter due and/or payable under all such trademarks and trademark applications, including, without limitation, damages and payments for past and future infringements thereof (all of the foregoing trademarks, service marks, trademark registrations, service mark registrations, trademark applications, service mark applications, trade names and applications are sometimes hereinafter individually and/or collectively referred to as the "Trademarks"); and

(iii) any license agreement in which Multifastener is or becomes licensed to use a patent, trademark, copyright or the know-how of any other person which relates to technology necessary or useful in the business of Fabri-Steel or its subsidiaries as such business exists as of the date hereof including, without limitation, the license agreements listed on Schedule C attached hereto and made a part hereof (all of the foregoing are sometimes referred to hereinafter as the "Licenses").

As used herein, the term "Obligations" shall mean all duties of payment and performance, whether direct or indirect, both now existing and arising from time to time, owed by Multifastener to Fabri-Steel under the Agreement. This Assignment is delivered pursuant to and in confirmation of the terms and conditions of the Agreement, which terms and conditions are incorporated by reference into this Assignment and made a part hereof as if fully set out herein.

2. Assignment of Patents. In addition to all other rights granted to Fabri-Steel under the Agreement, and this Assignment, effective only upon an Event of Default under any Agreement, Multifastener hereby sells, assigns, transfers and sets over to Fabri-Steel for collateral purposes only, Multifastener's entire right, title and interest in and to all of the Patents.

3. Assignment of Copyrights and Trademarks. In addition to all other rights granted to Fabri-Steel under the Agreement, and this Assignment, effective only upon an Event of Default under the Agreement, Multifastener hereby sells, assigns, transfers and sets over to Fabri-Steel for collateral purposes only, Multifastener's entire right, title and interest in and to all Trademarks and the goodwill associated therewith.

4. Assignment of Licenses. In addition to all other rights granted to Fabri-Steel under the Agreement and this Assignment, effective only upon an Event of Default under the Agreement, Multifastener hereby sells, assigns, transfers and sets over to Fabri-Steel for collateral

purposes only, any and all assignable rights of Multifastener under the Licenses and any other license agreement with any other party relating to intellectual property necessary or useful in the business of Fabri-Steel, whether Multifastener is a licensor or licensee under such license agreement, and the right to prepare for sale, sell and advertise for sale, all collateral granted under this Agreement now or hereafter owned by Multifastener and now or hereafter covered by such license and agrees that it will not take any action, or permit any action to be taken by others subject to its control, including licensees, or fail to take any action, which could reasonably be expected to affect in any material respect the validity or enforcement of the rights transferred to Fabri-Steel under this Assignment. Multifastener hereby covenants that it will immediately notify Fabri-Steel if any Patent or Trademark shall at any time hereafter become subject to such license agreement and that it will promptly provide Fabri-Steel with full identification thereof and with such further documentation as Fabri-Steel may reasonably request to accomplish or assure the accomplishment of the purposes of this Section 4

5. Representations And Warranties. Multifastener represents and warrants that Multifastener has the unqualified right to enter into this Assignment and to perform its terms.

6. Rights Upon Default. Upon the occurrence and during the continuance of an Event of Default, which is continuing, and without the necessity of notice (except notice required by law) or other action by Fabri-Steel, Fabri-Steel shall have the right, at any time (but shall have no obligation) to take, in its name or in the name of Multifastener or otherwise, such actions as Fabri-Steel may, at any time or from time to time, deem necessary to sell, transfer and assign the Patents, Trademarks, and Licenses, together with all good will associated therewith. The right provided by the foregoing sentence shall be the exclusive right of Fabri-Steel under this Assignment upon the occurrence of an Event of Default, but shall not affect the rights of Fabri-Steel under the Agreement or any other agreement between Fabri-Steel, Multifastener or any affiliate thereof. Fabri-Steel shall incur no liability to Multifastener if any action taken by Fabri-Steel in good faith pursuant to the foregoing sentence shall prove to be, in whole or in part, inadequate or invalid. Upon the occurrence of an Event of Default and thereafter, Multifastener hereby irrevocably and unconditionally authorizes and empowers Fabri-Steel to make, constitute and appoint any officer or agent of Fabri-Steel as Fabri-Steel may select, in its exclusive discretion, as Multifastener's true and lawful attorney-in-fact, with the power to endorse Multifastener's name on all applications, documents, papers and instruments necessary for Fabri-Steel to use the Patents, Trademarks and Licenses, or to grant or issue any exclusive or nonexclusive licenses under the Patents, Trademarks and Licenses to any other person, or for Fabri-Steel to assign, pledge, convey or otherwise transfer title in or dispose of the Patents, Trademarks and Licenses to any other person (so long as such actions are in compliance with applicable law). Multifastener hereby ratifies all that such attorney shall lawfully do or cause to be done by virtue hereof (so long as such actions are in compliance with applicable law). This power of attorney shall be irrevocable for the life of this Assignment, and constitutes a power of attorney coupled with an interest. All of Fabri-Steel's rights and remedies with respect to the Patents, Trademarks and Licenses, whether established by this Assignment, by the Agreement, or by law shall be cumulative and may be exercised singularly or concurrently.

7. Patent And Trademark Office May Rely Upon This Assignment. If Fabri-Steel shall elect to exercise any of its rights hereunder, the United States Patent and Trademark Office shall have the right to rely upon Fabri-Steel's written statement of Fabri-Steel's right to sell, assign and transfer the Patents and Trademarks and Multifastener hereby irrevocably and unconditionally authorizes the United States Patent and Trademark Office to recognize such sale by Fabri-Steel either in Multifastener's name or in Fabri-Steel's name without the necessity or obligation of the United States Patent and Trademark Office to ascertain the existence of any default by Multifastener under the Agreement.

8. Notices. Notices that are required or permitted to be delivered hereunder shall be sufficient if in writing and sent to the addresses set forth in the License Agreement, in the manner and within the time specified in the License Agreement.

9. No Further Assignment. Multifastener shall not further assign transfer, encumber or convey its interests in the Patents, Trademarks or Licenses without the prior written consent of Fabri-Steel. This Assignment shall be assignable by Fabri-Steel without the prior consent of Multifastener, including a collateral assignment to any institutional lender providing financing to Fabri-Steel or its subsidiaries.

10. Further Assurances. Multifastener shall execute any further or additional documents reasonably considered necessary, appropriate or proper by Fabri-Steel to effectuate the purposes and intent of this Assignment.

11. Amendment. The terms and conditions of this Assignment may be modified, altered, waived, or amended only by a writing executed by Fabri-Steel and Multifastener consenting to the modification, alteration, waiver, or amendment.

12. Choice Of Law. The laws of the State of Michigan (excluding, however, conflict of law principles) shall govern and be applied to determine all issues relating to this Assignment and the rights and obligations of the parties hereto, including the validity, construction, interpretation, and enforceability of this Assignment and its various provisions and the consequences and legal effect of all transactions and events which resulted in the execution of this Assignment or which occurred or were to occur as a direct or indirect result of this Assignment having been executed.

13. Consent To Jurisdiction; Agreement As To Venue. Multifastener irrevocably consents to the non-exclusive jurisdiction of the courts of the State of Michigan and of the United States District Court in Michigan, if a basis for federal jurisdiction exists. Multifastener agrees that venue shall be proper in any circuit court of the State of Michigan selected by Fabri-Steel or in the United States District Court in Michigan if a basis for federal jurisdiction exists and waives any right to object to the maintenance of a suit in any of the state or federal courts of the State of Michigan on the basis of improper venue or of inconvenience of forum.

14. Severability. If any of the provisions of this Assignment are judicially determined to be in conflict with any law of the State of Michigan or otherwise judicially determined to be unenforceable for any reason whatsoever, such provision shall be deemed null and void to the extent of such unenforceability but shall be deemed separable from and shall not invalidate any other provision of this Assignment.

15. Successors And Assigns. The terms, covenants and conditions contained in this Assignment shall inure to the benefit of Fabri-Steel and its successors and assigns, and shall be binding upon Multifastener and its successors and assigns.

16. Royalties Term. Multifastener hereby agrees that the use in accordance with this Assignment by Fabri-Steel of all Patents, Trademarks and Licenses as described above shall be worldwide (except as contemplated by the License Agreement) and without any liability for royalties or other related charges from Fabri-Steel to Multifastener except as contemplated by the License Agreement. The term of the security interests and assignments granted herein shall extend until the expiration of each of the respective Patents, Trademarks and Licenses assigned hereunder, or until the payment and satisfaction of all obligations due and owing under the Agreement, whereupon Fabri-Steel shall, upon Multifastener's request and at Multifastener's expense, promptly execute and deliver to Multifastener all such releases, deeds, assignments and other instruments as are necessary or proper to re-vest in Multifastener its full right, title and interest in and to the Patents, Trademarks, Licenses and other interests in which a security interest and conditional assignment have been granted under this Assignment by Multifastener to Fabri-Steel, subject to any disposition thereof which may have been lawfully made by Fabri-Steel pursuant to this Assignment and the Agreement.

17. Remedies. Until the occurrence of an Event of Default under one of the Agreement, Fabri-Steel shall have no rights under the Patents, Trademarks and Licenses, other than the security interest granted in this Assignment and as contemplated by the License Agreement.

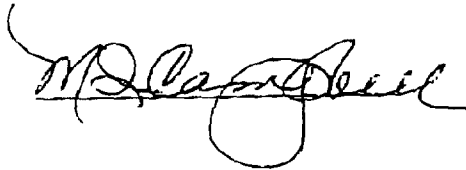

18. Power of Attorney. Multifastener hereby constitutes and appoints Fabri-Steel or its designee its true and lawful attorney, irrevocably, with full power after the occurrence of and during the continuance of an Event of Default (in the name of Multifastener or otherwise) to act, require, demand, receive, compound and give acquittance for any and all moneys and claims for moneys due or to become due to Fabri-Steel under or arising out of the Patents, Trademarks and Licenses, to endorse any checks or other instruments or orders in connection therewith and to file any claims or take any action or institute any proceedings that Fabri-Steel may deem to be necessary or advisable in the premises, which appointment as attorney is coupled with an interest.

IN WITNESS WHEREOF, Multifastener has executed this Assignment as of the date first above written with the specific intention of creating an instrument under seal.
