Court File No. 33- 146650

**SUPERIOR COURT OF JUSTICE
IN BANKRUPTCY AND INSOLVENCY**

THE HONOURABLE JUSTICE) WEDNESDAY, THE 14TH DAY OF
) **A. ROY) MAY, 2003**

**IN THE MATTER OF THE BANKRUPTCY OF LEVEL PLATFORMS INC., OF
THE CITY OF OTTAWA, IN THE PROVINCE OF ONTARIO**

ORDER

THIS MOTION made by Doyle Salewski Inc., Trustee in Bankruptcy in the Estate of Level Platforms Inc. for an Order vesting certain assets more particularly described in Schedule "A" annexed hereto in LPI Level Platforms Inc., was heard this day, without notice, at the Court House, 161 Elgin Street, Ottawa, Ontario.

ON READING the Affidavits of Paul Salewski and Peter Sandiford and on hearing the submissions of counsel for the Trustee in Bankruptcy:

1. **IT IS ORDERED** that the Motion Record and this Order shall be served upon Sahir Khan forthwith and that proof of service be filed in Court within 7 days.
2. **IT IS ORDERED** that the Motion Record and this Order shall be served forthwith upon the Class A Preferred shareholders and the Common shareholders of Level Platforms Inc. and that proof of service be filed in Court within 7 days.
3. **IT IS ORDERED** that the assets subject to the Agreement of Purchase and Sale between Doyle Salewski Inc., Trustee in Bankruptcy in the Estate of Level Platforms Inc.

Managed Workplace

1. **Managed Workplace Software:** All electronic and hard-copy versions of the source code, object code and documentation for distributed network-based management software for the user, systems and network management of the servers and software. This includes, but is not limited to:
 - **Primary Manager:** Monitors system services, events, disk space, performance counters, and log files and using Microsoft .NET communications. It also coordinates the monitoring activities and escalated events arising from Secondary and Workstation Managers. Automatically detects problems and, through an event-based expert system, initiates automated corrective handling. Consolidates system logs, performance data, asset information and events and forwards the consolidated summary to the Service Center. Using Microsoft .NET communications, the Primary Manager escalates alerts to the Service Manager based on the severity of the problem detected and its ability to successfully implement corrective action. Using Microsoft (IS, it provides a web-based user interface (wizards) to assist in the local administration of users, groups, and systems, including the management of Microsoft Active Directory and Exchange Information. The Primary Manager also provides a web-based facility to create, edit and display business news and user information for the site. Primary Manager supports Windows 2000 servers and maintains a SQL Server-based record of activities and events.
 - **Secondary Manager:** monitors system services, events, disk space, performance counters, and log files on servers. Automatically detects problems and, through an event-based expert system, initiates automated corrective handling. Consolidates system logs, performance data, asset information and events and forwards the consolidated information to the Primary Manager. Supports Windows 2000 servers.
 - **Workstation Manager:** provides the same functionality as the Secondary Manager for Windows 2000 and Windows XP desktops.
 - **Service Center:** logs and displays status information, alerts, and trouble tickets generated by Primary Managers resident on customer premises. Using IS, it implements a web-based user interface for managing trouble tickets and for accessing supplementary procedural information for recurring activities. Allows an administrator to report on the assets, utilization, and Onsite Manager activity in each customer premise.
 - **Compatibility Checker:** installation tools used to validate the customer's environment prior to and during installation.
2. All internal requirements, architecture, and design documentation; data; plans; engineering studies; research reports; and development schedules for the existing Managed Workplace product and its evolution. This includes, but is not limited to, all build documentation and scripts, database schema definitions, security codes and keys, help files, readme files, prototypes and mockups.
3. All test plans, procedures, harnesses, scripts, customer records, and test data
