FIRST LIEN INTELLECTUAL PROPERTY SECURITY AGREEMENT

This FIRST LIEN INTELLECTUAL PROPERTY SECURITY AGREEMENT, dated as of November 5, 2009 (as may be amended, supplemented, restated or otherwise modified from time to time, the "Intellectual Property Security Agreement"), is made by each of the signatories hereto (the "Grantors") in favor of JPMorgan Chase Bank, N.A., as first lien collateral agent (in such capacity, the "Collateral Agent") for the Secured Parties (for purposes of this Intellectual Property Security Agreement, the term "Secured Parties" shall have the meaning assigned to such term in the German IP Security Agreements referred to below).

A. Hilite Industries, Inc., and Hydraulik-Ring GmbH (collectively, the "Borrowers") and Hilite International, Inc. have entered into a First Lien Credit Agreement, dated as of November 5, 2009 (as may be amended, supplemented, restated or otherwise modified from time to time, the "Credit Agreement"), with the banks, financial institutions and other entities (the "Lenders") from time to time party thereto, and JPMorgan Chase Bank, N.A., as administrative agent, Collateral Agent, common lien collateral agent, and issuing bank.

B. It is a condition precedent to the obligation of the Lenders to make their respective extensions of credit to the Borrowers under the Credit Agreement that each of the Grantors execute and deliver this Intellectual Property Security Agreement.

C. Concurrently with the execution and delivery of this Intellectual Property Security Agreement, each of the Grantors is executing and delivering to the Collateral Agent a First Ranking Intellectual Property Rights Pledge Agreement in favor of the Collateral Agent and the Secured Parties, as may be as amended, varied, re-enacted, or supplemented from time to time (collectively, the "German IP Security Agreements"); the provisions of the German IP Security Agreements are supplemental to the provisions of this Intellectual Property Security Agreement.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Grantors agree as follows:

SECTION 1. GRANT OF SECURITY. As security for the payment or performance, as the case may be, in full of the Secured Obligations (as defined in the applicable German IP Security Agreements) with respect to every Grantor, each Grantor hereby pledges to the Collateral Agent, its successors and assigns, for the benefit of the Secured Parties, and hereby grants to the Collateral Agent, its successors and assigns, for the benefit of the Secured Parties, a security interest (the "Security Interest") in, all of its right, title or interest in or to any and all rights relating to intellectual and similar property of every kind and nature arising under the laws of the United States or any political subdivision thereof, now owned or at any time hereafter acquired or created by such Grantor or in which such Grantor now has or at any time in the future may acquire any right, title or interest, including without limitation the following (the "U.S. Intellectual Property Collateral"):

- (1) (a) all letters patent of the United States or any political subdivision thereof, all issuances and recordings thereof, and all applications for letters patent of the United States, including issuances, recordings and pending applications in the United States Patent and Trademark Office or any similar offices in any political subdivision thereof,

including those listed on Schedule A attached hereto, (b) all reissues, continuations, divisions, continuations-in-part, renewals, substitutes or extensions thereof, and the inventions disclosed or claimed therein, including the right to make, use, import, sell and/or offer to sell the inventions and improvements disclosed or claimed therein, and (c) the right to sue or otherwise recover for past, present and future infringements thereof ((a), (b) and (c) collectively referred to as the "Patents");

(2) (a) all trademarks, service marks, trade names, corporate names, company names, business names, fictitious business names, domain names, trade styles, trade dress, logos, other source or business identifiers, designs and general intangibles of like nature, now existing or hereafter adopted or acquired, whether arising under the laws of the United States or any political subdivision thereof, all registrations and recordings thereof, and all registration and recording applications filed in connection therewith, including registrations and registration applications in the United States Patent and Trademark Office or any similar offices in any State of the United States or any political subdivision thereof, including those listed on Schedule B attached hereto, (b) all renewals and extensions thereof, (c) all goodwill of the business connected with the use thereof or symbolized thereby, and (d) the right to sue or otherwise recover for past, present and future infringements or dilution of any of the foregoing or for any injury to such goodwill ((a), (b), (c) and (d) collectively referred to as the "Trademarks");

(3) (a) all copyrights arising under the laws of the United States or any political subdivision thereof, whether registered or unregistered and whether published or unpublished, (b) all registrations and recordings and applications for registration of any such copyright in the United States or any political subdivision thereof, including registrations, recordings, supplemental registrations and pending applications for registration in the United States Copyright Office, including those listed on Schedule C attached hereto, (c) all extensions and renewals thereof, and (d) the right to sue or otherwise recover for past, present and future infringements of any of the foregoing ((a), (b), (c) and (d) collectively referred to as the "Copyrights");

(4) (a) any agreement (whether or not in writing), now or hereafter in effect, granting to any third party any right to make, use, sell, offer to sell or import, distribute or otherwise exploit any invention claimed by a patent, now or hereafter owned by any Grantor or that any Grantor otherwise has the right to license, or granting to any Grantor any right to make, use, sell, offer to sell, import, distribute or otherwise exploit any invention claimed by a patent, in each case, now or hereafter owned by any third party, and all rights of any Grantor under any such agreement; (b) any agreement (whether or not in writing), now or hereafter in effect, granting to any third party any right to use any trademark now or hereafter owned by any Grantor or that any Grantor otherwise has the right to license, or granting to any Grantor any right to use any trademark now or hereafter owned by any third party, and all rights of any Grantor under any such agreement; (c) any agreement (whether or not in writing), now or hereafter in effect, granting any right to any third party under any copyright now or hereafter owned by any Grantor or that such Grantor otherwise has the right to license, or granting any right to any Grantor under any copyright now or hereafter owned by any third party, and all rights of such Grantor under any such agreement; and (d) any other license or sublicense

agreement to which any Grantor is a party ((a), (b), (c) and (d) collectively referred to as the “Licenses”);

(5) all inventions, designs, Software (as defined in Section 9-102(a)(75) of the New York Uniform Commercial Code), trade secrets, confidential or proprietary technical and business information, know-how, show-how or other data or information, software and databases;

(6) all embodiments or fixations of the foregoing and related documentation, registrations and franchises, and all additions, improvements and accessions to, and books and records describing or used in connection with, any of the foregoing;

(7) the right to sue at law or equity or otherwise recover for any past, present and future infringement or other violation of the foregoing; and

(8) all Proceeds (as defined in Section 9-102 of the New York Uniform Commercial Code) with respect to any of the foregoing. Notwithstanding the foregoing or anything else herein to the contrary, the term “U.S. Intellectual Property Collateral” shall not include any of the following assets and properties now owned or hereinafter acquired or created by any Grantor or in which such Grantor has or at any time in the future may acquire any right, title or interest:

(i) any license, contract, property rights or agreement to which any Grantor is a party or any of its rights or interests thereunder if and for so long as the grant of such security interest or lien shall constitute or result in (a) the abandonment, invalidation or unenforceability of any right, title or interest of any Grantor therein or (b) in a breach or termination pursuant to the terms of, or a default under, any such lease, license, contract, property rights or agreement (other than to the extent that any such term would be rendered ineffective pursuant to Sections 9-406, 9-407, 9-408 or 9-409 of the UCC (or any successor provision or provisions) of any relevant jurisdiction or any other applicable law or principles of equity), *provided, however*, that such security interest or lien shall attach immediately at such time as the condition causing such abandonment, invalidation or unenforceability shall be remedied and to the extent severable, shall attach immediately to any portion of such license, contract, property rights or agreement that does not result in any of the consequences specified in (a) or (b) above; and

(ii) any “intent to use” applications for trademark or service mark registrations filed pursuant to Section 1(b) of the Lanham Act, 15 U.S.C. § 1051, unless and until an “Amendment to Allege Use” or a “Statement of Use” under Section 1(c) or Section 1(d) of the Lanham Act has been filed, solely to the extent that such a grant of a security interest therein prior to such filing would impair the validity or enforceability of any registration that issues from such “intent-to-use” application.

SECTION 2. COVENANTS.

A. Each Grantor hereby irrevocably authorizes the Collateral Agent at any time and from time to time to file in any relevant jurisdiction any initial financing statements with respect to the U.S. Intellectual Property Collateral or any part thereof and amendments thereto that contain the information required by Article 9 of the Uniform Commercial Code of each applicable jurisdiction for the filing of any financing statement or amendment. Each Grantor also ratifies its authorization for the Collateral Agent to file in any relevant jurisdiction any initial financing statements or amendments thereto if filed prior to the date hereof.

B. The Collateral Agent is further authorized to file with the United States Patent and Trademark Office and the United States Copyright Office (or any successor office) such documents as may be necessary or advisable for the purpose of perfecting, confirming, continuing, enforcing or protecting the Security Interest granted by each Grantor, without the signature of any Grantor, and naming any Grantor or the Grantors as debtors and the Collateral Agent as secured party.

C. Each Grantor agrees, at its own expense, to execute, acknowledge, deliver and cause to be duly filed all such further instruments and documents and take all such actions as the Collateral Agent may from time to time reasonably request to better assure, preserve, protect and perfect the Security Interest and the rights and remedies created hereby, including the payment of any fees and taxes required in connection with the execution and delivery of this Intellectual Property Security Agreement, the granting of the Security Interest and the filing of any financing statements or other documents (including this Intellectual Property Security Agreement) in connection herewith or therewith. Without limiting the generality of the foregoing, each Grantor hereby authorizes the Collateral Agent, with prompt notice thereof to the Grantor, to supplement this Intellectual Property Security Agreement by supplementing Schedules A, B and C or adding additional schedules hereto to specifically identify any asset or item that may constitute Patents, Trademarks or Copyrights.

D. Upon and during the continuance of an Event of Default (as defined in the applicable Credit Agreement), each Grantor shall use its commercially reasonable efforts to obtain all requisite consents or approvals by the licensor of each License to effect the assignment of all such Grantor's right, title and interest thereunder to the Collateral Agent or its designee.

E. Each Grantor agrees that, should it obtain an ownership in any item of United States intellectual property during any fiscal year which is not, as of the date hereof, a part of the U.S. Intellectual Property Collateral, including filing any application for any Patent, Trademark or Copyright with the United States Patent and Trademark Office, United States Copyright Office or any office or agency in any political subdivision of the United States (the "After-Acquired U.S. Intellectual Property"), (i) the provisions of this Section 1 shall automatically apply thereto, (ii) any such After-Acquired U.S. Intellectual Property, and in the case of Trademarks, the goodwill of business connected therewith or symbolized thereby, shall automatically become part of the U.S. Intellectual Property Collateral, and the provisions of this Section 2 shall automatically apply thereto, (iii) it shall give written notice thereof to the Collateral Agent within 45 days after the end of each of the first three fiscal quarters and within 90 days after the end of

each fiscal year, and (iv) it shall provide the Collateral Agent promptly with an amended Schedule A, B or C, as applicable, and execute, deliver and have recorded any and all agreements, instruments, documents and papers as the Collateral Agent may request to evidence the security interest of the Collateral Agent and the Secured Parties in such After-Acquired U.S. Intellectual Property; each Grantor hereby appoints the Collateral Agent as its attorney-in-fact to execute and file such writings for the purpose of recording the Collateral Agent's security interest therein, all acts of such attorney being hereby ratified and confirmed; such power, being coupled with an interest, is irrevocable.

SECTION 3. RECORDATION. Each Grantor authorizes and requests that the United States Commissioner of Patents and Trademarks, the United States Register of Copyrights or any other applicable government officer record this Intellectual Property Security Agreement.

SECTION 4. DUAL LIEN INTERCREDITOR AGREEMENT. This Intellectual Property Security Agreement is subject to the terms of the Dual Lien Intercreditor Agreement (as defined in the Credit Agreement). The appointment of the Collateral Agent and the control by the Secured Parties of the Collateral Agent shall be governed by the terms of such Dual Lien Intercreditor Agreement.

SECTION 5. EXECUTION IN COUNTERPARTS. This Intellectual Property Agreement may be executed in any number of counterparts, each of which when so executed shall be deemed to be an original and all of which taken together shall constitute one and the same agreement.

SECTION 6. GOVERNING LAW.

This Intellectual Property Security Agreement shall be construed in accordance with and governed by the law of the State of New York.

IN WITNESS WHEREOF, each of the undersigned has caused this Intellectual Property Security Agreement to be duly executed and delivered as of the date first above written.
