SCHEDULES

Schedule I List of Trademarks, Service Marks, and Trademark and Service Mark Applications

TRADEMARK SECURITY AGREEMENT

This **Trademark Security Agreement** (this “**Agreement**”), dated as of April 25, 2014, is entered into between **IND Funding LLC**, a Delaware limited liability company, as grantee (“**Grantee**”), and **Integrated Diagnostics, Inc.**, a Delaware corporation, as grantor (“**Grantor**”).

Background

Grantor and Grantee have entered into a Loan Agreement dated as of April 25, 2014 (as amended, modified or supplemented from time to time, the “**Loan Agreement**”). It is a condition precedent to the funding of the Loans by Grantee under the Loan Agreement that Grantor shall have granted the security interests contemplated by this Agreement.

Grantor and Grantee have further entered into a Security Agreement dated as of April 25, 2014 (as amended, modified or supplemented from time to time, the “**Security Agreement**”). Pursuant to the Security Agreement, Grantor has granted to Grantee a security interest as contemplated by the Security Agreement, including, without limitation, in all right, title and interest of Grantor in, to and under all now owned and hereafter acquired trademarks, service marks, trademark applications, service mark applications, trademark licenses and service mark licenses, including all goodwill associated therewith, and all products and proceeds thereof, to secure the prompt, full and faithful payment and performance when due of the Obligations.

Agreement

Grantor hereby agrees, for the benefit of Grantee, as follows:

Section 1.01. **Loan Agreement Definitions.**

Unless otherwise defined herein or the context otherwise requires, terms used in this Agreement, including its preamble and recitals, have the meanings provided in the Loan Agreement.

Section 1.02. **Representation and Warranty.**

Grantor owns the trademarks, service marks, and trademark and service mark applications listed on **Schedule I** hereto.

Section 1.03. **Grant of Security Interest.**

(a) Grantor does hereby grant to Grantee a continuing security interest in all of Grantor’s right, title and interest in, to and under the following (all of the following items or types of property being herein collectively referred to as the “**Trademark Collateral**”), whether presently existing or hereafter created or acquired:

(i) each trademark, service mark, trademark application and service mark application, including, without limitation, each trademark, service mark, trademark application and service mark application referred to in **Schedule I** hereto, together with all of the

goodwill of the business conducted or connected with the use of, or symbolized by, each such trademark, service mark, trademark application and service mark application;

(ii) each trademark license and service mark license;

(iii) all products and proceeds of the foregoing, including, without limitation, any claim by Grantor against third parties for past, present or future infringement of any of the foregoing property, including, without limitation, any trademark or service mark referred to in **Schedule I** hereto, any trademark or service mark issued pursuant to a trademark application or service mark application referred to in **Schedule I** and any trademark or service mark licensed under any trademark or service mark license; and

(iv) Notwithstanding anything herein to the contrary, this Agreement shall not operate as a sale, transfer, conveyance or other assignment to Grantee of any applications by Grantor for a trademark based on an intent to use the same, if and so long as such application is pending without a Statement of Use having been filed and accepted by the applicable Trademark Office (such pending applications which are based on intent to use being hereinafter referred to collectively as "Intent-To-Use Applications"), and only to the extent a sale, transfer, conveyance, or other assignment to Grantee would impair the validity of such application, but rather, if and so long as each of Grantor's Intent-To-Use Applications is pending without a Statement of Use having been filed and accepted, then this Agreement shall operate only to create a security interest for collateral purposes in favor of Grantee on such Intent-To-Use Application as collateral security for the Obligations. When a Statement of Use is filed and accepted by the Trademark Office, then that application, to the extent partly exempted from this Agreement, shall cease to be partly exempted from this Agreement.

Notwithstanding anything contained herein, no security interest is granted hereunder in any Excluded Property (as defined in the Security Agreement), provided that, notwithstanding the foregoing, a security interest shall be, and is hereby, granted in (A) any Trademark Collateral immediately upon such Trademark Collateral ceasing to be Excluded Property and (B) any and all proceeds, products, substitutions and replacements of Excluded Property to the extent such proceeds, products, substitutions and replacements do not themselves constitute Excluded Property.

(b) This Agreement and the security interest created hereby secure the payment and performance of the Obligations, whether now existing or arising hereafter.

(c) If Grantor shall obtain rights to any new trademark, service mark, trademark application and service mark application, the provisions of this Agreement shall automatically apply thereto. Grantor shall give prompt notice in writing to Grantee with respect to any such new trademark rights. Without limiting Grantor's obligations under this Section 1.03(c), Grantor hereby authorizes Grantee to modify this Agreement without obtaining Grantor's signature to such modification, by amending **Schedule I** hereto to include any such new trademark rights of Grantor. Notwithstanding the foregoing, no failure to so modify this Agreement or amend any of the schedules hereto shall in any way affect, invalidate or detract

from Grantee's continuing security interest in all Collateral, whether or not listed on the schedules hereto.

Section 1.04. Remedies.

(a) The security interest described in Section 1.03 is granted in conjunction with the security interests granted to Grantee pursuant to the Security Agreement. Grantor hereby acknowledges and affirms that the rights and remedies of Grantee with respect to the security interest in the Trademark Collateral made and granted hereby are more fully set forth in the Security Agreement, the terms and provisions of which are incorporated by reference herein as if fully set forth herein.

(b) The terms and provisions of this Agreement are intended as a supplement to the terms and provisions of the Security Agreement. The rights and remedies of Grantee with respect to the security interests granted herein are without prejudice to, and are in addition to, those set forth in the Security Agreement.

(c) To the extent there is any inconsistency between this Agreement and the Security Agreement, the Security Agreement shall control.

Section 1.05. Recordation.

Grantor authorizes and requests that the Commissioner of Patents and Trademarks record this Agreement.

Section 1.06. Counterparts; Facsimile Signatures.

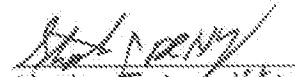

This Agreement may be executed and delivered by facsimile signature (including PDF) and in any number of counterparts, each of which shall be deemed an original but all of which together shall constitute one and the same instrument.

[The remainder of this page is intentionally left blank.]

US	INDX	Allowed	85/604394	42	Research and development in the field of analyzing plasma/blood using mass spectrometry, high level multiplex analysis and bioinformatics techniques.	Statement of Use/3 rd Extension Request – May 20, 2014 -
US	INDX	Allowed	85/604391	44	Medical testing, namely, analyzing plasma/blood using mass spectrometry, high level multiplex analysis and bioinformatics techniques for medical diagnostic and treatment purposes.	Statement of Use/3 rd Extension Request – May 20, 2014 -
US	INDX	Allowed	85/604389	10	Blood collection kit comprising, collection tubes, absorbent cloth, labels and instructions, all for medical use.	Statement of Use/3 rd Extension Request – May 20, 2014 -
US	INDX (STYLIZED) InDx	Allowed	85/604403	42	Research and development in the field of analyzing plasma/blood using mass spectrometry, high level multiplex analysis and bioinformatics techniques.	Statement of Use/3 rd Extension Request – May 20, 2014 -
US	INDX (STYLIZED) InDx	Allowed	85/604401	44	Medical testing, namely, analyzing plasma/blood using mass spectrometry, high level multiplex analysis and bioinformatics techniques for medical diagnostic and treatment purposes.	Statement of Use/3 rd Extension Request – May 20, 2014 -
US	INDX (STYLIZED) InDx	Allowed	85/604398	10	Blood collection kit comprising, collection tubes, absorbent cloth, labels and instructions, all for medical use.	Statement of Use/3 rd Extension Request – May 20, 2014 -
Canada	INTEGRATED DIAGNOSTIC S	Allowed	1460180		Protein capture agents and antibodies for testing proteins in blood; and diagnostic kits consisting primarily of protein capture agents and antibodies, buffers, and reagents for use in disease testing, health monitoring and more generally, predictive, preventive, personalized, and participatory medicine. Medical devices and instruments for measuring proteins in blood.	Registration Fee/Declaration of Use Due – Oct 5, 2014

Country	Trademark	Status	Serial No.	Class	Goods or Services	Due Date for Next Action
Int'l Reg	INTEGRATED DIAGNOSTIC S	Registered	1024386	5, 10	Protein capture agents and antibodies for testing proteins in blood; and diagnostic kits consisting primarily of protein capture agents and antibodies, buffers, and reagents for use in disease testing, health monitoring and more generally, predictive, preventive, personalized, and participatory medicine, in Class 5. Medical devices and instruments for measuring proteins in blood, in Class 10.	Transform Into National Applications – June 24, 2014
US	INTEGRATED DIAGNOSTIC S	Allowed	85/934605	5, 10	Diagnostic kits consisting primarily of protein capture agents and antibodies, buffers, and reagents for use in disease testing, health monitoring and more generally, predictive, preventive, personalized, and participatory medicine. Medical devices and instruments for measuring proteins in blood.	Statement of Use/1 st Extension Request – June 24, 2014
US	INTEGRATED DIAGNOSTIC S	Registered	4057059	5	Biochemical preparations for medical purposes, namely, protein capture agents and antibodies for testing proteins in blood.	Affidavit of Use – Nov 15, 2017
Australia	INTEGRATED DIAGNOSTIC S and Design 	Registered	1024356	5, 10	Protein capture agents and antibodies for testing proteins in blood; and diagnostic kits consisting primarily of protein capture agents and antibodies, buffers, and reagents for use in disease testing, health monitoring and more generally, predictive, preventive, personalized, and participatory medicine in. Medical devices and instruments for measuring proteins in blood.	First Renewal due Nov 24, 2019
European Community	INTEGRATED DIAGNOSTIC S and Design 	Registered	1024356	5, 10	Protein capture agents and antibodies for testing proteins in blood; and diagnostic kits consisting primarily of protein capture agents and antibodies, buffers, and reagents for use in disease testing, health monitoring and more generally, predictive, preventive, personalized, and participatory medicine. Medical devices and instruments for measuring proteins in blood.	First Renewal due Nov 24, 2019
Int'l Reg	INTEGRATED DIAGNOSTIC S and Design 	Registered	1024356	5, 10	Protein capture agents and antibodies for testing proteins in blood; and diagnostic kits consisting primarily of protein capture agents and antibodies, buffers, and reagents for use in disease testing, health monitoring and more generally, predictive, preventive, personalized, and participatory medicine.
