1. Assignment and Transfer of Patents. The Seller hereby permanently and irrevocably sells, grants, assigns, transfers, conveys, sets over and quit claims to Buyer, to the fullest extent possible, the entire right, title and interest in and to the Patents and in and to any and all divisions, continuations and continuations-in-part of all applications therefor, and any and all letters patent in the United States and all foreign countries which may be granted for and on the Patents, and all reissues, reexaminations and extensions of said letters patent, and all rights corresponding to such Patents in foreign countries throughout the world (including, without limitation, the right to claim priority based on the filing dates of the Patents, or any applications therefor, under the International Convention for the Protection of Industrial Property, the Patent Cooperation Treaty, the European Patent Convention, and all other treaties of like purposes, and the right to apply in all countries throughout the world in its own name or any other name (other than the name of Seller) for patents, utility models, design registrations and like rights of exclusion and for inventors' certificates for such inventions and

improvements), all rights to be held and enjoyed by Buyer, for its own use and benefit and the use and benefit of its successors, legal representatives and assigns, to the full end of the term or terms for which letters patent may be granted and/or extended, as fully and entirely as the same would have been held and enjoyed by Seller had this sale and assignment not been made, and all royalties and damages now and later due and payable with respect thereto, including without limitation, all rights to sue for past infringements of such Patents, together with all claims for damages or any other payments by reason of past, present or future infringements, with the right to sue for and collect the same for Buyer's own use and enjoyment of Buyer's successors, legal representatives and assigns.

2. Asset Purchase Agreement Governs. In the event of any inconsistencies or ambiguities between this Assignment and the Asset Purchase Agreement, the terms of the Asset Purchase Agreement shall govern.
3. Cooperation and Further Documentation. Seller agrees at any time hereafter to execute and deliver, without any further consideration, any such other assignments, instruments and/or documents as Buyer deems to be necessary or desirable to render this assignment in compliance with the local laws of any jurisdiction, or to confirm, effectuate, memorialize or record anywhere in the world the assignment of rights set forth herein. Seller further agrees to cooperate with Buyer at Buyer's expense in any other manner as may be reasonably required by Buyer to vest all rights, title, and interest in and to the Patents and Copyrights to Buyer and to effectuate the purpose and intent of this Assignment
4. Filing in Patent Offices. Copies of this document may be filed in one or more counterparts in the patent offices of any jurisdictions where patents and/or patent applications are filed or may hereafter exist. The directors of such offices are instructed to issue any letters patent and/or similar certificates and/or to send any communications from and after the Closing to Buyer at such addresses as Buyer may designate.
5. Uniqueness and Remedies. The Parties agree and acknowledge that the Patents, and the goodwill, rights, and privileges flowing from the Patents, are of a special, unique, unusual, extraordinary and intellectual character that gives them a peculiar value, the loss of which would cause irreparable injury that could not be reasonably or adequately compensated in connection with damages asserted in an action at law. In light of the foregoing, the Parties agree and acknowledges that monetary relief would not be an adequate remedy for a breach or threatened breach by a Party of the provisions of this Assignment and that the Buyer shall be entitled to the enforcement of this Assignment by injunction, specific performance or other equitable relief, without prejudice to any other rights and remedies that the Parties, or either of them, may have. If a Party resorts to equitable relief for breach or threatened breach of any provision of this Assignment, it shall not be construed to be a waiver of any other rights or

remedies that the Party may have for damages or otherwise.

6. Counterparts. This Assignment may be executed in two or more counterparts, each of which shall constitute an original, but all of which taken together shall constitute one and the same instrument.

IN WITNESS WHEREOF, the Parties have caused this Assignment to be duly executed as of the date first written above.

JOINT ANNOUNCEMENTS

RF Industries, Ltd. Purchases Innovative Connector Technology for Braided Cables from JMA Wireless

RF Industries, Ltd. (NASDAQ: RFIL) announces the purchase of the ComPro braided product line (ComPro Product Line) from JMA Wireless. JMA retains all of its compression connector product lines for corrugated cables. The ComPro Product Line utilizes a patented compression technology that offers revolutionary advantages for a water-tight connection, easier installation, and improved system reliability on braided cables. The ComPro Product Line is used by wireless network operators, installers and distributors in North America and other parts of the world. Included in the purchase is inventory, designs, intellectual property, rights to manufacture and sell the ComPro Product Line.

Johnny Walker, CEO/President of RF Industries states "This acquisition expands RFI's braided connector offerings to large telecommunication firms and our current customer base by providing a quality proven, best-in-class patented product."

Comments by Shawn Chawgo, VP of Product Management at JMA Wireless "Within our broader line of corrugated connector and jumper products we felt this connector series for LMR type braided cables did not fit with our current customer base and direct selling model. It better aligns with a distribution oriented model and customer base that RF Industries services very well."
