SCHEDULE 1

TRADEMARK
H/P ~~PATENT~~ ASSIGNMENT

Whereas, IMDS, LLC, a limited liability corporation of the state of Delaware having a place of business at 560 West Golf Course Road, Providence, UT 84332 ("Assignor") has ownership of certain inventions, improvements, and discoveries (herein collectively referred to as the "Invention") disclosed and/or covered by the patent applications and trademark applications in the listing of patent applications attached hereto (the "Patent Applications");

Whereas, Hyun Bae, M.D., an individual having a place of business at 2811 Wilshire Blvd. Suite 850, Santa Monica, CA 90403 ("Assignee"), desires to acquire, and Assignor desires to grant to Assignee, the entire worldwide right, title, and interest in and to the Invention and in and to any and all patent applications, patents, trademark applications, and trademark applications directed thereto;

Now, therefore, for good and valuable consideration, the receipt and sufficiency thereof being hereby acknowledged, Assignor hereby sells or has sold, assigns or has assigned, and otherwise transfers or has transferred to Assignee, its successors, legal representatives, and assigns, the entire worldwide right, title, and interest in and to the Invention, the Patent Applications, and any and all other patent applications, patents, trademark applications, and trademarks for the Invention which may be applied for or granted therefor in the United States and in all foreign countries and jurisdictions, including all divisions, continuations, reissues, reexaminations, renewals, extensions, counterparts, substitutes, and extensions thereof, and all rights of priority resulting from the filing of such applications and granting of such patents and trademarks.

In addition, Assignor hereby authorizes and requests the Director of the United States Patent and Trademark Office to issue any United States Patent or United States Trademark, and foreign patent authorities to issue any foreign patent or trademark, granted for the Invention, to Assignee, its successors, legal representatives, and assigns, the entire worldwide right, title, and interest in and to the same to be held and enjoyed by Assignee, its successors, legal representatives, and assigns to the full end of the terms for which any and all such patents and trademarks may be granted, as fully and entirely as would have been held and enjoyed by the undersigned had this Assignment not been made; and Assignor agrees to execute any and all documents and instruments and perform all lawful acts reasonably related to recording this Assignment or perfecting title to the Invention and all related patents, trademarks, and applications, in Assignee, its successors, legal representatives, and assigns, whenever requested by Assignee, its successors, legal representatives, or assigns.

Assignor acknowledges its prior and ongoing obligations to sell, assign, and transfer the rights under this Assignment to Assignee and is unaware of any reason why Assignor may not have the full and unencumbered right to sell, assign, and transfer the rights hereby sold, assigned, and transferred, and has not executed, and will not execute, any document or instrument in conflict herewith. Assignor also hereby grants Assignee, its successors, legal representatives, and assigns, the right to insert in this Patent Assignment any further identification (including, but not limited to, patent and trademark application numbers) which may be necessary or desirable for recordation of this Assignment. This Assignment is governed by the substantive laws of the State of Utah, and any disputes will be resolved in a Utah state court or federal court sited in Utah.
