(2) Grant of Security Interest.

To secure the prompt payment and performance, in full when due of the Secured Obligations, the Grantor hereby grants to the Lender, on behalf of and for the benefit of the Secured Parties, a security interest (the "**Security Interest**") in all of the Grantor's right, title and interest in, to and under Collateral consisting of any intellectual property arising under the laws of the United States or Canada now owned or at any time hereafter acquired by the Grantor, including those registered or applied for Trademarks listed on Schedule A, Patents listed on Schedule B, and Copyrights listed on Schedule C; provided that no security interest is granted on any intent-to-use trademark applications or patent applications filed in the United States Patent and Trademark Office to the extent that, and solely during the period in which the grant of a security interest therein would impair the validity or enforceability of such intent-to-use trademark applications or patent applications under applicable Requirements of Law or other Excluded Collateral (collectively, the "**Intellectual Property Collateral**"). If Grantor shall obtain rights to any new Intellectual Property Collateral, the provisions of Sections 2 and 3 hereof shall automatically apply thereto as if the same were identified on Schedules A, B and/or C attached hereto and made a part hereof as of the date hereof. Grantor hereby authorizes Lender to modify this Agreement by amending Schedules A, B and/or C to include any future Intellectual Property Collateral as contemplated by Sections 2 and this Section 4 and, at Lender's request, Grantor shall execute any documents or instruments reasonably required by Lender in order to modify this Agreement as provided in this Section 4, provided that any such modification to Schedules A, B and/or C shall be effective without the signature of Grantor. Grantor hereby acknowledges that Lender may refile or re-record this Agreement with the United States Patent and Trademark Office and the United States Copyright Office, together with any such modification to Schedules A, B and/or C.

After the occurrence and continued existence beyond any applicable cure periods of an Event of Default, the Assignment shall take effect immediately upon certification of such fact by an authorized officer of Lender in such Assignment and upon written notice to Grantor, and thereafter Lender may, in its discretion, record the Assignment with the United States Patent and Trademark Office.

(6) Counterparts.

This Agreement may be executed in counterparts (and by different parties hereto on different counterparts), each of which shall constitute an original but all of which when taken together shall constitute a single contract. Delivery of an executed signature page to this Agreement by facsimile or other electronic transmission shall be effective as delivery of a manually signed counterpart of this Agreement.

(7) Termination.

Upon the termination of the Security Agreement in accordance with its terms, or any disposition of the Intellectual Property Collateral in a transaction permitted under the Credit Agreement, the Security Interest shall automatically release with respect to all Intellectual Property Collateral (in the case of any such termination) or only with respect to the Intellectual Property Collateral subject to such a disposition (in the case of any such disposition) and, following a written request therefor, the Lender shall execute, acknowledge, and deliver to the Grantor (at the Grantor's sole expense) an instrument in writing in recordable form evidencing such release and take any other actions reasonably requested by the Grantor to effect such release.

(8) Governing Law.
